SMARTHOMES

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Agenda

Times are only indicative

Time	Topic	Presenter
10:00 - 10:05	Introduction to the webinar and expected results	SYNYO GmbH, Austria
10:05 - 10:30	PlatformUptake.eu project - background, objectives, achievements and planned actions	SYNYO GmbH, Austria
10:30 - 10:45	PlatformUptake.eu matchmaking events, goal, benefits and award	Frederic Lievens, Lievens-Lanckman, Belgium
10:45 - 10:55	Matchmaking events' page, features, benefits and submission form	SYNYO GmbH, Austria
10:55 - 11:10	Other project events	Frederic Lievens, Lievens-Lanckman, Belgium
11:10 - 11:20	Questions and Answers	SYNYO GmbH, Austria
11:20 - 11:30	Final remarks	SYNYO GmbH, Austria

All participants are kindly invited to raise questions in the chat.

To: Everyone

Project Type: **Coordination and Support Action**

Project duration: **26 months (01/01/2020 – 28/02/2022)**

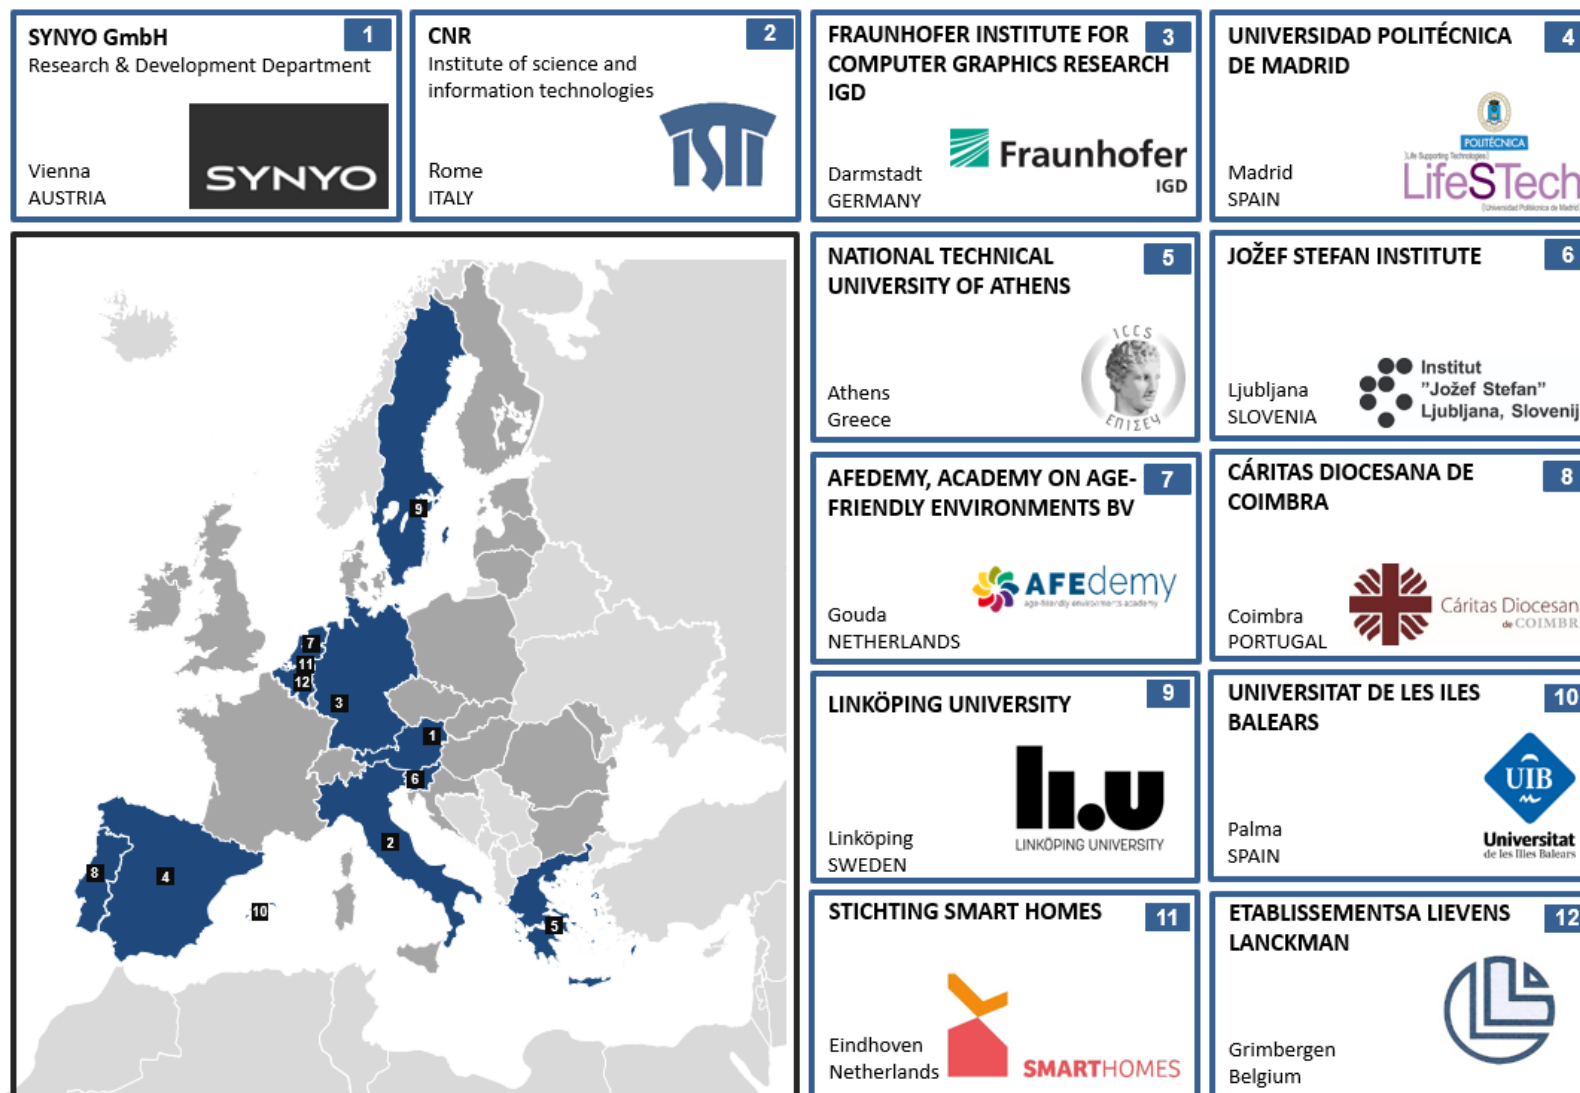

Person months: **172**

Partners: **12 from 10 countries**

Due to the persisting fragmentation of the active and healthy ageing market; and the lack of interoperability of the various solutions deployed or difficulties with the large scale uptake of the platforms by their targeted users, the aim of the PlatformUptake.eu project is to **observe, analyse and understand the whole ecosystem of open service platforms and their related networks**, and depict a picture describing the whole ecosystem with its **achievements and potentials**, targeting all user groups while also **generating synergies among platforms** and their **related projects** in the AHA and IoT domain.

