SMARTHOMES

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Agenda

Times are only indicative

Time	Topic	Presenter
10:00 - 10:10	Welcome and introduction to the matchmaking event	Alexander Nikolov SYNYO GmbH, Austria
10:10 - 10:20	AAL Austria - organisation, goal, pilot regions, collaboration opportunities	Uli Waibel Director of AAL AUSTRIA
10:20 - 10:25	vCare	Kai Gand Technical University Dresden, Germany
10:25 - 10:30	Kinetikos Health	Cláudia Louro KINETIKOS – DRIVEN SOLUTIONS, Lda, Portugal
10:30 - 10:35	Corsano	Raúl Bennis Corsano Health B.V. , The Netherlands
10:35 - 10:40	Better@Home	Marten Wilke Better@Home Service GmbH, Germany
10:40 - 10:45	InCasa Smart Senior Living	Alejandro Cavaliere Incasanet Technologies SL, Spain
10:45 - 10:50	Comunicare Solutions	Brice Van Eeckhout Comunicare Solutions, Belgium
10:50 - 10:55	TheraForge	Marco Foschiano Hippocrates Technologies, Italy
10:55 - 11:00	FBK	Sara Testa Fondazione Bruno Kessler, Italy
11:00 - 11:05	casenio	Ralf Hartmann casenio AG, Germany
11:05 - 11:10	Pharos Navigator	Serguei Golovanov GOLEM Integrated Microelectronics Solutions GMBH, Austria
11:10 - 11:15	NutriCare.Life	Bogdan Ivanov Smart EpiGenetX LLC, Romania

Agenda

Times are only indicative

Time	Topic	Presenter
11:15 - 11:20	mynavigo	Niko Lankinen Gavon, Finland
11:20 - 11:25	Büyük Ortadoğu Sağlık ve Eğitim Vakfı	Ercan KÜÇÜKARSLAN Bosev, Turkey
11:25 - 11:30	Fondazione Casa Sollievo della Sofferenza	Francesco Giuliani Istituto di Ricovero e Cura a Carattere Scientifico, Italy
11:30 - 11:35	Howdy Senior	Licia Ponno Comftech, Italy
11:35 - 11:40	Medi Whale	James Lim Mediwhale INC., Republic of Korea
11:40 - 11:45	Chemistry	Bas Berkhout Chemistry Team, The Netherlands
11:45 - 11:50	Project Ipsilon	Yayoi Sakaki Project Ipsilon, B.V., The Netherlands
11:50 - 11:55	Probando	Clara Puller Probando GmbH, Austria
11:55 - 12:00	Imaginary	Lucia Pannese Imaginary Srl, Italy
12:00 - 12:05	SciFY	Paul Isaris "SCIENCE FOR YOU" N.G.O. - SciFY, Greece

Agenda

Times are only indicative

Time	Topic	Presenter
12:05 - 12:10	Duervation	Mona Dür Duervation GmbH, Austria
12:10 - 12:15	OPEN DEI PROJECT	Giorgio Micheletti IDC, Italy
12:15 - 12:20	CRANE project	Jonathan Gómez-Raja FUNDESALUD, Spain
12:20 - 12:25	HAAL	Sara Casaccia and Henk Herman Nap Università Politecnica delle Marche, Italy and Vilans, The Netherlands
12:25 - 12:30	ValueMerge	Erengul Coskun ValueMerge, The Netherlands
12:30 - 12:35	Medea	Pietro Dionisio Medea S.r.l., Italy
12:35 - 12:40	Fundación Cibervoluntarios	Angel Sola Fundación Cibervoluntarios, Spain
12:40 - 12:45	ExactCure	Fabien Astic EXACTCURE, SAS, France
12:45 - 12:50	BRAINE Project	Sean Ahearne Dell Technologies Research Ireland
12:50 - 13:00	Discussion and conclusion	Frederic Lievens Lievens-Lanckman, Belgium

All participants are kindly invited to raise questions in the chat.

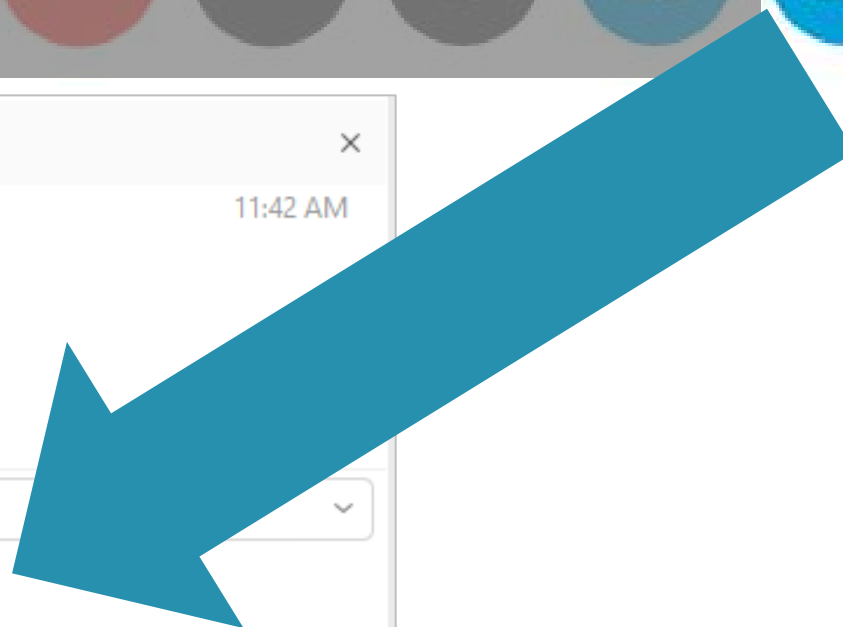

Chat

from Collabto Calls to everyone: 11:42 AM

Please include your questions here!

To: Everyone

Project Type: **Coordination and Support Action**

Project duration: **26 months (01/01/2020 – 28/02/2022)**

Person months: **172**

Partners: **12 from 10 countries**

Due to the persisting fragmentation of the active and healthy ageing market; and the lack of interoperability of the various solutions deployed or difficulties with the large scale uptake of the platforms by their targeted users, the aim of the PlatformUptake.eu project is to **observe, analyse and understand the whole ecosystem of open service platforms and their related networks**, and depict a picture describing the whole ecosystem with its **achievements and potentials**, targeting all user groups while also **generating synergies among platforms** and their **related projects** in the AHA and IoT domain.

Important

Matchmaking Events!

Involvement

Organisations from the **supply** and **demand** sides **get involved** in the **matchmaking process**.

Registration & upload of pitch

Interested organisations **register** for the events and **upload their pitch** decks on the Open Information Hub.

Pitch

Registered for the events **organisations make a pitch** to present their needs and offers.

Knowledge exchange & events

The **„couples“** which have participated in the matchmaking events and sent their pitch decks **get engaged**.

Networking Opportunities

PlatformUptake.eu Consortium

12 consortium organisations and connected networks (Universities, SMEs, End user organisations)

10+ Projects events

Matchmaking, MOOCs, Open Information Hub Tools, Capability gaps and Innovation needs and more

45+ Projects and initiatives

AHA, ALA, Health care, IoT etc.

Networks

IEEE, CEN, IN4AHA, IDIH, 50plus Hellas, SHAFE, Nerosubianco, EEN, NET4Age, ECHAlliance etc.

Locations

10 countries in Europe

AAL AUSTRIA Innovationsplattform für intelligente Assistenz im Alltag

AAL AUSTRIA: Innovation platform for smart assistance in everyday life

April 2022

Uli Waibel, Secretary General AAL AUSTRIA

AAL offers innovative solutions and services to enable people to stay independently and **in good quality of life in their usual living environments** for as long as possible.

„It's not about adding years to life, it's about **adding life to years.**“

Alexis Carrel

AAL offers support in a wide set of areas such as

- Health and care
- Safety and security
- Activities of daily life
- Social participation

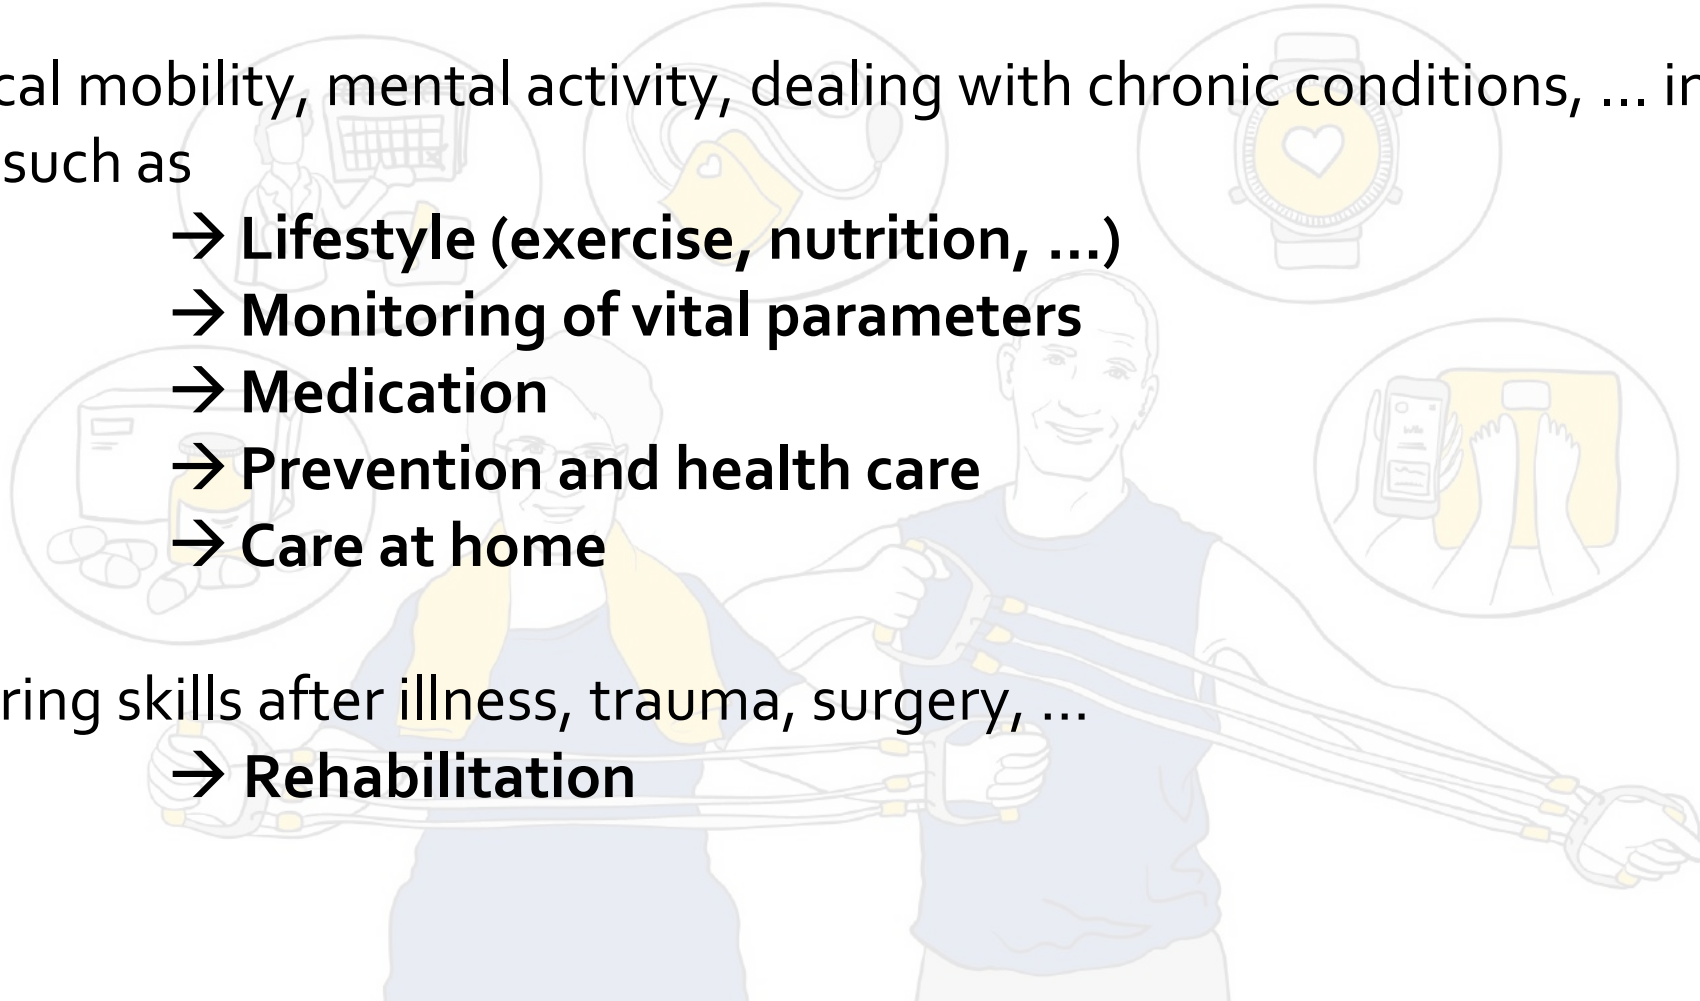

Physical mobility, mental activity, dealing with chronic conditions, ... in areas such as

- **Lifestyle (exercise, nutrition, ...)**
- **Monitoring of vital parameters**
- **Medication**
- **Prevention and health care**
- **Care at home**

Restoring skills after illness, trauma, surgery, ...

- **Rehabilitation**

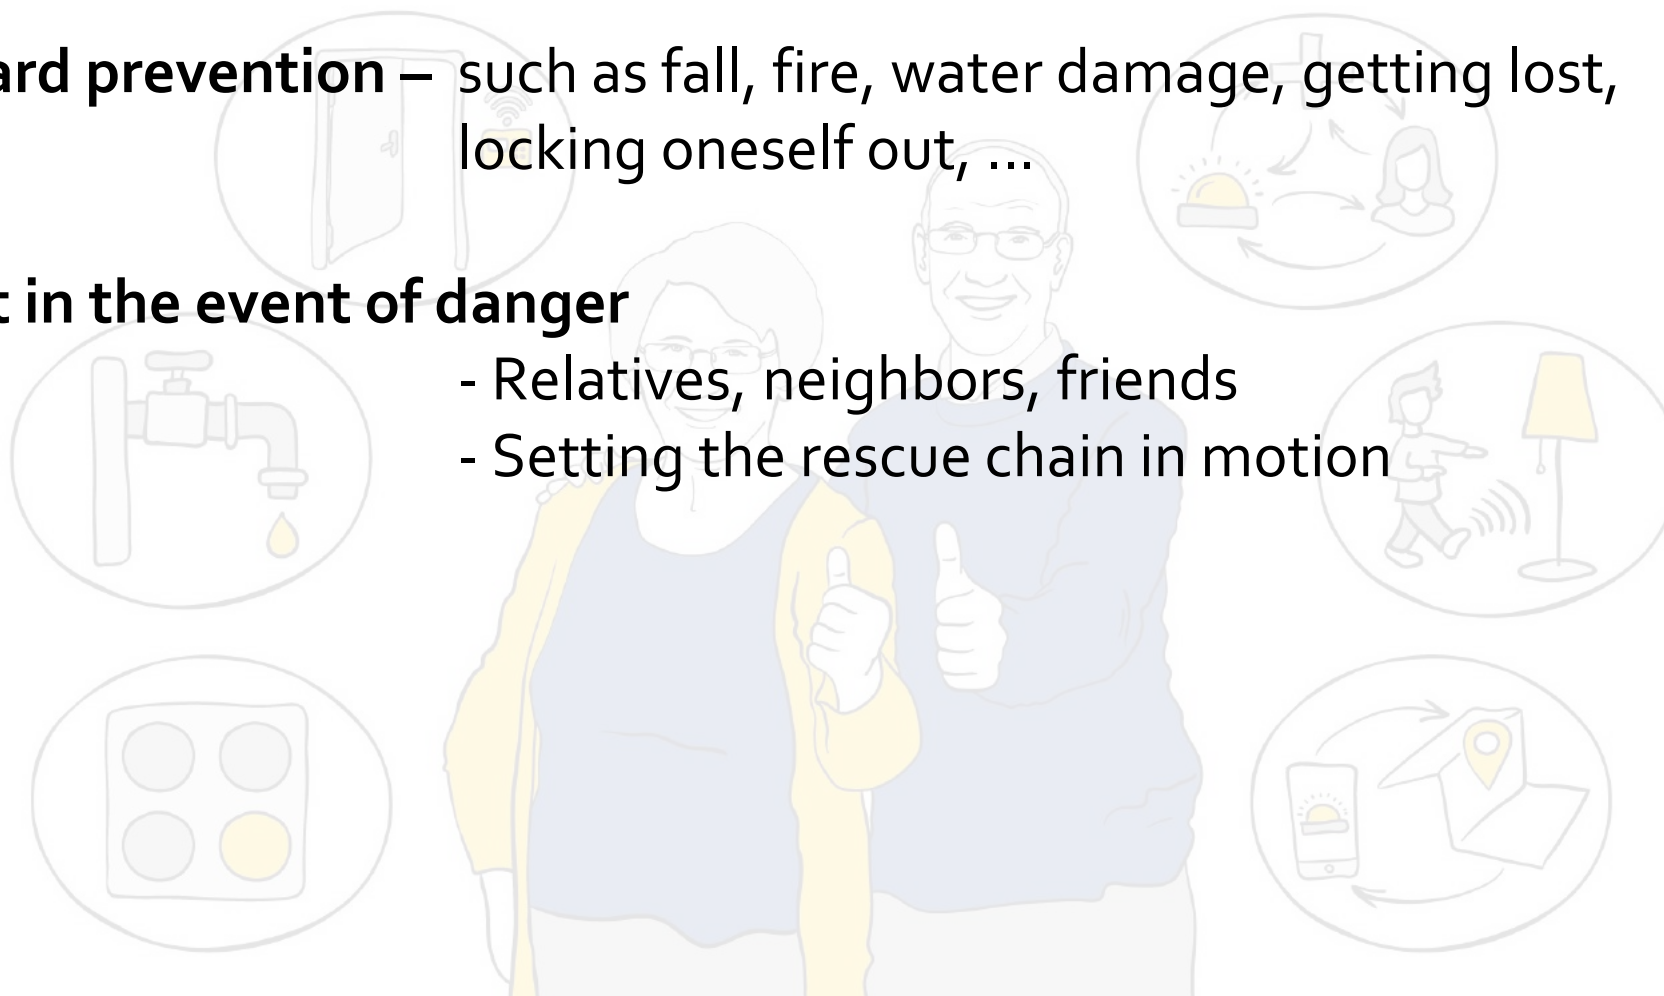

Hazard prevention – such as fall, fire, water damage, getting lost, locking oneself out, ...

Alert in the event of danger

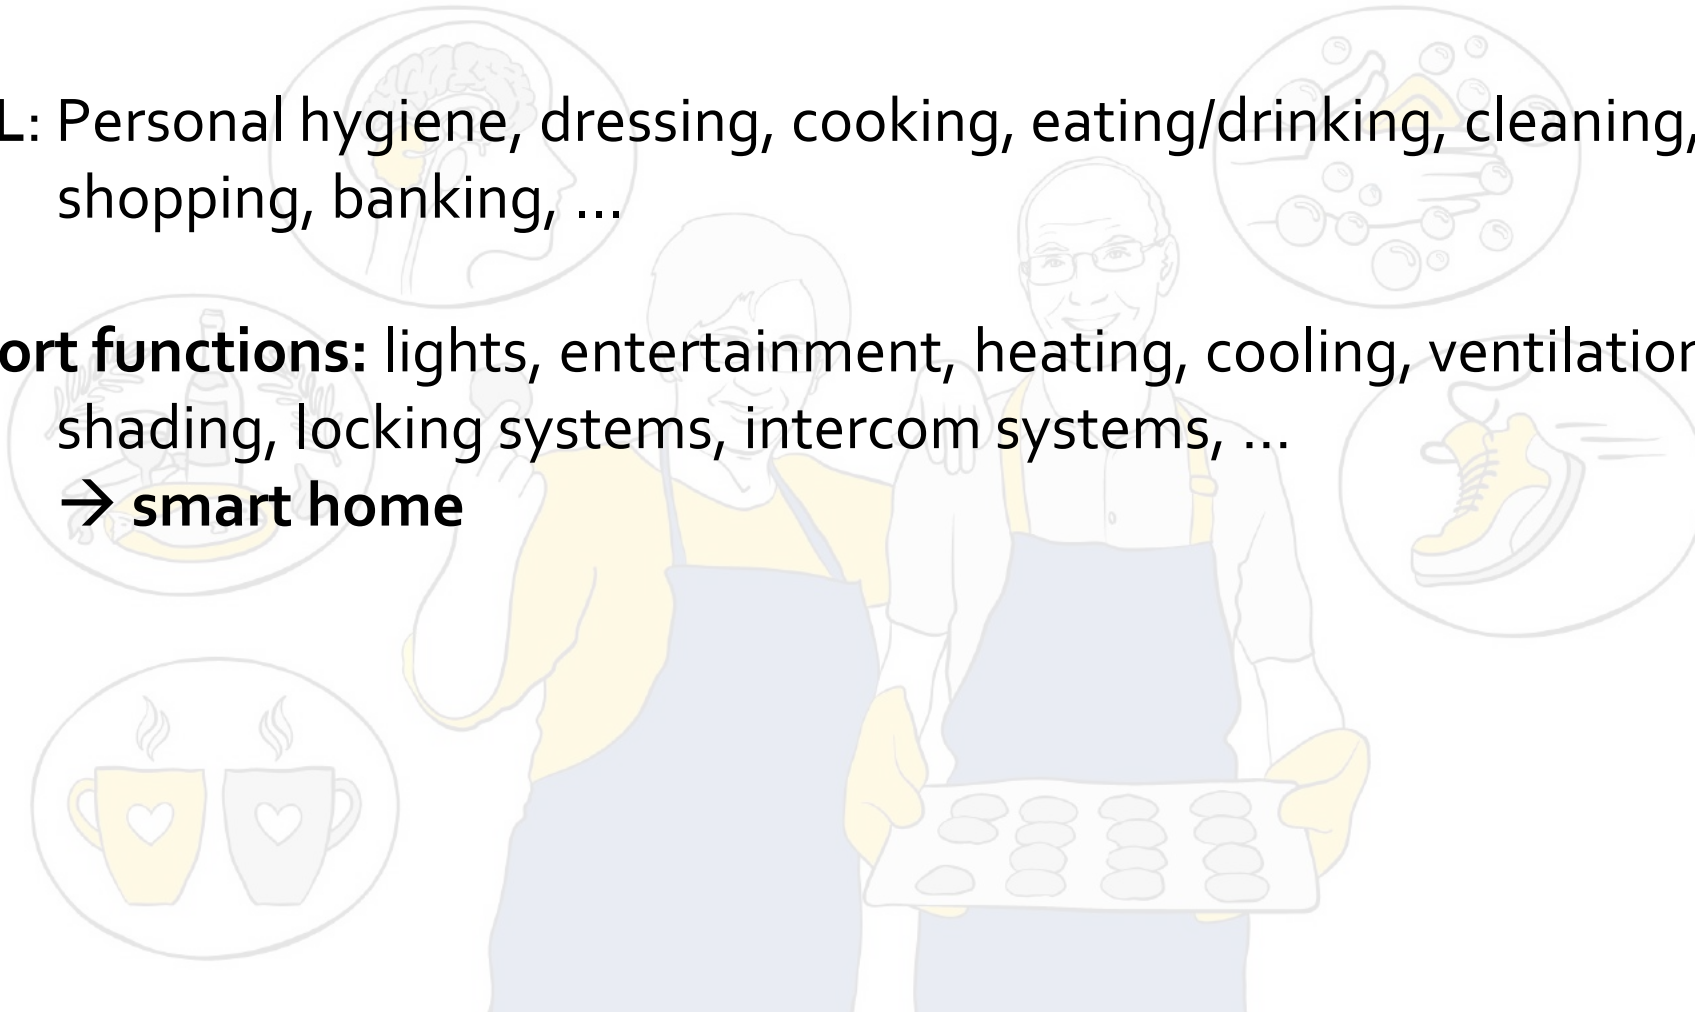

- Relatives, neighbors, friends
- Setting the rescue chain in motion

(I)ADL: Personal hygiene, dressing, cooking, eating/drinking, cleaning, shopping, banking, ...

Comfort functions: lights, entertainment, heating, cooling, ventilation, shading, locking systems, intercom systems, ...
→ **smart home**

Connectedness to family, friends, neighbors,...

→ emotional closeness, social exchange, ...

Access to events (culture, sports, religious services, ...)

→ local, regional, nationwide

Access to media

→ news, films, books, music, games, ...

- Establishing and extending an Austrian AAL community
- Improving the visibility of AAL technologies and solutions
- Bringing together stakeholders from different sectors

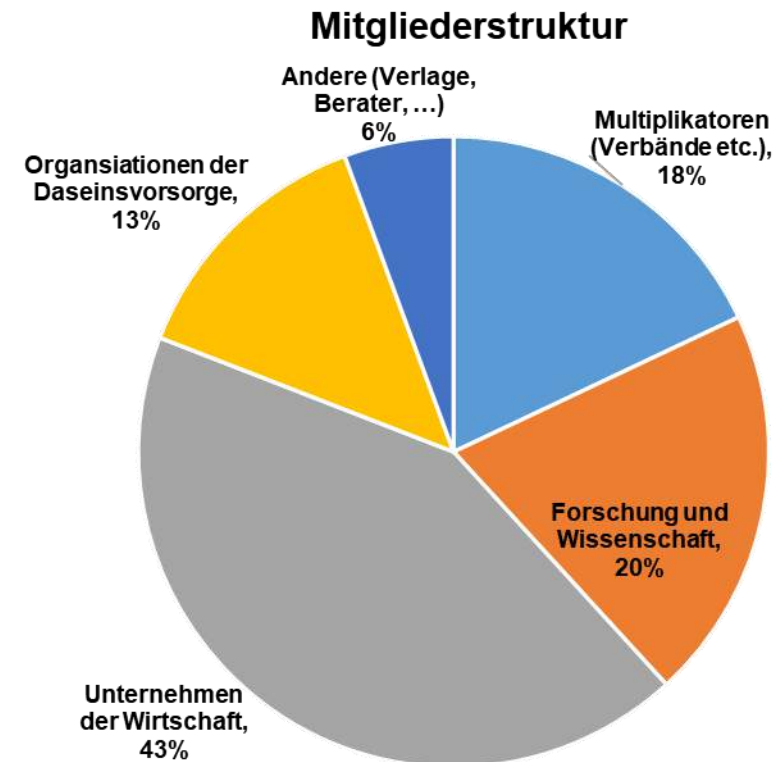

Who is AAL AUSTRIA?

Founded in 2012 as a non-profit organisation AAL AUSTRIA is lead by a board of 12 directors supported by a secretary office.

Currently we serve over 110 members from a wide variety of fields, such as

- Social service providers
- Science, research and development
- Product and solution providers

AAL Austria – first point of contact for AAL topics in Austria

- **Efficient exchange of information and experiences**
 - Platform website, newsletter, event calendar
 - Organisation and participation in relevant events
- **Fostering networking and cooperation** among the Austrian AAL community
 - AAL Austria working groups (e.g. project data base, ethical aspects)
 - Information exchange between pilot regions
 - AAL market and innovation workshops
- **Improving the image and visibility of AAL**
 - Annual event „Praxiskonferenz“
 - AAL Austria Success-Stories to promote successful implementations
 - Representing the AAL community in events, public consultations, ...