Important

 **IDENTIFY** critical success factors of the development, deployment and spread of open platforms in the Active and Healthy Ageing Domain, through a sophisticated tailor-made monitoring methodology.

 **DEVELOP** monitoring and self-evaluation tools to support platform providers and users self-assess their success, uptake, capability gaps and evolution potentials through smart assessment and visualisation tools.

 **ANALYSE** existing platforms based on the created methodology, by assessing the projects and initiatives hosted by them, their further evolution, uptake, sustainability and socioeconomic benefits.

 **INVOLVE** end-user communities and related stakeholders to initiate a knowledge exchange cycle for collecting insights on best practices and challenges of platforms' uptake, evolution and costs etc.

 **LEVERAGE** the platform uptake by their user communities as well as their continuous improvement and expansion, by elaborating and showcasing best-practice models and evaluation guidelines.

 **DISSEMINATE** the acquired knowledge to end-users for increasing their uptake of existing platforms, and promote best practice models and identified benefits to foster future developments.

Collection of existing open platforms in the Active and Healthy Ageing domain, their end-users and related stakeholders

Glossary definition to meet the need of introducing and describing unambiguously the terminology used

Identification of the most representative platforms in AAL/AHA domain, first group of 48 of the projects and selection of 18 platforms to be part of the ecosystem map

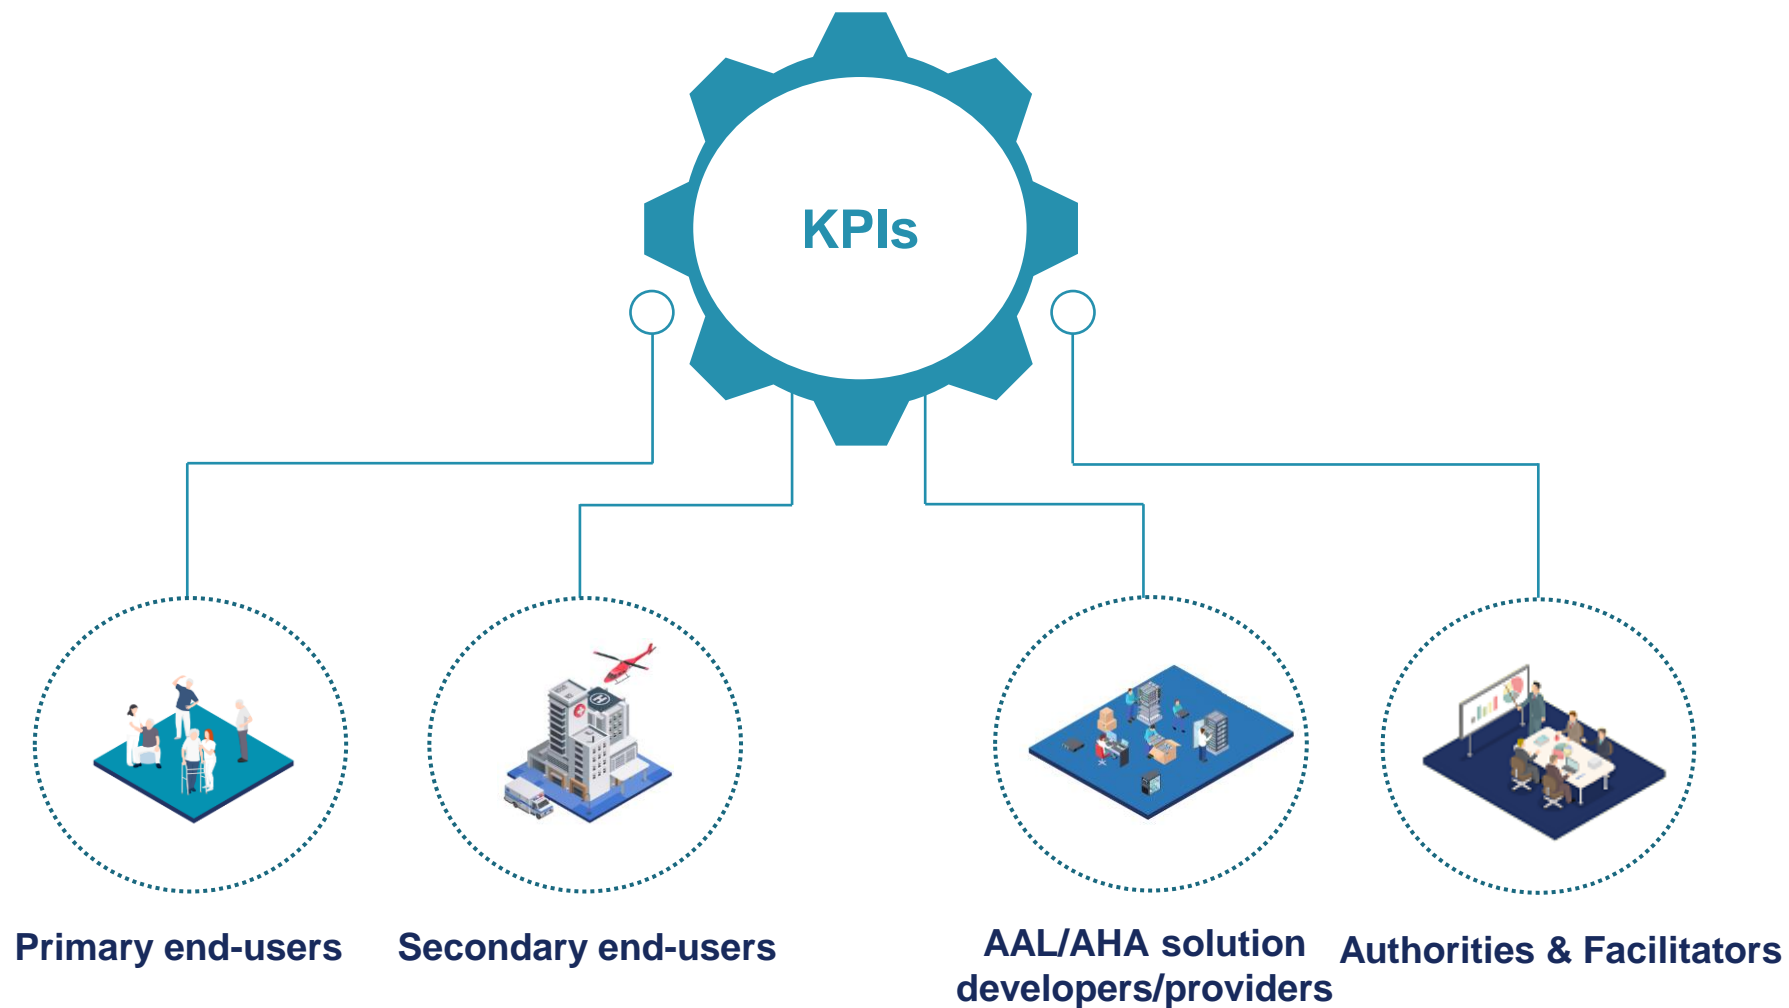

Projects in AHA and AAL Domains:			
1. ACTIVAGE		10. m-power	
2. Amigo		11. OASIS	
3. AmiVital		12. PERSONA	
4. BeyondSilos		13. REACH2020	
5. EKOSMART		14. ReAAL	
6. FIWARE		15. SOPRANO	
7. GIRAFFplus		16. UNCAP	
8. inLIFE		17. universAAL	
9. interiot		18. VAALID	