**Support us in shaping the AAL AUSTRIA
platform to ensure quality of life in ageing!**

Supported by

 **Bundesministerium**
Klimaschutz, Umwelt,
Energie, Mobilität,
Innovation und Technologie

Project *vCare* – Virtual Coaching Activities for Rehabilitation in Elderly

Kai Gand

Research Associate/Technische Universität Dresden, Germany

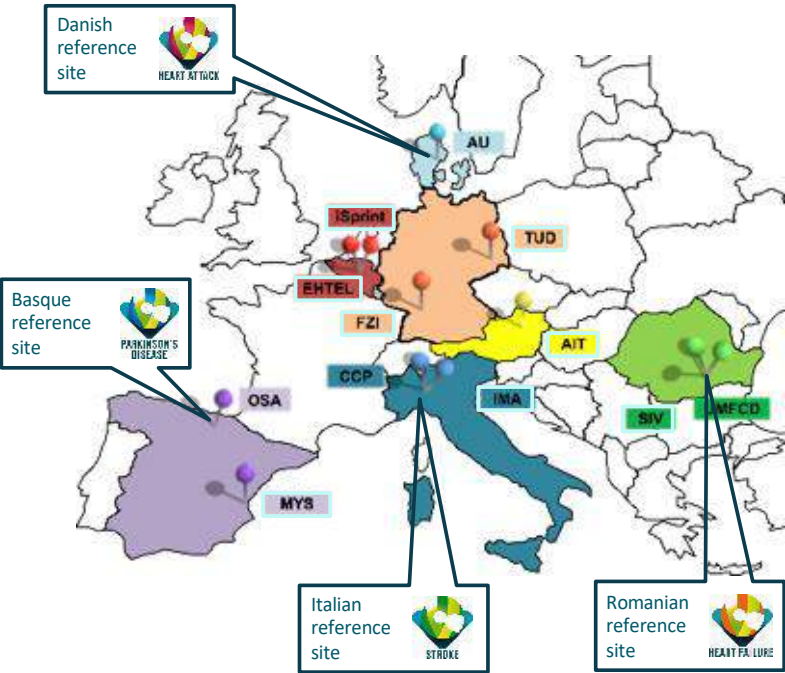

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

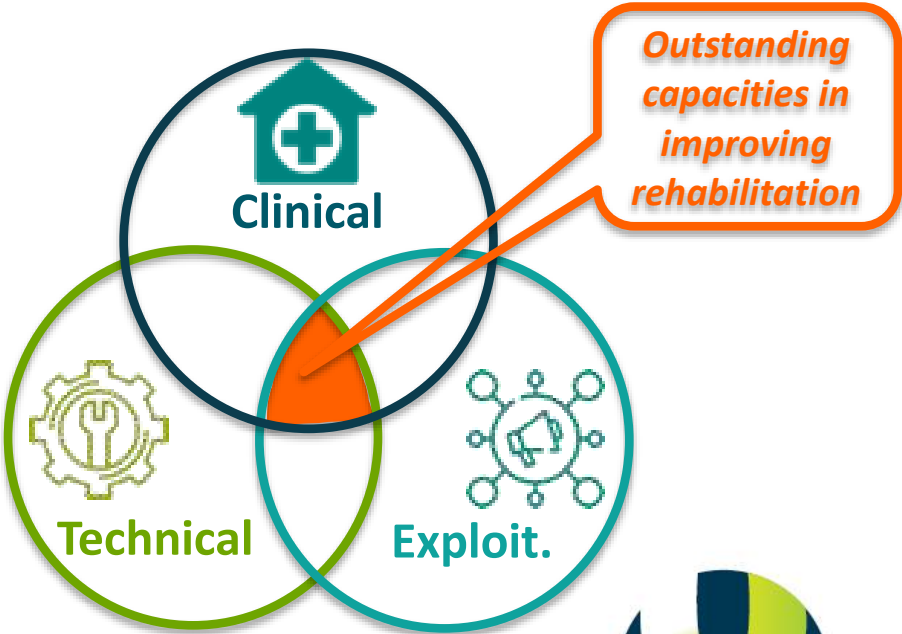

Description of the organisation

Who we are

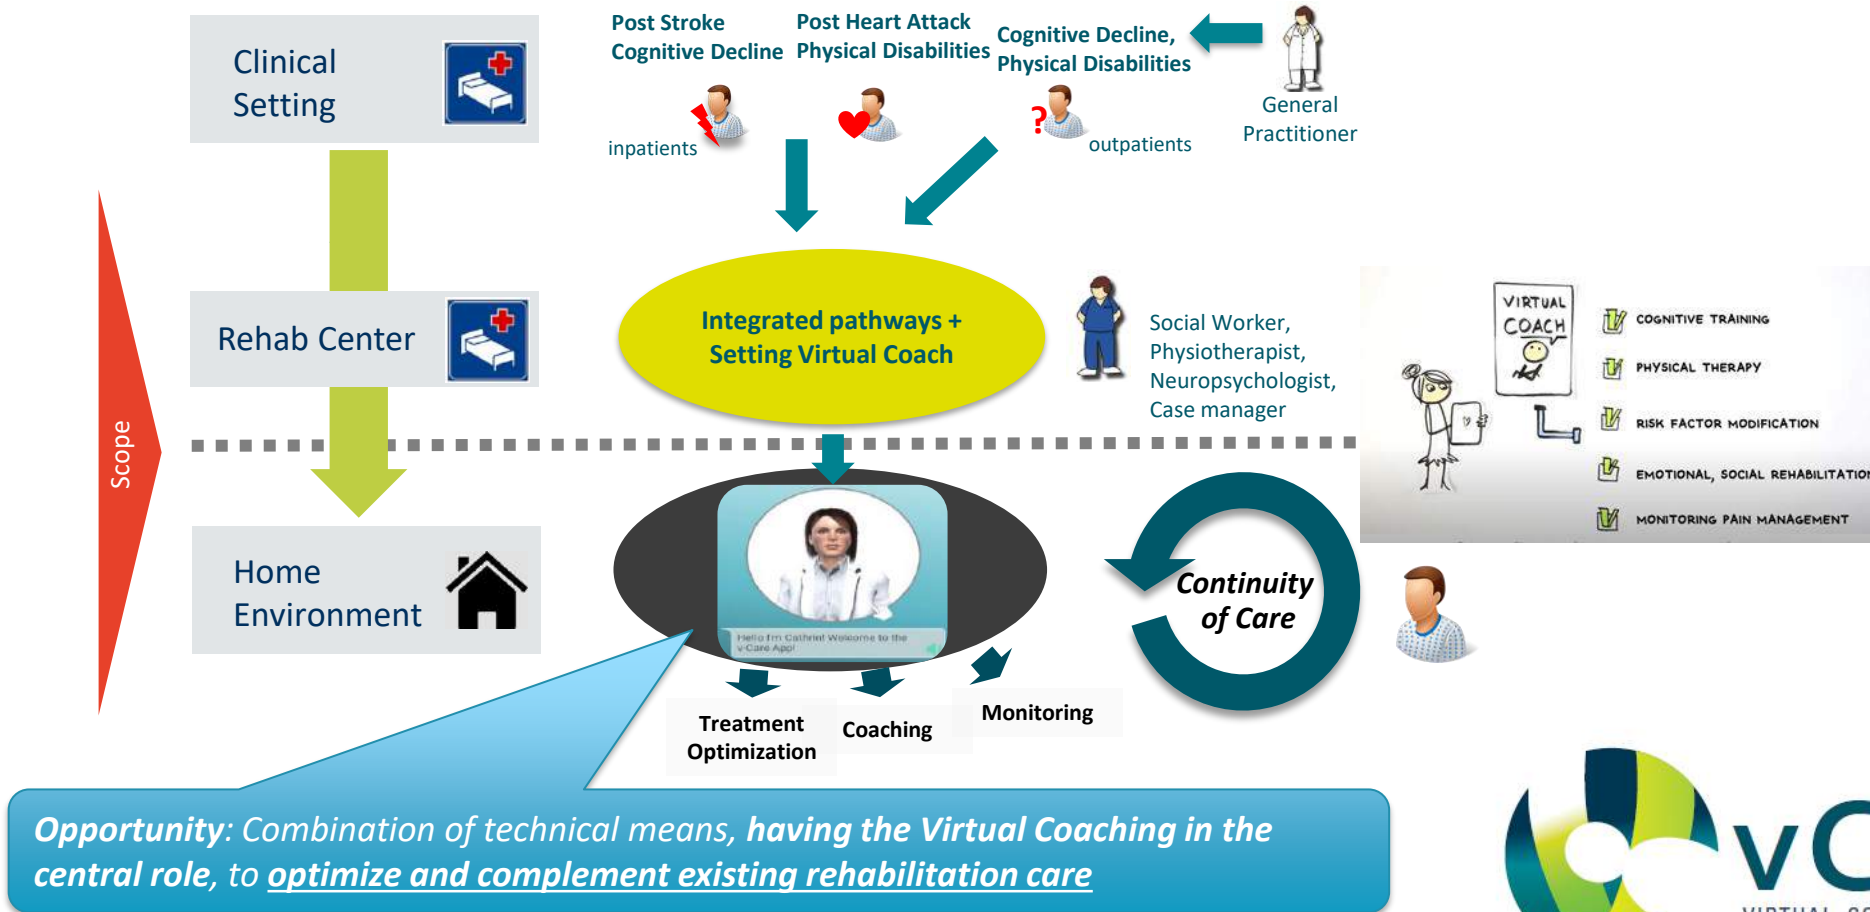

Broad European expertise of the project partners

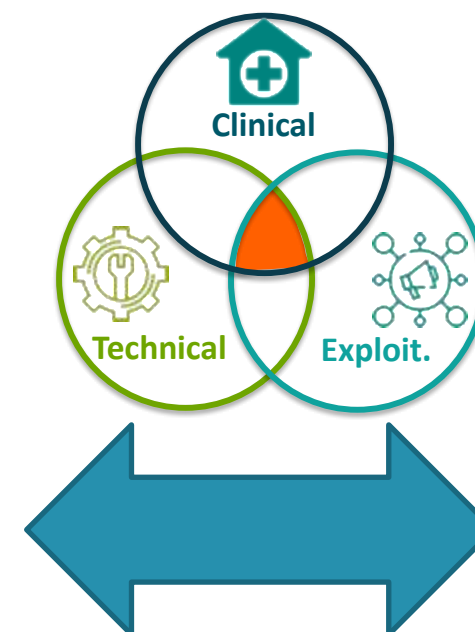

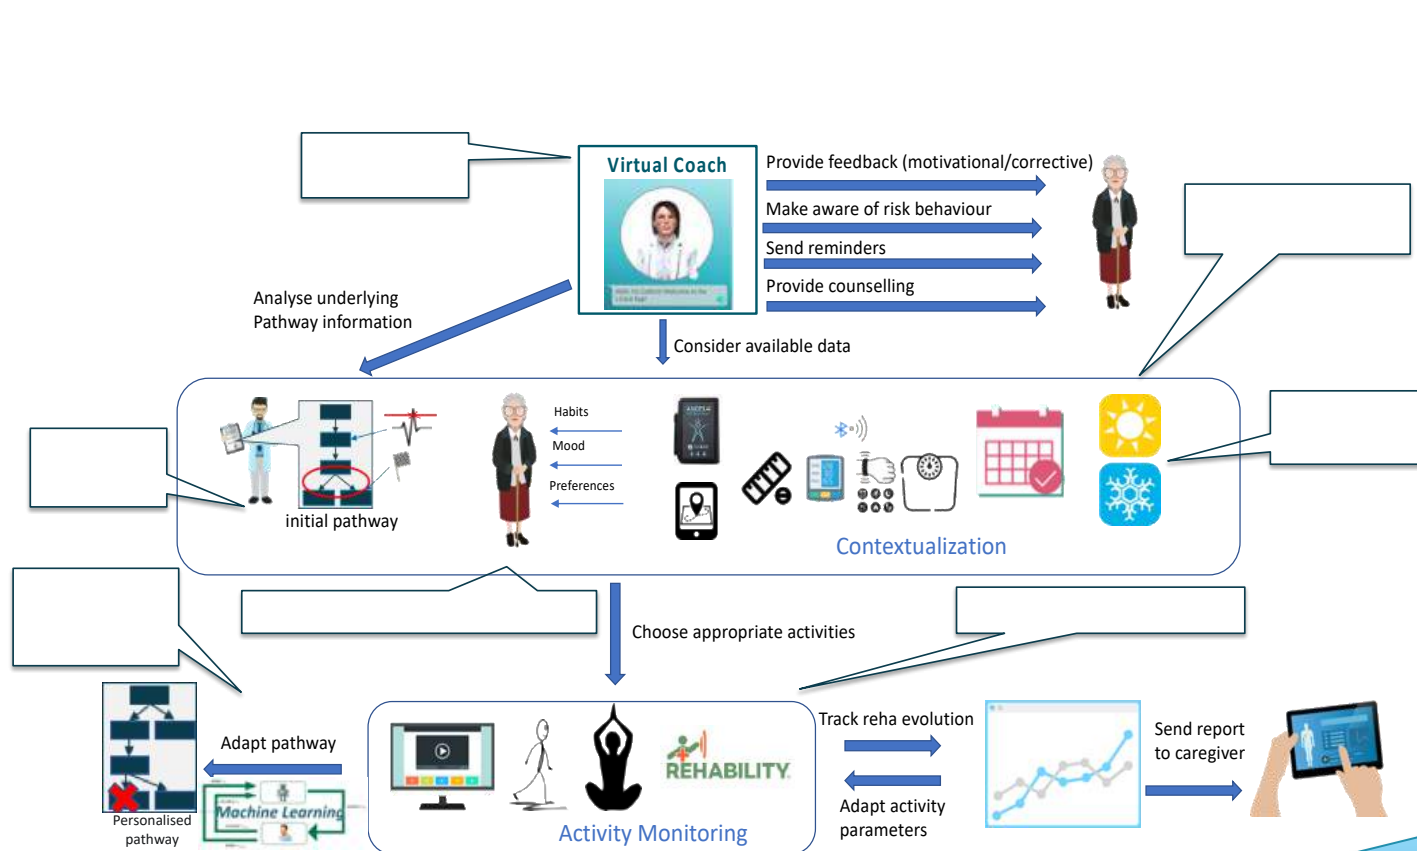

Cooperation idea

Solution we can provide

Expertise offer

Joint clinical and technical expertise

All based on clinical expertise, medical knowledge and procedural precepts / clinical pathways

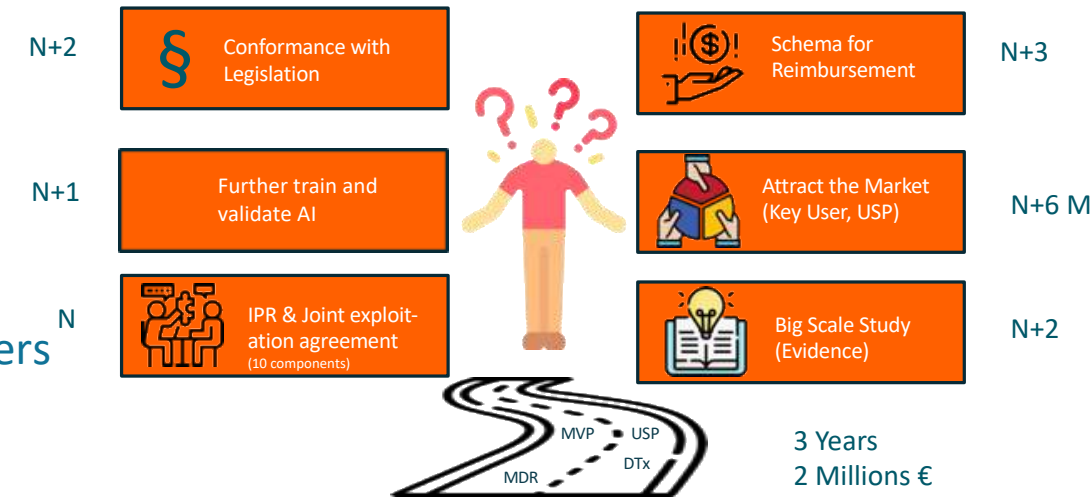

Opportunity: Share experiences from extensive joint design and evaluate stage with up to 80 patients with four different pathologies, from four European countries