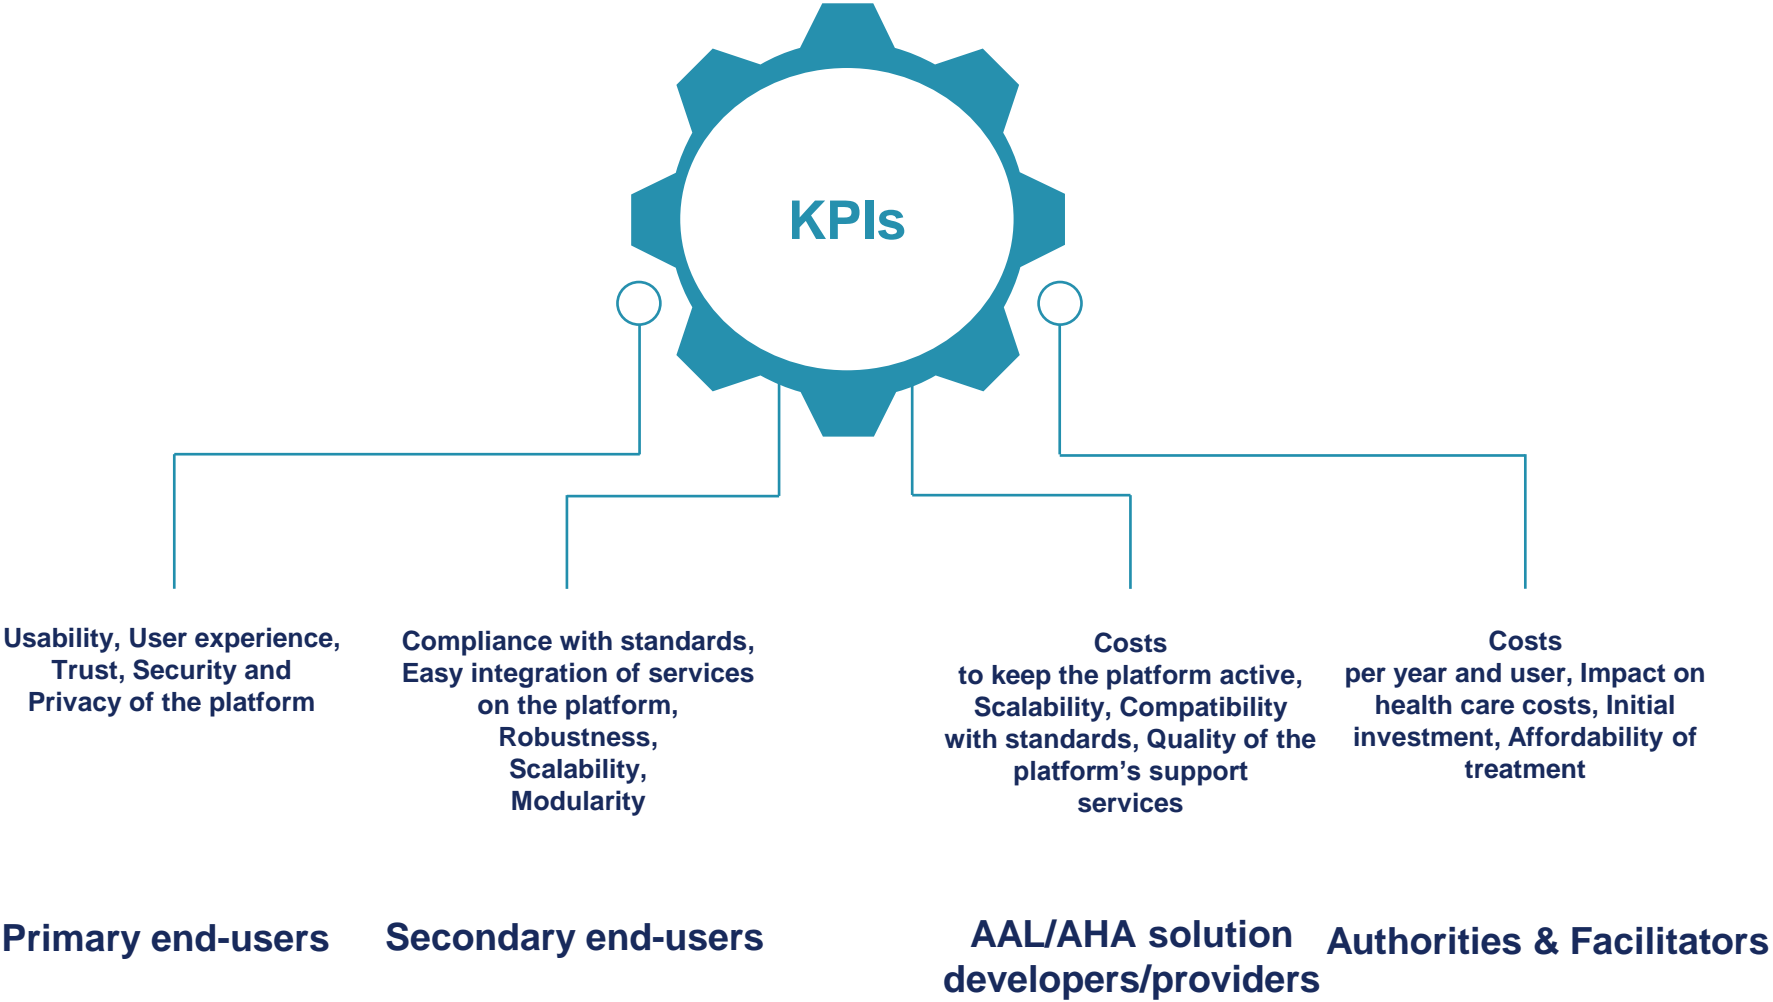

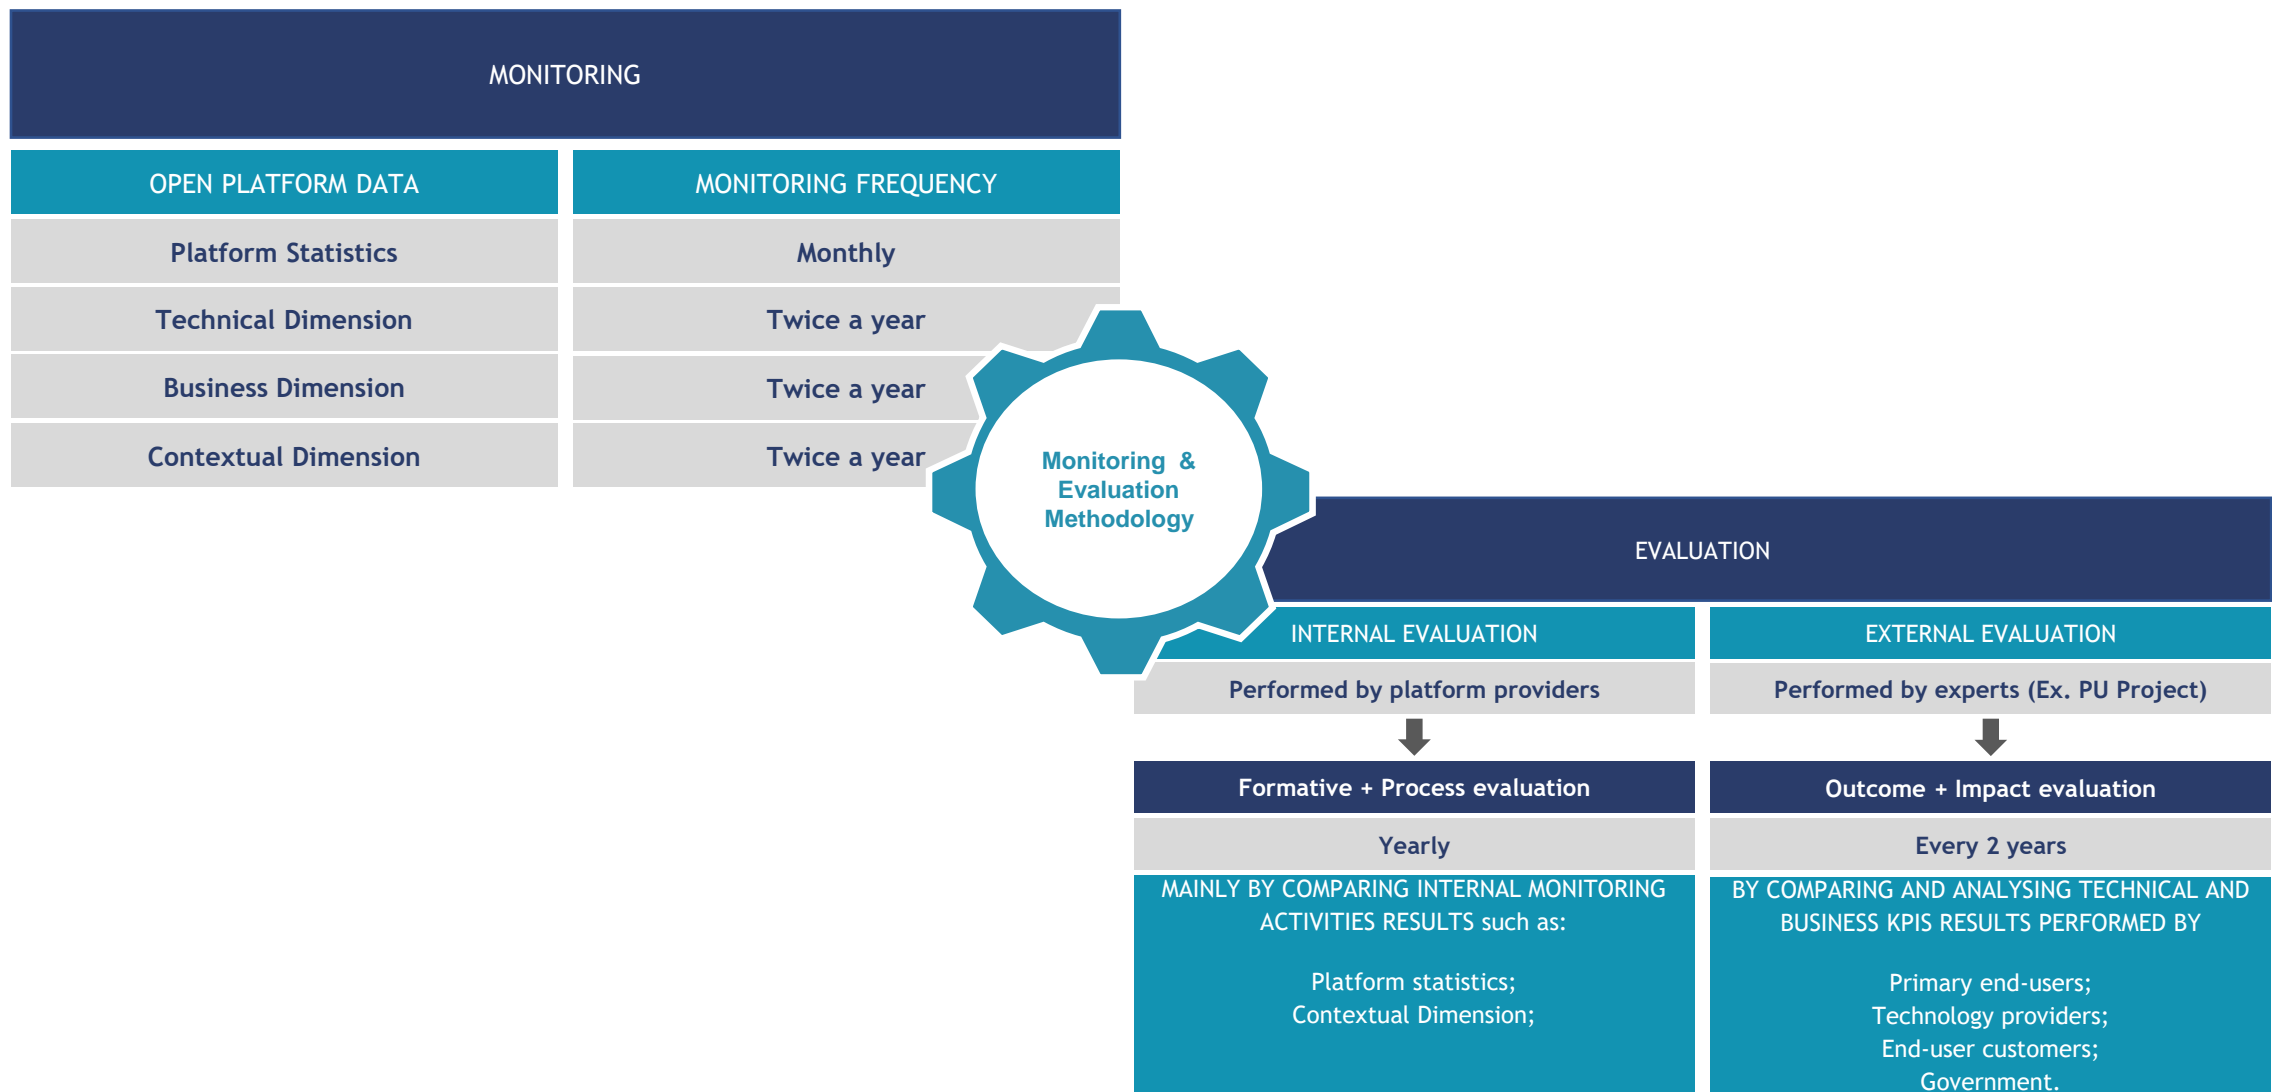

Main platforms