Expertise request

What we would need

- **A financial investor and technological partners**
 - To further increase technical maturity of AI and improve usability
 - To conceptualise and conduct larger clinical trials (RCTs) to underpin the project solution's advantageousness
 - To operationalize the new MoU between key technical partners and contact points
- **Attract early adopters:** Hospitals and healthcare organisations which have placed innovation (and ICT innovation) at the core of their activity and are regularly testing new and possibly disruptive technologies
 - Advancing the clinical study by conducting further trials, including a larger RCT when maturing the solution
- **Search synergies with hospitalisation@home**

Kinetikos Health

Cláudia Louro

Grants Manager

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

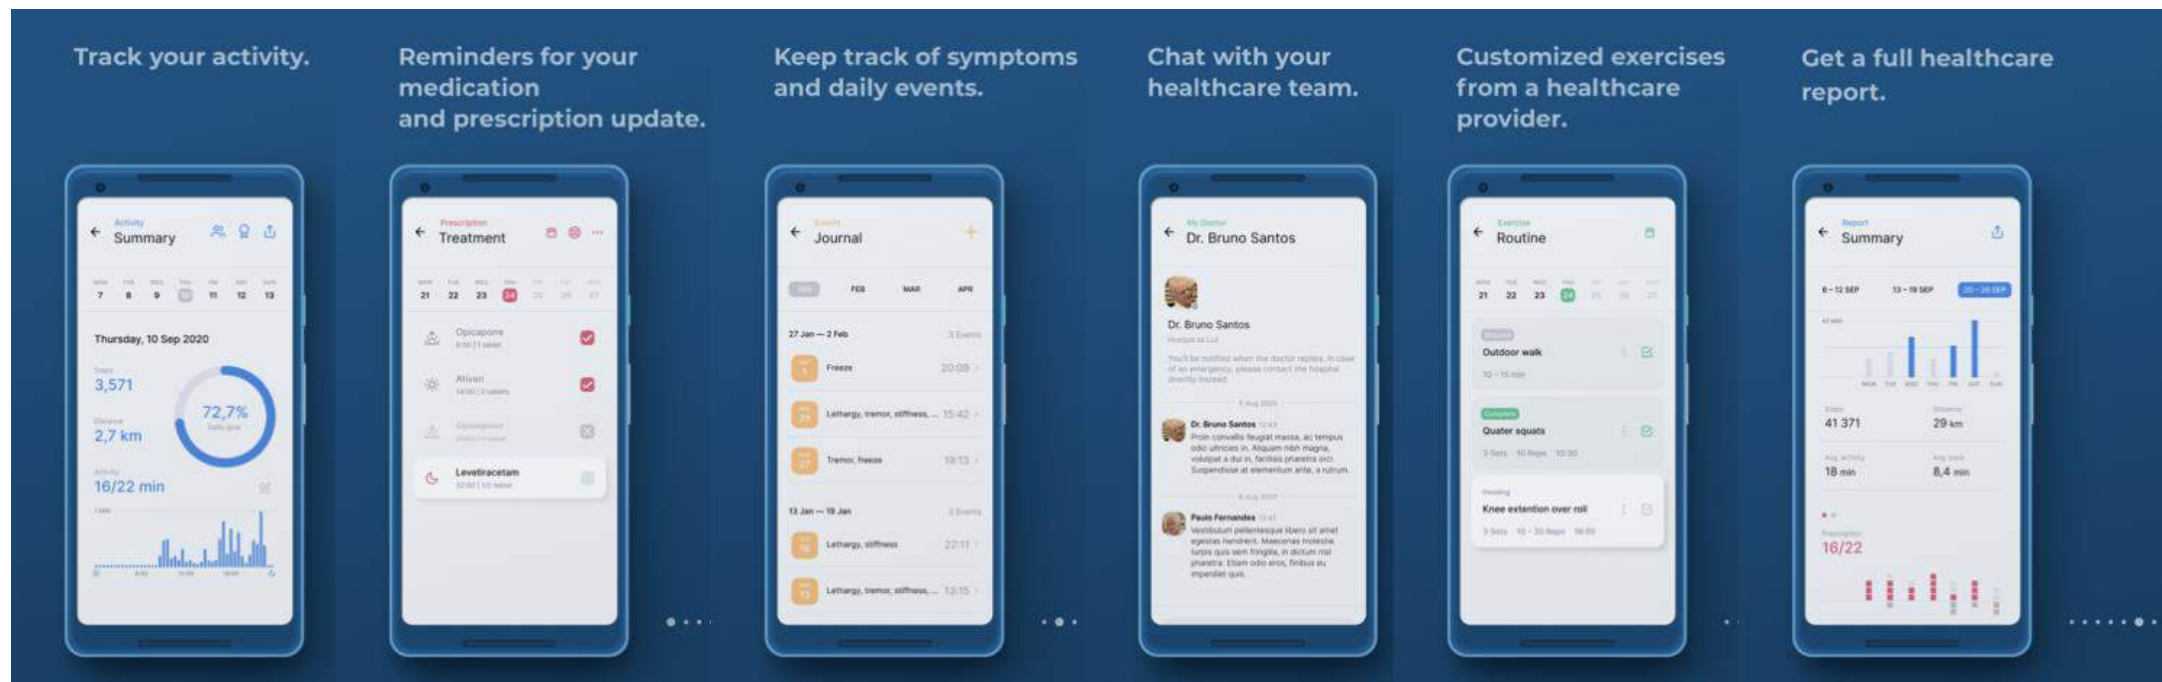

Kinetikos is a digital health company that aims to **improve citizens' quality of life** by instant **translation of citizen movement data into clinical insights**.

Kinetikos experience in innovation projects:

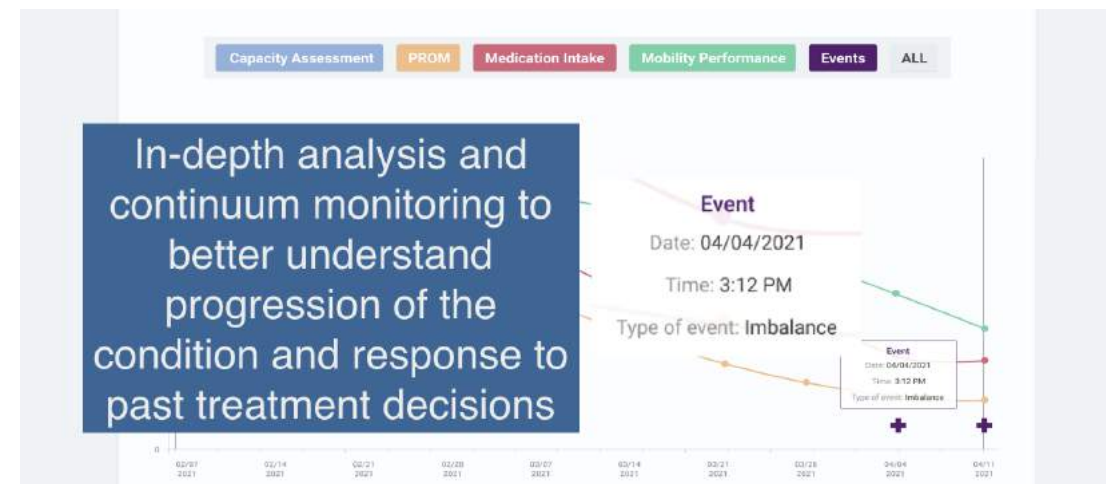

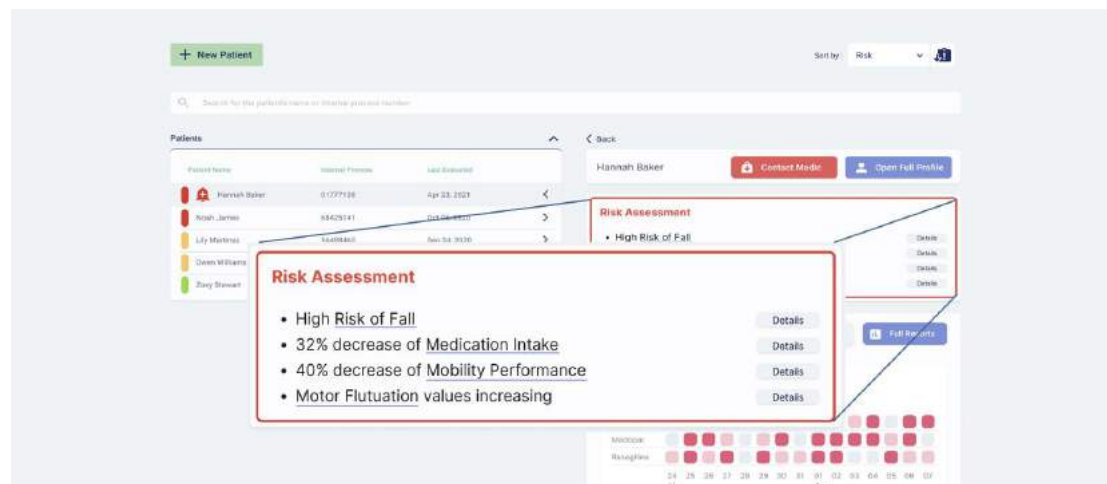

- **first and only Portuguese SME** to coordinate an H2020 project in the Societal Challenge 1 – Health, demographic change and wellbeing - **PROCare4Life**

Improve clinical outcomes and quality of life through a personalised continuum healthcare

Support clinical decision-making and prioritize patients (on-site and remotely) based on objective metrics

- ✓ **Cloud-base** solutions
- ✓ GDPR and HIPAA compliance
- ✓ **CE Marked Medical device**
- ✓ Gold Standard Validated - 2 lab studies
- ✓ ORCHA approved with 82% mark
- ✓ Available in IOS and Android

Reach us if you believe we can collaborate!

Raúl Bennis

Business Development Manager – **CORSANO HEALTH** – The Netherlands

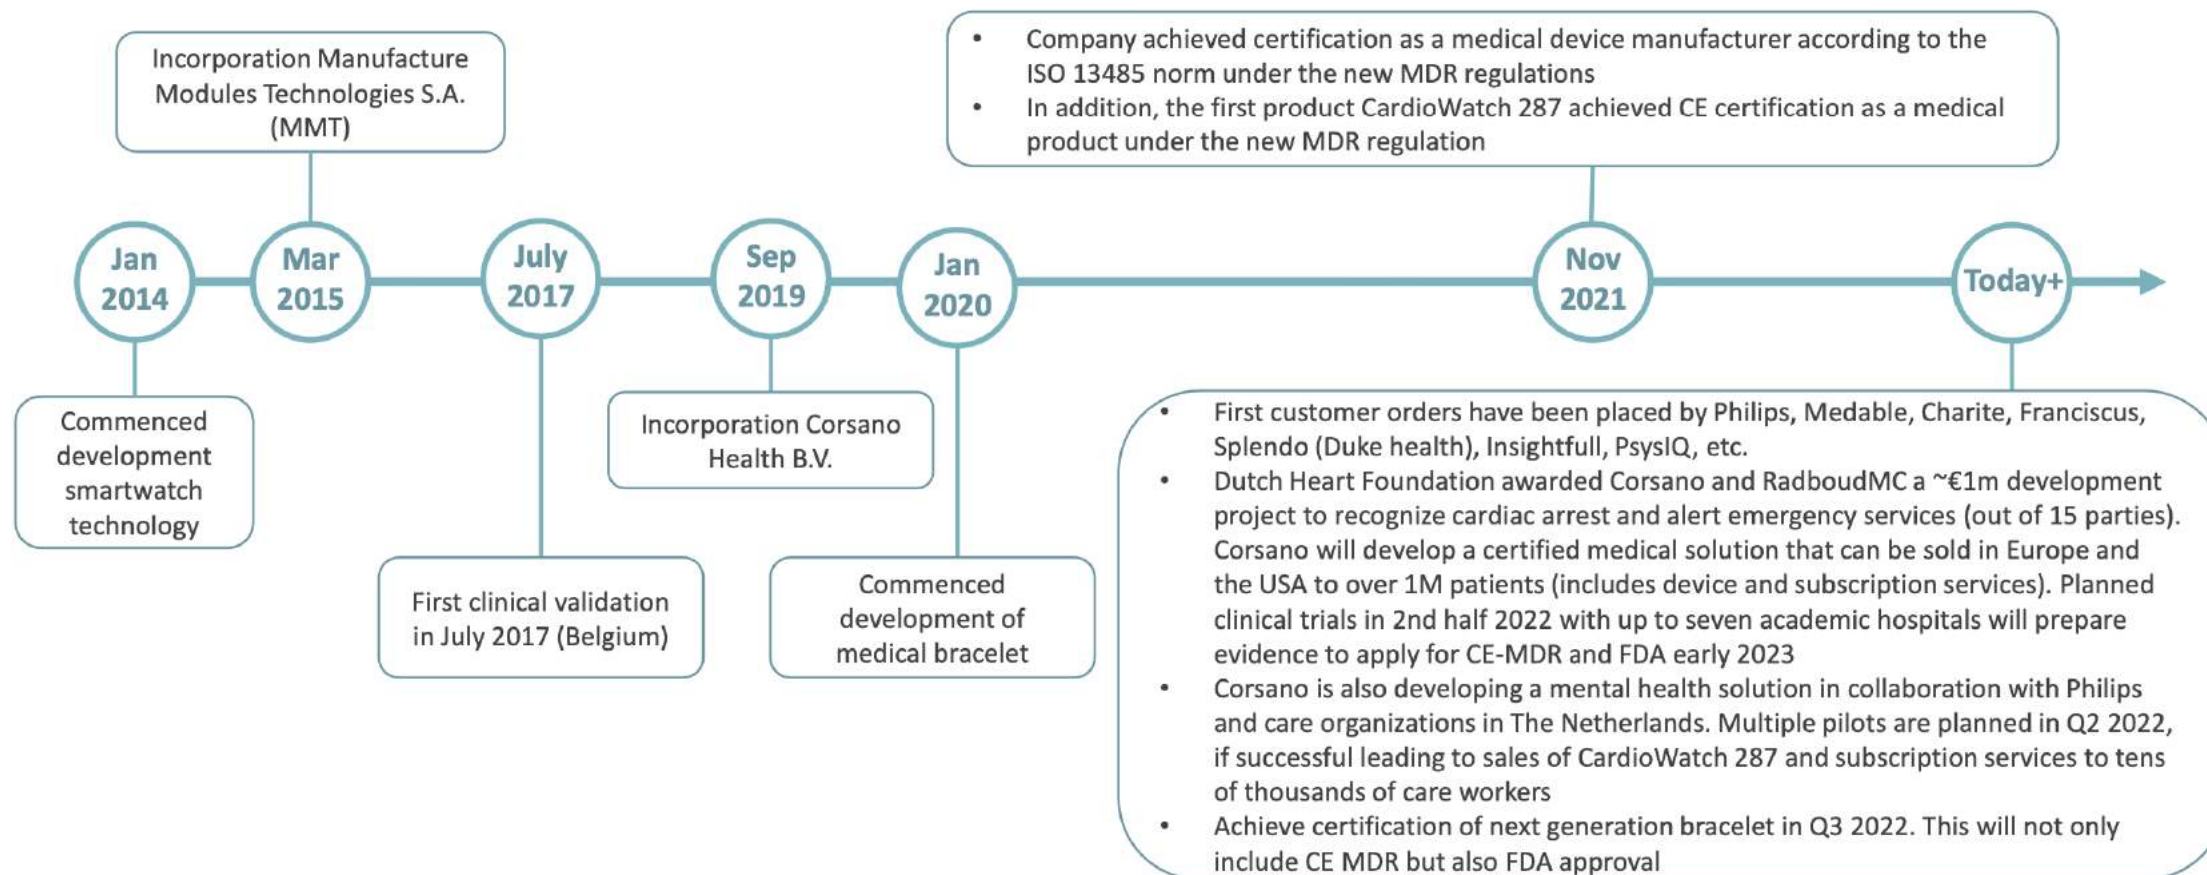

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

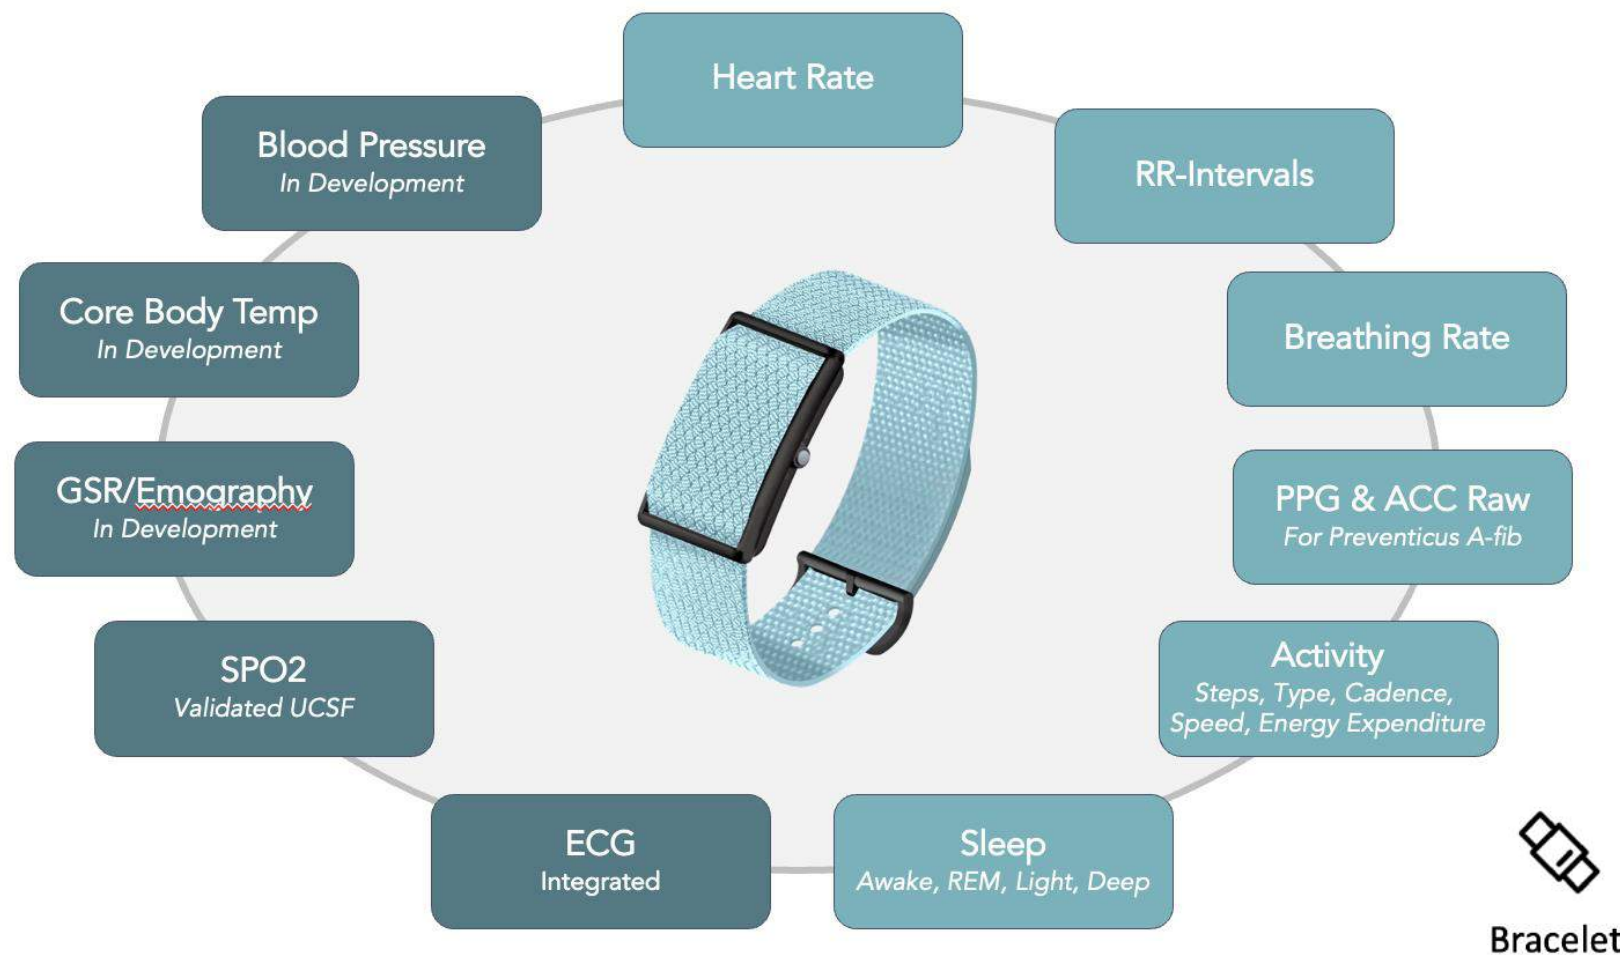

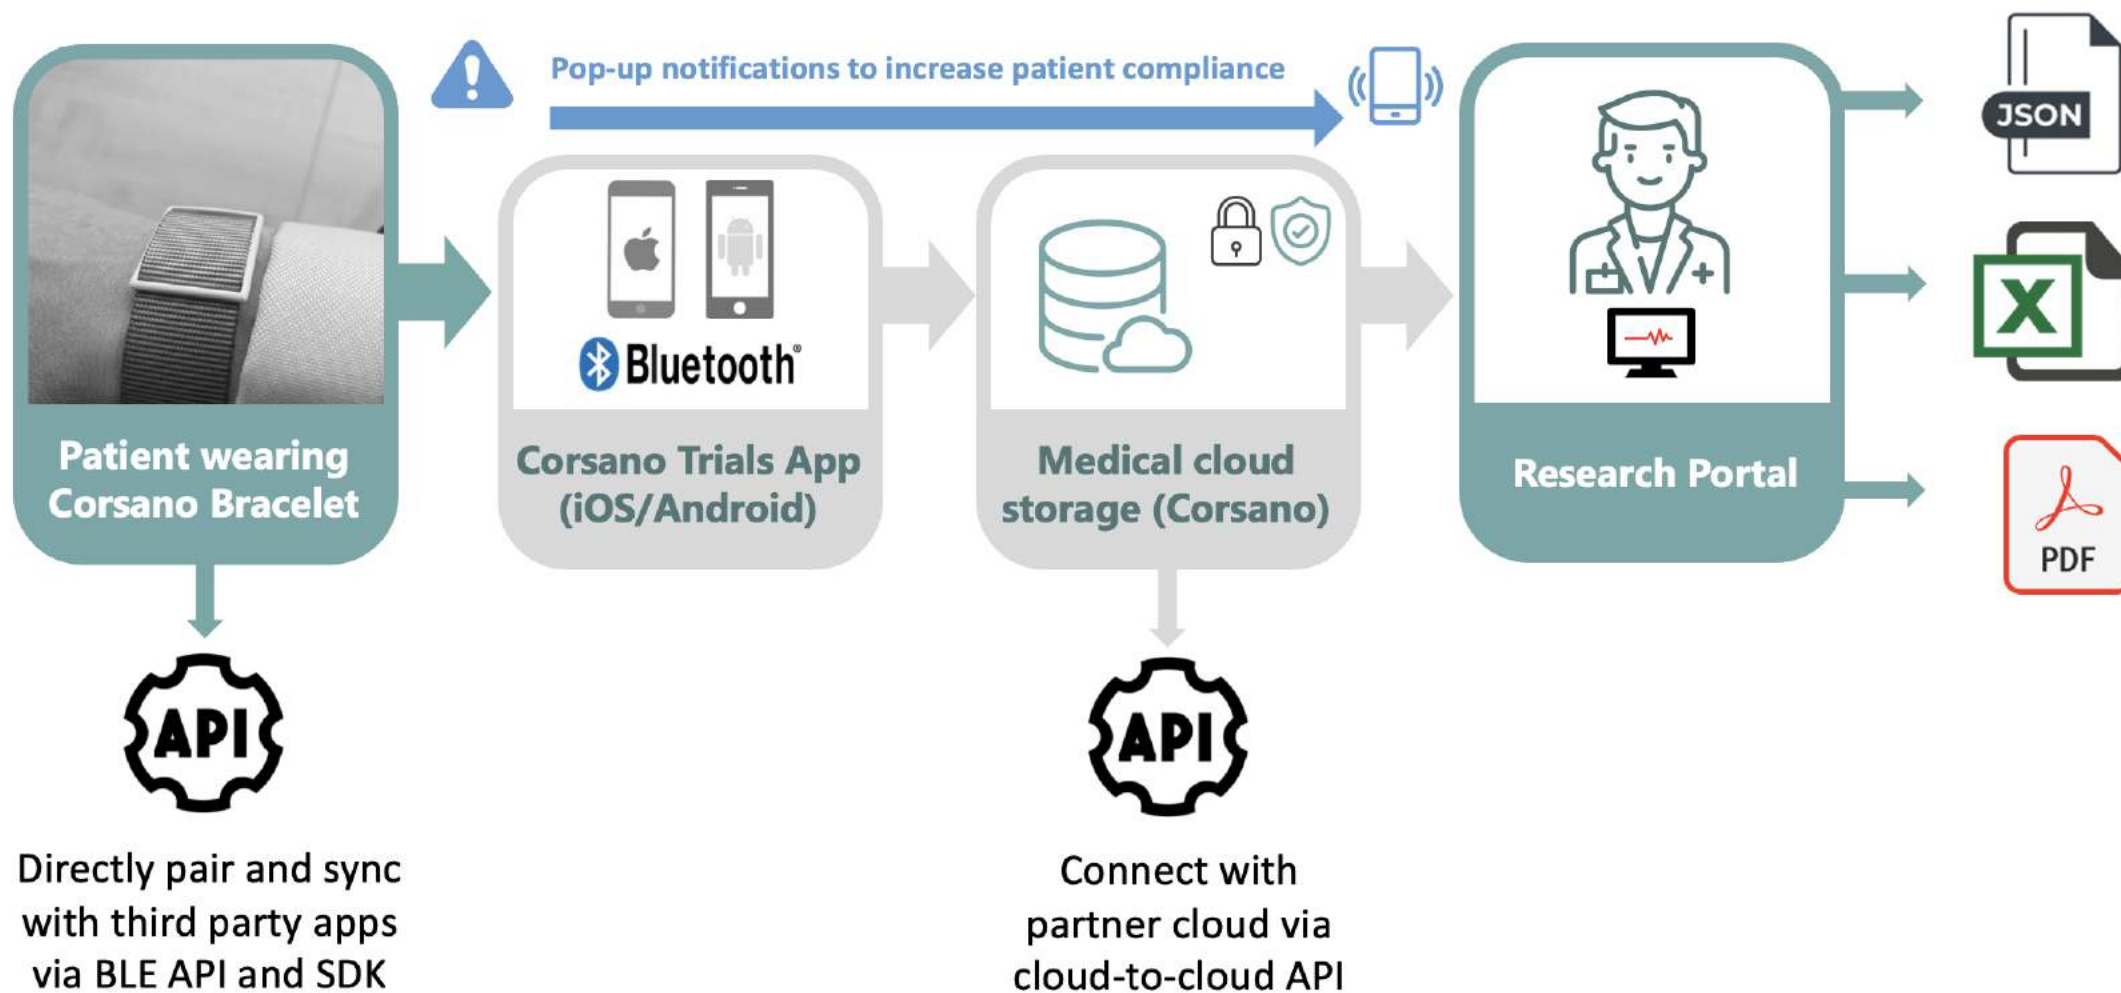

Corsano Health

A health-tech company developing, producing and marketing medically certified continuous health monitoring device, the **Cardiowatch 287** for remote, wireless and continuous vital signs monitoring.

The **Corsano** brand name is derived from **in corpore sano** (in a healthy body).