under consideration and subject of analysis in PlatformUptake.eu

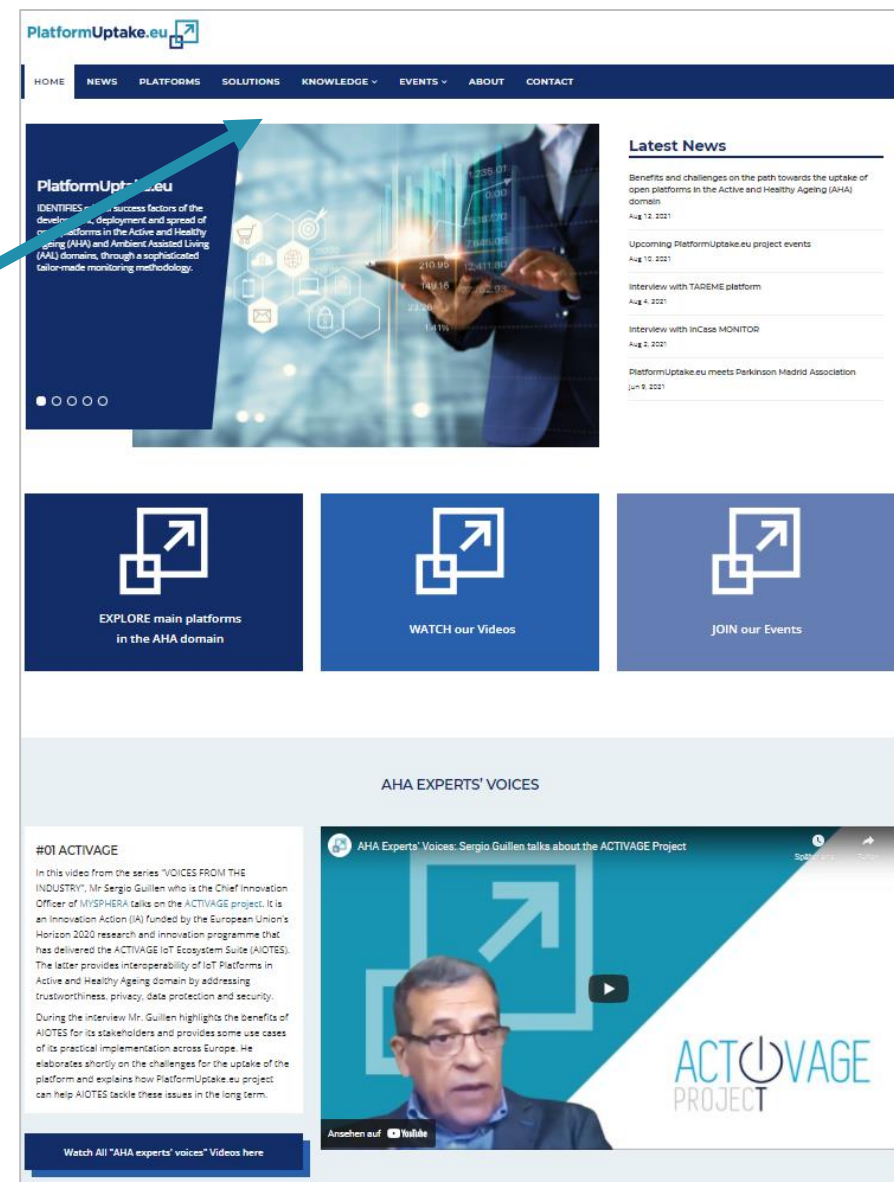

- AIOTES (ACTIVAGE)
- FiWare
- universAAL
- UNCAP
- onesait
- EkoSmart
- sensiNact
- Reach2020