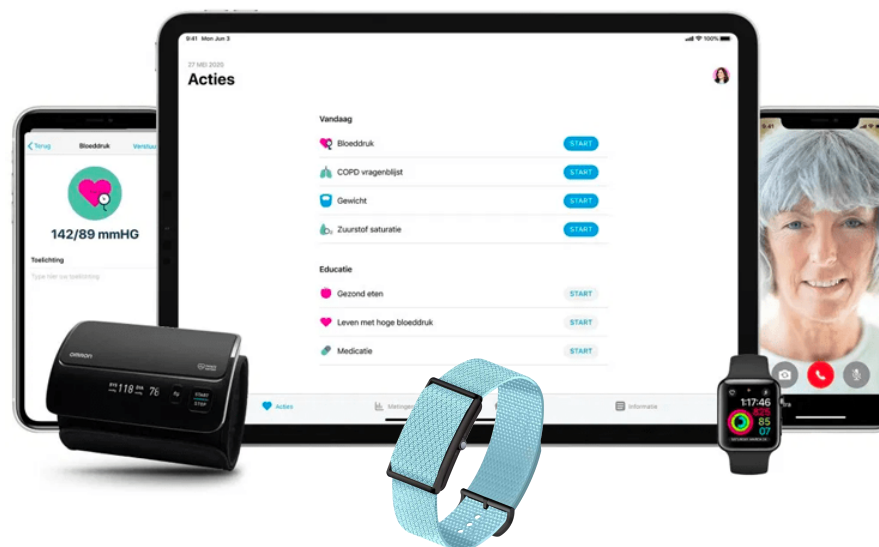

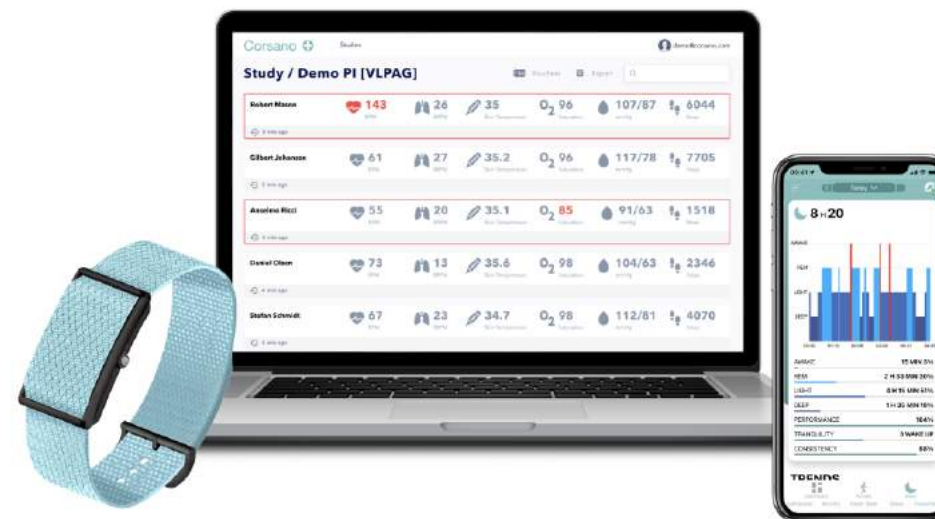

Segments:

- Hospitals (acute care, in hospital monitoring)
 - High risk population, increasingly elderly patient population
 - Early detection & Preventive care
 - Avoid deterioration & events
 - Complex, high age, multiple diseases patient population
 - Trend towards continuous-, instead of spot check monitoring
- Hospital at Home (Home Care)
 - Remote Patient Monitoring (RPM) post Acute Care Interventions
 - Remote Patient Monitoring (RPM) Chronic Care / diseases
 - Focus; Prevention of readmission and early detection of deterioration and events in ambulatory setting
- Research:
 - Academics; clinical studies/trials
 - CRO Contract Research Organizations
 - Pharmaceutical companies; clinical trials
- Platforms (integration):
 - Telehealth
 - Telemedicine
 - E-Health

In house development of:

- Hardware (smartwatch modules)
- Firmware
- Smartphone iOS and Android applications
- Web-portal (cloud architecture)
- API's
- SDK
- Data scientists

Better@Home Service GmbH:

BeHome
Für ein selbstbestimmtes
und sicheres Wohnen

Marten Wilke

Projektmanager

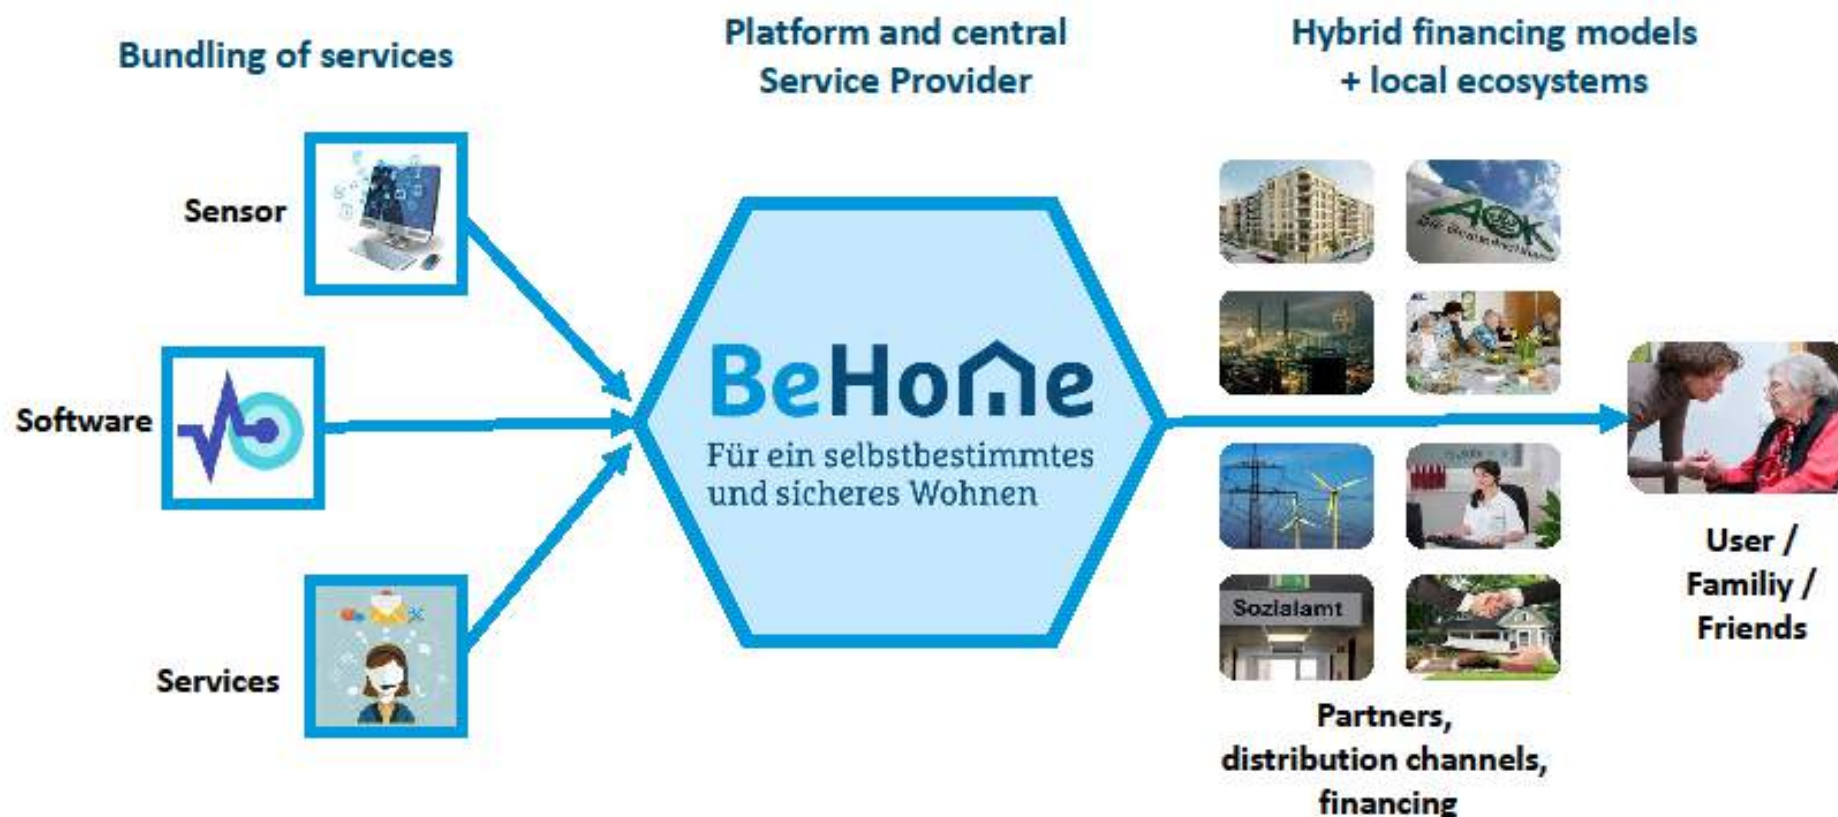

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

BeHome is the only **one-stop provider** of innovative solutions for age-friendly living with technical assistance systems incl. comprehensive services. We combine proven products and services from our partner companies that can be configured to meet specific customer needs. This creates **greater security and simplified communication** options between **residents and the social environment**, without having to rely on the proactive involvement of the person in need of **care in emergency situations**. This also creates new and **sustainable business and care models**.

BeHome — your full-service provider for
secure and self-determined living at home

© Better@Home Service GmbH

We are looking for:

- Partners and Customers esp. in the Real Estate Industry, Communities, Welfare Organizations
- Strategic Investors
- Providers of hardware and software solutions in the field of IoT/AAL
- Partners for cooperation projects, implementation of digital solutions for active and healthy ageing
- Regional Partners to realize Projects

InCasa Smart Senior Living

Alejandro Cavaliere

Founder & CEO

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Description of the organisation

Incasanet Technologies SL

- *Incasanet Technologies SL is a company incorporated in Barcelona early 2021*
- *Core IoT / AI technology developed by a team of 15 mainly from Universidad Rey Juan Carlos*
- *Founder is a 20+ year tech exec with key experience at Oracle and Microsoft*
- *Previous successful Senior Home Care start-up experience at Clicfon.com*
- *Stage: MVP ready, pre-revenue, ready for commercial launch*
- *Funding: 100% by founder, looking for smart investors interested in the sector.*
- *IoT hardware 100% European, partnership with Nice/Fibaro Italy.*
- *InCasa Smart Home Care software 100% proprietary of Incasanet Technologies.*

The Senior Smart Home platform

THE FIRST
SMART HOME PLATFORM
CREATED FOR SENIORS
AND THE HOME CARE
ECOSYSTEM

Cooperation idea (if applicable)

Enter subtitle here

Cooperation ecosystems:

- *Communities seeking to provide Next Generation home care (replacing Telecare)*
- *Current Telecare Service Providers (TSP) looking for NextGen technology.*
- *Investors in the Senior Living (AAL/ Active Ageing) space.*
- *Senior Home Care service companies looking for a tech platform.*
- *Other start-ups with connected/related technologies and GTMs.*

Areas of cooperation (what InCasa can provide):

- *Market-ready Senior Smart Home platform. Plug-and-play.*
- *Further Home Intelligence development (evolving with customer profiles)*
- *Integration with other platforms (Healthcare, eHealth, Telecare)*
- *B2C and B2C go-to-market models*

Expertise request (if applicable)

- InCasa is looking for Partners-Investors

Investor profile:

- *Smart Investor: funding from sources genuinely interested/involved in Senior Care / Active Ageing*
- *Strategic Investor: companies who could benefit from integrating InCasa into their product/services*
- *Senior Care / AAL focused investors looking to enter the market with a genuine platform*
- *Accelerator-investor: companies for whom InCasa means instant competitive advantage*

InCasa is looking for Partners-Investors. The Senior Smart Home is a new category. We believe that Senior Smart Homes are the Core of NextGen Home Care.

Please specify what type of cooperation are you looking for (e.g. investment, software & app development, implementation of digital solutions for active and healthy ageing, upscale of digital solutions for older people etc.).

Expertise offer (if applicable)

- *Senior Home Care platform*
- *Specialized Smart Home (IoT + AI)*
- *Home Care for at-home recovery (Hospital market)*
- *AI development for Smart Home applications*
- *Home Care protocol translation to AI-code*

Comunicare Solutions

Brice Van Eeckhout

CEO

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Comunicare in a nutshell

Company description

An initiative born from

- The experience of patients and informal caregivers
- The collaboration with oncology healthcare givers of CHU Liège, CHU Saint-Pierre and the Precision Medicine Department of Maastricht University
- With the support of Solidaris

Start-up (spin-off of Université de Liège)

Software solutions that enable **better communication between patients, relatives and caregivers** by enforcing patient education, literacy, therapeutic compliance, risk prevention, and **shared decision-making**.

Alfred Attipoe
CEO

Aerospatial, Software AG,
Petercam, KBC

Brice Van Eeckhout
CEO

Oncologist, Head of
Precision Medicine
(Maastricht)

Pr. Philippe Coucke
SAB

Head of radiotherapy
CHU Liège

Dr Marc Tomas
SAB

Cardiologist, Faculty of
Medicine, UNamur

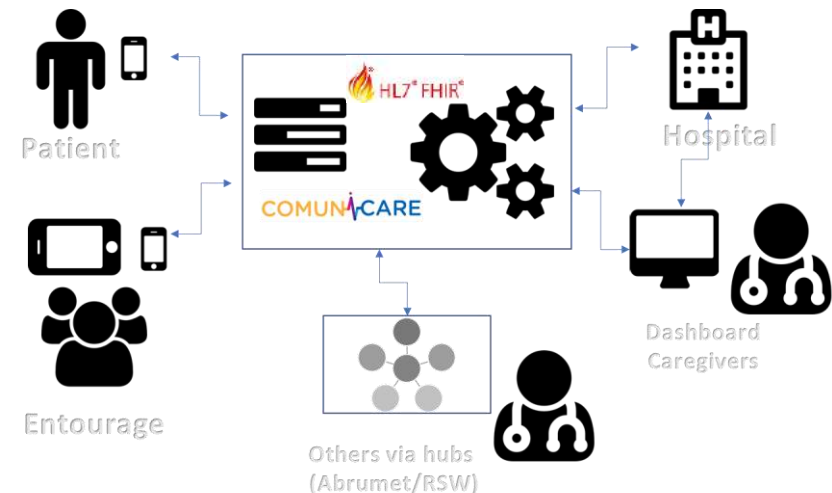

Our expertise

Develop personalised digital carepaths for patient empowerment

We develop **Patient Support Solutions** in the context of chronic care, (e.g., cancer, heart failure, COPD, diabetes, myeloma) or after discharge from hospital (intensive care, transplantation, etc.).

The objective is to:

- **empower** the patient with personalized information and tools to enable a better literacy, self-efficacy and shared decision making along the care pathway
- enable to prevent risk situations and patient triage thanks to **predictive models**, and to provide means to measure the quality of the therapy (**PROMS**)
- Facilitate the **communication** between **all stakeholders** with the patient as the central actor

Conclusion

- Better **interaction** between patients & care givers
- Integrated in the **usual** care pathways
- Interfaces for EHR/EMR systems
- Personalized **information and tools** for the patient
- Information sharing with the **entourage**
- Better quality of care thanks to **data analytics** based on patient reported outcomes
- **Reduction of time** spent in phone calls thanks to automatic triage

I show social-economic evidence and get reimbursed by RIZIV

COMUNICARE
I am safely connected

I am a CE certified medical device

Thank you very much for your attention!