AHA EXPERTS' VOICES

#IoT ACTIVAGE

In this video from the series "VOICES FROM THE INDUSTRY", Mr Sergio Guillen who is the Chief Innovation Officer of MYSPHERA talks about the ACTIVAGE project. It is an Innovation Action (IA) funded by the European Union's Horizon 2020 research and innovation programme that has delivered the ACTIVAGE IoT Ecosystem Suite (AIOTES). The latter provides interoperability of IoT Platforms in Active and Healthy Ageing domain by addressing trustworthiness, privacy, data protection and security.

During the interview Mr. Guillen highlights the benefits of AIOTES for its stakeholders and provides some use cases of its practical implementation across Europe. He elaborates shortly on the challenges for the uptake of the platform and explains how PlatformUptake.eu project can help AIOTES tackle these issues in the long term.

Submission form for open platforms in the AHA/AAL domains

and their contribution for the creation of open market for digital solutions for AHA, and specifically also working with definitions provided by the [Apperta Foundation](#) and [universAAL IoT](#), the project consortium defines an open platform for the AHA domain as follows:

An open platform is a software system that allows the many-to-many substitutability between applications, services and devices from multiple vendors via common APIs for the benefit of an individual user whatever her/his role is (older person, carer, social worker, care worker, governmental representative, technology developer etc.). It is an open digital ecosystem that connects the individual users to health or social care provisions, to lifestyle and prevention applications and home technology to support their independent living, healthy lifestyles and participation in society.

Please, submit your information below, and indicate which of the criteria apply to your platform.

Name of the platform*

Business Overview

The presented business information uses text from various parts of the FIWARE website.

In terms of key partners, there are more than 325 partners involved with the FIWARE Foundation, which range from Platinum members (i.e., the core FIWARE Foundation members), Gold members, Gold strategic end users and associates. Apart from the above partners, there are also some institutional, community and media partners listed as key partners of the FIWARE Foundation. The FIWARE Community further comprises all individuals and organizations contributing towards achieving the FIWARE Mission. The FIWARE Community is not only formed by contributors to the technology (the Open Source Community working on the FIWARE platform), but also those who contribute in building the FIWARE ecosystem and making it sustainable over time. The FIWARE website provides a full list of members.

There are five (5) key activities of the FIWARE Foundation:

- To empower the developers to bring best-of-breed tools to write great code, manage the development process and benefit from quality validation processes, and users to access great software easing the development of new solutions, making the best use of the, being able to provide feedback and benefit from large-scale testing facilities, and companies and other organizations (who are FIWARE Foundation members) to organize all sorts of events, information, discussions and other activities and resources.
- To promote the new technologies integrated in FIWARE, fostering their adoption as de-facto standards, the developers producing such new technologies, the offering built with or around FIWARE Technologies, the users of the FIWARE Technologies who build such offerings, the FIWARE ecosystem as a catalyst for economic opportunities.
- To augment increasing interfaces for connectivity, consolidating or promoting standards, increasing use cases for new application domains.
- To protect the FIWARE trademark, the compliance with the FIWARE Code of Conduct, FIWARE Technologies by ensuring they remain available as Open Source, the openness, meritocracy and transparency which guides the decision making.
- To validate the labelling qualifying the Quality Assurance of the FIWARE Technologies, organizations that own the expertise to validate "Powered by FIWARE" solutions, "FIWARE IoT-ready" devices or people/organizations capable to provide FIWARE development, integration, training and consulting services.

Description

RAY is an all-inclusive, mobile-centered, integrated cloud service that provides an easy-to-use, and cost-saving solution – perfectly adapted for the needs of visually impaired people, and serving a market segment of about \$9 billion annually. This disruptive solution, together with a successful launch in Israel that already afforded great lifestyle improvement for close to 4000 blind people, has helped the creators gain a deeper insight and more valuable understanding of the market, its requirements and the opportunities it brings. The Israeli mobile carriers give RAY to any legally blind person for free, and, in turn, sell it to other people with vision impairment.

Licence: Free for 30 days;

\$9.99 a month in-app purchase

\$299.99 lifetime license

Business Partners: Tracfone (USA), Sprint (USA), LS&S (USA), Lighthouse Guild NYC (USA), National federation for the blind (USA), Blind veteran association (USA), Perkins school for the blind (USA), Swiss Association for the blind (CH), Hungarian Association for the blind (HU)

Benefits

- Easy-to-use, and cost-saving solution– perfectly adapted for the needs of visually impaired people.
- The cost of operation is significantly lower than alternative solutions.
- World's first cell phone for visually impaired blind.
- Uses advanced cellular mobile technologies for intuitive eye-free interface.

Impressions

Project Ray Final

Ray Vision works with user voice commands too.

Membership

Business Overview

The presented business information uses text from various parts of the FIWARE website. In terms of key partners, there are more than 325 partners involved with the FIWARE Foundation, which range from Platinum members (i.e., the core FIWARE Foundation members), Gold members, Gold strategic end users and associates. Apart from the above partners, there are also some institutional, community and media partners listed as key partners of the FIWARE Foundation. The FIWARE Community further comprises all individuals and organizations contributing towards achieving the FIWARE Mission. The FIWARE Community is not only formed by contributors to the technology (the Open Source Community working on the FIWARE platform), but also those who contribute in building the FIWARE ecosystem and making it sustainable over time. The FIWARE website provides a full list of members.

There are five (5) key activities of the FIWARE Foundation:

To empower the developers to bring best-of-breed tools to write great code, manage the development process and benefit from quality validation processes, and users to access great software easing the development of new solutions, making the best use of the, being able to provide feedback and benefit from large-scale testing facilities, and companies and other organizations (who are FIWARE Foundation members) to organize all sorts of events, information, discussions and other activities and resources.

To promote the new technologies integrated in FIWARE, fostering their adoption as de-facto standards, the developers producing such new technologies, the offering built with or around FIWARE Technologies, the users of the FIWARE Technologies who build such offerings, the FIWARE ecosystem as a catalyst for economic opportunities.

To augment increasing interfaces for connectivity, consolidating or promoting standards, increasing use cases for new application domains

To protect the FIWARE trademark, the compliance with the FIWARE Code of Conduct, FIWARE Technologies by ensuring they remain available as Open Source, the openness, meritocracy and transparency which guides the decision making

To validate the labelling qualifying the Quality Assurance of the FIWARE Technologies, organizations that own the expertise to validate "Powered by FIWARE" solutions, "FIWARE IoT-ready" devices or people/organizations capable to provide FIWARE development, integration, training and consulting services.

ACTIVAGE

In this video from the series "VOICES FROM THE INDUSTRY", Mr. Sergio Guillen who is the Chief Innovation Officer of MYSPHERA talks on the ACTIVAGE project. It is an Innovation Action (IA) funded by the European Union's Horizon 2020 research and innovation programme that has delivered the ACTIVAGE IoT Ecosystem Suite (AIOTES). The latter provides interoperability of IoT Platforms in Active and Healthy Ageing domain by addressing trustworthiness, privacy, data protection and security.

During the interview Mr. Guillen highlights the benefits of AIOTES for its stakeholders and provides some use cases of its practical implementation across Europe. He elaborates shortly on the challenges for the uptake of the platform and explains how PlatformUptake.eu project can help AIOTES tackle these issues in the long term.

AHA Experts' Voices: Sergio Guillen

20 video interviews with AHA experts on benefits of open platforms, success and hindrance factors for their broad uptake

More to come...

FIWARE

In this video from the series "AHA experts' Voices", Mr. Ulrich Ahle, who is the Chief Executive Officer of FIWARE Foundation, presents FIWARE as an open-source technology based among others on open-source building blocks, APIs for interfaces and references for architectures in different domains. FIWARE technology is used in several main areas such as: smart cities, Industry 4.0, smart energy, smart agri-food and smart health.

According to Mr. Ahle the end users of the technology benefit through its free and timely unlimited availability, standard API and standard data modules which consequently limit the vendor lock-in. Currently there are approximately 10.000 members of the community around the globe who develop, maintain and enhance FIWARE technology and make it possible for the end users to use it with the lowest possible operational costs.

AHA Experts' Voices: Ulrich Ahle talks about FIWARE as an open-source technology

16.11.2021 10:00 – 14:30 AM CET

The PlatformUptake.eu consortium is organizing a webinar to set the stage for the planned matchmaking activities which will take place within the coming months. To achieve this PlatformUptake.eu will invite representatives of each project's stakeholder group and offer them the opportunity to present gaps and innovation needs in the field, technology developments and potential of open platforms for the establishment of open market for digital solutions for active and healthy ageing. The event will continue with short presentation on related EU projects which have contributed to the state of the art or are currently seeking to upscale the services of open platforms in AHA and AAL domains. As a culmination of the webinar a panel discussion with the presenters will be held.

Event Programme

Time	Topic	Presenter
10:00 - 10:10	Introduction to the webinar and expected results	SYNVO
10:05 - 10:30	Open platforms in the AHA and AAL domains - ecosystem, stakeholders, stakeholders' needs and requirements	LL
10:30 - 11:10	Secondary end users - needs and requirements for digital technology for active and healthy ageing	TBA
11:10 - 11:50	Authorities and facilitators - needs and requirements for digital technology for active and healthy ageing	TBA
11:50 - 12:00	Break	
12:00 - 12:40	Open platforms providers - current state of the art, benefits and uptake potential	TBA
12:40 - 13:20	AAL/AHA solution providers - current state of the art, needs and requirements for upscale of digital technology for active and healthy ageing	TBA
13:20 - 14:00	EU projects in the field of open platforms for AHA and AAL - current developments, objects and exploitation of results	TBA
14:00 - 14:20	Panel discussion on benefits of open platforms for the creation of open market for digital solutions and the benefits for all stakeholders involved in the ecosystem	LL