HIPPOCRATES **TECHNOLOGIES**

**THE WORLD'S FIRST DIGITAL LAB
FOR DIGITAL CARE AND THERAPEUTICS
DEVELOPMENT**

Problem: Digital Health is **Hard!**

- 1. Creating life changing/saving solutions is complex and expensive!**
- 2. 60-80% of the costs are completely unrelated to health.**
- 3. High penalties: \$ 8M average cost of security break. Loss of trust and business.**
- 4. Challenges can be overwhelming.**

The Dark Side of the Future

Business Impact of Cyberthreats

Average healthcare organization spent \$1.4 million to recover from a cyberattack

37% saw reputation loss following an attack

82% of healthcare organizations said the IoT-enabled devices they use or make were attacked over the past year

Nokia Threat Report: IoT Malware Infections Surge 100%

Internet-connected devices now comprising about 33% of infected devices

FBI: wave of extortion attempts against healthcare

Ransomware

Tried and Tested Solution

Rapid Application Development (RAD)

Holy Grail of Computer Science: Low Code Tool Technology

Our Mission

To be the one-stop shop that:

- *provides the very best development tools and technologies (BaaS+, AI, etc.)*
- *enables innovators to be successful*
- *creates a healthy ecosystem in which they can grow and thrive*

It's the best job in the world!

We asked: What Do Devs Think?

If given the choice, what do developers prefer between:

- *The easy way (RAD)*
- *The hard way (traditional)*

They resoundingly respond: the easy way!

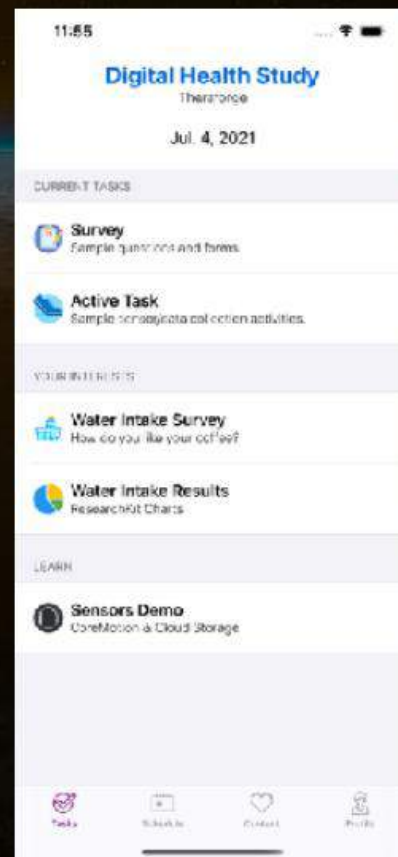

TheraForge: Digital Health Lab

- Transformative Cloud-enabled Dev Solution for Digital Health (BaaS+)
- Brings down complexity, costs and time to market
- It's based on industry-redefining technological paradigms

Getting Noticed!

Q&A

A high-quality image of Earth from space, showing the curvature of the planet and the thin blue atmosphere. The sun is visible on the left, creating a bright glow and illuminating the scene. The word "Backup" is centered in a large, white, sans-serif font.

Backup

Brought to You by:

A team with 25-year track record of breaking new ground:

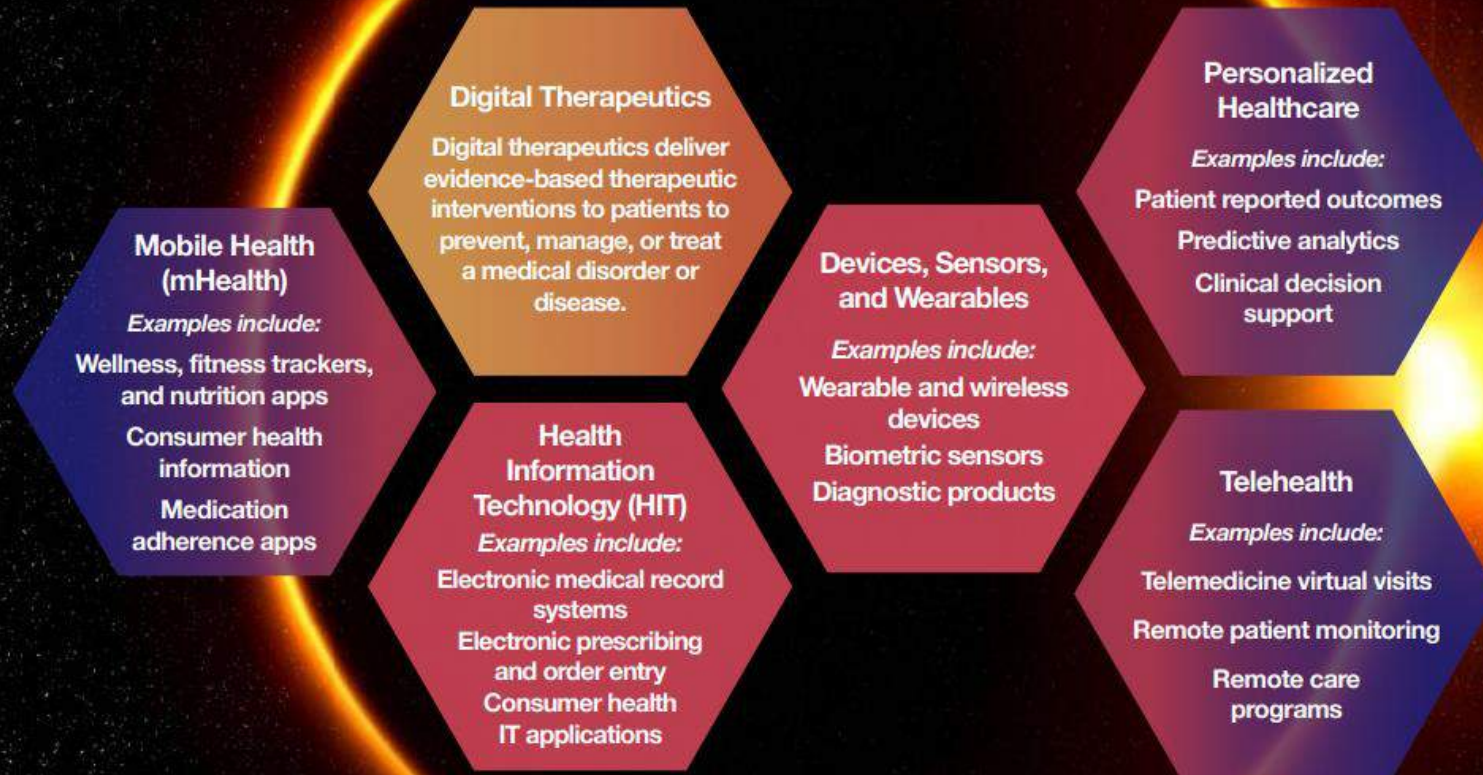

- **Directors and Product Manager who managed, developed and sold multibillion dollar products to Fortune 500 companies**
- **Pioneered 5 technologies against major network attack vectors for IoT devices**
- **Augmented industry standards to improve IoT network stability and reliability**
- **Innovated the network security designs for the Data Center**
- **Contributed to the launch of VoIP in the Enterprise**
- **Holds more than 50 key patents with 1000+ quotations**

Target Customers (B2D)

Accelerate: The Future of Medicine

“Beyond the Pill” Revolution

87

Fondazione Bruno Kessler

Sara Testa

Project Manager

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

- Fondazione Bruno Kessler is one of the leading Italian institutions in **AI**.
- Our mission is **excellence of science** which extend our innovation capability and involve the community and the economy in the circulation of knowledge and technologies (impact).
- The activities of the **Centre Health & Wellbeing** mainly concern scientific research of excellence in the field of **Computer Science and AI techniques** and methodologies for health and healthcare, as well as **social and technological innovation** for a relevant impact on both the local community and nationally and internationally.

TREC

**Virtual
Coach**

**Big data
Analytics**

- TREC **Personal Health Record** currently in use by over **135,000 citizens** in Trentino
- TREC platform components **reused** at National Level
- Flagship project on **Digital Therapeutics** for Mental Health in Pregnancy

**European Digital
Innovation Hubs**

We developed...

HORUS.AI which is a virtual coaching semantic-enabled platform for supporting the **self-management of wellbeing and chronic disease conditions**.

It is...

domain agnostic, therefore, totally configurable by modelling the domain knowledge and rules, the dialogues and the motivational strategies.

It interacts with...

the user through dialogues and integrates **a goal-based approach** to propose challenges and goals to the user.

The user interacts with the Virtual Coaching System through a chatbot-based Web App or a chatboat in a social media, or a robot, ecc.

Predictive AI

Deliberative AI

Models built with different types of data and prescriptive knowledge. Able to: classify, predict, recommend, be replicated, ensure privacy & confidentiality, explain,
Conformant to Normative Frameworks, Data Altruism & Citizen Science principles.

Applications: Support analysis and decision making with clinical & organizational data:

- Risk prediction for e.g., comorbidity in Type 2 Diabetes or Cardio
- Classification in digital pathology
- Classification in neuro oncology
- Outcome prediction for PDTA

casenio AG

Ralf Hartmann

Salesmanager

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Description of the organisation

PERFECT SOLUTIONS FOR EVERY CHALLENGE

- *Founded 2014*
- *Business 2 Business*
- *35 Employees*
- *Unique solution for*
 - *safety*
 - *security*
 - *social integration*
 - *communication*
- *Open platform*
- *Target groups:*
 - *Elderly care*
 - *Assisted Living*
 - *Care companies*
 - *Housing Companies and Housing Associations*

Protection and Safety

- ✓ Emergency call
- ✓ Environment sensors
- ✓ Recording vital data
- ✓ Switch off hob/oven
- ✓ Reminders
- ✓ Dashboard
- ✓ Smart home functionalities
- ✓ Absence assistant

Protection of the building

- ✓ Prevention of water damages
- ✓ Preventing the formation of mold
- ✓ Detection of heat, smoke and gas
- ✓ Measuring the air quality
- ✓ Stove control
- ✓ and so on

Information and communication

- ✓ Infoboard e.g. for important information, news, reminders, leisure activities
- ✓ Communication e.g. contact administration, caretakers, notifications of claim, eating plans, bookings
- ✓ Video calls e.g. care staff, family, telemedicine

Synergies

- ✓ Integration into districts e.g. of electromobility, restaurants, doctors
- ✓ Visualisation of consumption (heat and water) - EED
- ✓ Integration of third-party offers, like transport/ delivery or laundry services
- ✓ Development of own application

Cooperation idea (if applicable)

PERFECT SOLUTIONS FOR EVERY CHALLENGE

We would be glad finding the following cooperations:

- *Companies looking for digital solutions to increase their possibilities and want to reduce employees' workload.*
- *New ideas of sensors to integrate and make them even more interesting for the customers.*
- *Partners who want to sell our product in other countries.*

GOLEM Integrated Microelectronics Solutions GmbH

Vienna, Austria

<http://golem.at>

Serguei Golovanov

PhD, Dipl.Eng., CEO, Vienna, Austria

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

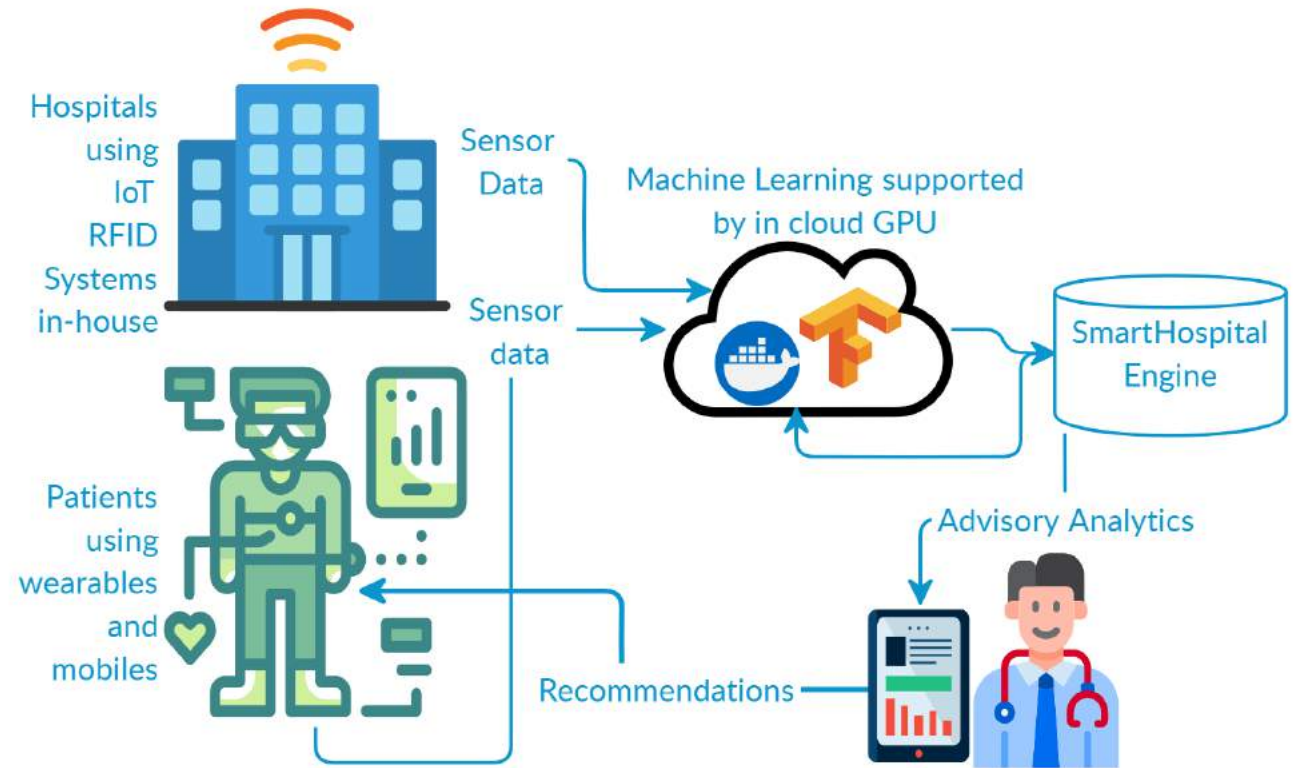

Description of the organisation

Brief info about GOLEM Integrated Microelectronics Solutions GmbH

*GOLEM.AT is an R&D SME developing future-oriented software technology innovations: **Intelligent Digital Twins** of Big Systems of Systems (BSS) for diverse applications in health, industries, cites, environment, etc.*

The Twins driven by AI, Bigdata, IoT, Blockchain, Chatbots, assist BSS users in effective monitoring, managing, controlling complex BSS processes in the interlinked physical and virtual worlds making them sustainable, resource efficient, resilient, high performing considering both the real time and future.

*We invite **innovative healthcare organisations** to join the future oriented projects financed by Horizon Europe, AAL, etc. that will deliver and test practical prototypes of **Intelligent Personal Virtual Health Assistants** which accumulate available knowledge regarding best possible health management and can help their hosts reach best quality of life while speaking in natural language.*

They will continuously monitor health and wellbeing of their host individuals, advise regarding desirable health improving actions, living conditions, remind about necessary activities, medication, meetings and keep connectivity with all necessary informal and formal caregivers.

***The cooperation areas** can include integrated care, independent, inclusive and connected living.*

Expertise request (if applicable)

Looking for partners in future-oriented forward looking projects

Practical experience in caregiving, including daily monitoring and interpretation of health status, including vitals signs, BMI and other health indicators, interactive questionnaires (psychological & mental status, cognitive aging, etc.), physical and mental activities, health-related events scheduling, diagnostics, psychological and legal issues of communications with patients and their caregivers.

Expertise in comprehensive diagnostics and assessment of personal health and its trends using various indicators and tests.

Types of cooperation: Investment, Consulting and Practical testing of digital solutions for active and healthy ageing, its upscaling for older people in pilots that include large experimental groups of people.

Expertise offer (if applicable)

Enter subtitle here

*We provide valuable theoretical and practical contributions to various RIA and IA projects that **address latest health & social care challenges** by applying novel system & data science modelling methodology & digital technology to support consortiums with **radically new digital solutions**.*

Our new AI-Bigdata-IoT-blockchain-driven technology platform Pharos Navigator[®] allows rapid prototyping of Intelligent Digital Health Twins for personal & multi-patients studies, automatic collecting of big data from bio, physiology, mental, wearables and air/environmental/safety sensors at home and assisted living premises, dynamic calculating multiple biomarkers, physical, mental and wellbeing indicators, linking with various medical ICT and omics models, evaluation health homeostasis status, supporting real-time & predictive holistic monitoring analytics in various trials for high-impact personal & clinic results.

Field of expertise: Advanced software development and implementation in pilots

Nutrition as a Service

The digital health platform NutriCare.Life leverages human individuality to drive nutrition strategies that prevent diseases, optimize health and encourage a sustainable diet.

We provide ultra-personalized recommendations on food and supplements that best suit nutritional needs and planet sustainability.

On top of this, to increase the targeted nutrition accuracy we use results of genetic, blood and urine at-home medical testing.

Add more years to your and planet's life

Cooperation area: Life Science

Expertise request (if applicable)

Enter subtitle here

We are looking for:

- *Healthcare providers to develop a project in the area of personalized and precise nutrition*
- *Investors to support our development and scaling plans*
- *Partners to apply at the EU grants focused on wellbeing and ageing*

We are offering:

- *Nutrition consultancy using a digital tool (<https://app.nutricare.life/my/login>)*
- *At-home nutritional tests (<https://app.nutricare.life/shop>)*
- *Ultra-personalized Food and Nutritional supplements recommendations*

EĞİTİMDE İŞ BİRLİĞİ" YAPILMASINA İLİŞKİN PROTOKOL İMZALANDI

ANKESOB ile Mamak İlçe Milli Eğitim Müdürlüğü/ Mamak-Ortaköy 80. Yıl Mesleki ve Teknik Anadolu Lisesi arasında nitelikli iş gücünün yetiştirilmesi-ne yönelik olarak "Mesleki ve Teknik Eğitim Okul Yönetim Kurulu Çalışmaları İş Birliği Protokolü" imzalandı. ANKESOB Başkan Vekili Hüseyin Ar, imza altına alınan protokol ile okul-sektör iş birliğinin en üst düzeyde hedeflendiğini kaydetti.

Ankara Esnaf ve Sanatkarlar Odaları Birliği (ANKESOB) ile Mamak İlçe Milli Eğitim Müdürlüğü/ Mamak-Ortaköy 80. Yıl Mesleki ve Teknik Anadolu Lisesi arasında, sektörlerin ihtiyacı olan nitelikli iş gücünün yeni teknik yöntemlere dayalı-

KESOB Başkan Vekili Hüseyin Ar ile Mamak-Ortaköy 80. Yıl Mesleki ve Teknik Anadolu Lisesi Müdürü Yusuf Yöndem imza koydu.

ANKESOB Başkan Vekili

nitelikli iş gücünün okul-sektör işbirliği ile en üst düzeyde sağlanmasının hedeflendiğini kaydetti. Ar, "ANKESOB olarak meslek liselerinde okuyan geleceğin esnaf ve sanat-

gan Özen, iş birliği protokolünün amacını; "Yürütmekte olduğumuz Dijital Ekonomi Projesi'nin de çıktılarını arasında Elektrik-Elektronik Teknolojisi, Mekanik ve Ahşap ve diğer alan eğitsel, sosyal, ekonomik gereksinimlerini karşılaması, ihtiyaç duyulan iş gücünün Mesleki Eğitim Ok-

öğrencilerin istihdamında pozitif ayrımcılık yapılacağını, meslek alanındaki öğrenci ve öğretmenlere

dolu Lisesi Müdürü Yusuf Yöndem; iş birliği protokolünün başarıya ulaşması için gereken her sevin

cisinin öğrenci ve öğretmenlere meslek alanında güncel uygulamalara dair vereceği eğitimlerle ilgili uygun ortam sağlamak ve işletmenin ve/veya STK stajyer olarak işe alacağı/ yönlendireceği öğrencileri tespit edilmesi için gerekli kolaylığı sağlamak yönünde sorumluluklarını yerine getireceklerini kaydetti.

Mamak-Ortaköy 80. Yıl Mesleki ve Teknik Anadolu Lisesi Öğretmeni Ercan Köçükarslan; iş birliğinin öğrenciler için ufuk açıcı yeni açılımlara vesile olacağına inandığını belirterek, okul sektör arasındaki iş birliğinin artarak devam etmesi temennisinde bulundu.

Mamak-Ortaköy 80. Yıl Mesleki ve Teknik Anadolu Lisesi Öğretmeni Ahmet Oktay Yavuz ise; gelecekte lıcaretin lıyce dijitalleşeceğini ve bu nedenle eğitimde iş birliği projesini dijitalleşmeye bir adım, bir fırsat olarak da gördüklerini ifade etti.

Kurulu Çalışmaları kapsamında işbirliğine dayalı bir şekilde; sektörün ihtiyacı olan nitelikli iş gücünü yeni teknik yöntemlere dayalı olarak yetiştirmektedir." şeklinde açıkladı.

Özen, imza altına alınan protokol gereğince; esnaf ve sanatkar işyerlerinde stajyer öğrencilerin ilgili alanda en iyi şekilde yetiştirilmesi için gereken has-

şallah ANKESOB ve okulumuz açısından hayırlı olur. MEB'de bu tür işbirliklerine olumlu bakıyor. Dijital Ekonomi projesinin de isteği; projenin ortağı ANKESOB ile Mamak-Ortaköy 80. Yıl Mesleki ve Teknik Anadolu Lisesi'nin işbirliğinin sürdürülebilir hale gelmesi yönünde." diye konuştu.

İşbirliği protokolüne imza

ANKESOB'DAN VETFEST PROJESİNE DESTEK

Ankara Esnaf ve Sanatkarlar Odaları Birliği (ANKESOB) Başkan Vekili Hüseyin Ar, bu yıl başincisi 09-13 Kasım tarihleri arasında gerçekleştirilmesi programlanan; çeşitli kurum ve kuruluşların, projelerde yer alan kişilerin mesleki eğitim alanın-

daki çalışmalarını sergiledikleri bir etkinlik olan "Avrupa Mesleki Beceriler Haftası" kapsamında Mamak Kaymakamlığı hi-mayelerinde ve Mamak Belediyesi'nin destekle-riyle düzenlenen; Mamak İlçe Milli Eğitim Müdürlüğü ve Mamak-Ortaköy 80. Yıl

Mesleki ve Teknik Anadolu Lisesi ortaklığında yürütülen VETFest (Ulusal ve Uluslararası Mesleki Eğitim ve Öğretim Ağları için 12 Etkinlik) projesinin açılış toplantısına katıldı. OKULUN PROJE FAALİYETLERİ PAYLAŞILDI

Prof. Dr. Necmettin Erbakan Kongre Merkezi'nde pandemi önlemleri dikkate alınarak düzenlenen etkinlikte ANKESOB Başkan Vekili Ar'a, ANKESOB Eğitim, Proje ve Ar-Ge Müdürü Erdoğan Özen ile ANKESOB MEDB Üyesi Zeynel Abidin Karagöz de eşlik etti. Mamak İlçe Milli Eğitim Müdürü Mustafa Özel'in açılış konuşmasının ardından, VETFest projesinin tanıtımını proje yürütücüsü Bilal Kılıç yaptı. Ortaköy 80. Yıl Mesleki ve Teknik Anadolu Lisesi Öğretmeni ve proje faaliyetleri sorumlusu Ercan Küçükarslan, okulun proje faaliyetlerini katılımcılarla paylaştı. Üreten Akademi Topluğunu Yöneticisi Emre Tümer de, proje sunumunu gerçekleştirdi. Açılışta, projenin kapsamındaki yapılan çalışmaları

rın anlatıldığı konuşmaların ve proje döngüsü eğitimi sertifikası töreninin ardından katılımcılar, fuaye alanında meslek liselerinin, çeşitli kurum ve kuruluşların ve kişilerin eğitim alanındaki çalışmalarını sergiledikleri stantları gezdi. BU TÜR ETKİNLİKLER ÖNÜMÜZDEKİ YILLARDA DA DEVAM ETMELİ ANKESOB'un da açmış olduğu bir stantla yer aldığı fuaye alanını gezen ve projeler hakkında bilgi alan ANKESOB Başkan Vekili Hüseyin Ar, "Bu yıl 5'ncisi tertip edilen Avrupa Mesleki Beceriler Haftası'nı Türkiye'de kutlayan 5 etkinlikten birine devam ettirilmelerini te-menni ediyoruz." ifadele-rini kullandı.

Sanatkarlar Odaları Birliği (ANKESOB) olarak, ANKESOB ve Ortaköy 80. Yıl Mesleki ve Teknik Anadolu Lisesi ortaklığında, AB tarafından desteklenen ve Aston Üniversitesi Koordinatörlüğünde yürütülen Dijital Ekonomi için Okul İttifakı (The School Business Alliance for the Digital Economy) isimli Erasmus+Okullar arası Stratejik Ortaklıklar projesinin tanıtımını ve ürünlerini Mamak'ta faaliyet gösteren meslek liselerinin öğretmen ve öğrencileriyle paylaştı. Bu tür etkinliklerin, iyi örnek çalışmaların kazandırılması açısından önemli olduğunu görüyor ve önümüzdeki yıllarda da devam ettirmesini te-menni ediyoruz." ifadele-rini kullandı.

BOSEV ve MUSEV AB Projeleri her kesimden destek alıyor, yenilikçi ve yenilikçi çözümler geliştiriyor, kazanımları halkla bir kez daha ulaştırıyor.

BOSEV ve MUSEV Vakfı, Özel Ortadoğu Hastaneleriyle birlikte, uzman kadrosuyla ve kaliteli hizmet anlayışıyla bilinen sağlık sektöründe yüksek standartları karşılayan Avrupa'da yerli AR-GE Faaliyetleriyle, proje çalışmalarını 2020 yılında da devam ettiriyor. Ayrıca da bu mihneti ada silinmeye devam ediyor. Çarşaklı Onkoloji Merkezi'nde bulunan AR-GE Faaliyetleri: Hırp (www.hırp.eu) isimli projede Yaşlıların Dijital Sağlık Durumlarında Yeterliliklerini artırma amaçlı olarak, T.C. Sağlık Bakanlığı Arıyıcı Bütçe Başkanceliği Eğitim ve Gençlik Programları Başkanlığı (Türkiye Ulusal Ajansı) ile finansman desteğiyle platformu, alandaki profesyonellerin becerilerini geliştiriyor. BOSEV Vakfı Başkanlığı, Dr. Sabri KAYA, MUSEV Vakfı Başkanı ve aynı zamanda Ortadoğu Hastaneleri Yönetim Kurulu Başkanı Dr. Ertan ÖZEREN, ve vakıf proje koordinatörleri Erhan KÜÇÜKİSİLAN vakıf proje koordinatörleri arasında yerinde tüm hayati destek veriyor, değerli katılımcılarını vakıf web sayfasında (www.bosev.org ve www.musev.org.tr), facebook kanalı (https://www.facebook.com/bosev.org) üzerinden projeleri ve çalışmalarını değerli katılımcılarla sürekli paylaşıyorlar ve onları destekliyor.

TOOLSBRAIN isimli bir diğer projeye Senadın Edinilebilir veya Travmatik Beyin yaralanmasıyla karşılaşan hastaların rehabilitasyonunda çalışan personelin ve hasta yakınlarının yeteneklerini arttırmaya yönelik olarak geliştirilmiş faaliyetlerinde sona gelmiştir. Bu kapsamda oluşturulan mobil uygulamaya Google Play'de <https://play.google.com/store/apps/details?id=com.toolboxbrain> linki ve Apple Store'da <https://apps.apple.com/tr/app/toolboxbrain/id1444444444> linki üzerinden kullanıma sunuldu ve ayrıca yayımlanan rehber video çekimleri de proje YouTube kanalıyla <https://www.youtube.com/watch?v=K6E8T1A8P7M> linki üzerinden kullanıma hazır hale geldi. TOOLSBRAIN Hakkında: İsteğiniz üzerine oların kullanımına sunulmuş olup, linkine www.bosev.org internet adresinden, vakıf sosyal medya kanallarından ulaşabilirsiniz.

BOSEV Vakfı bir diğer projesi VikiEgo (www.vikego.net) de Avrupa Birliklik destekleri ile geliştirilen becerilerin yenilikçi olarak öğretilmesi ve öğrenme, geliştirme ve öğrenme için eğitimler vermektedir. www.vikego.eu üzerinden devam etmektedir. Bu kapsamda 2 yıl boyunca sürdürülecek webinars, forum 3.ku online olarak 24 Eylül tarihinde gerçekleştirildi.

life GÜNCEL

ACT POSITIVE

2020 yılının ilk güzel haberi Fransa'dan geldi. Fransa Ulusal Ajansı tarafından fonlanan D'ANTILLES ET D'AILLEURS DA&DA koordinatörlüğünde yürütülecek ACT POSITIVE isimli projede Avrupalı 2. nesil genç göçmenlerin güçlü yanlarını kullanmak için yenilikçi bir yaklaşımla, olumlu psikolojik teorisi eşliğinde, dayanıklılıklarını artırmak ve istihdamlarını kolaylaştırmak amaçlanıyor.

İngiltere Ulusal Ajansı'na kabul edilen diğer bir projemizde BOSEV Vakfı Kadın Kolları Komisyonu koordinasyonunda Kadın Girişimciliğine yönelik eğitim içeriklerine Türkiye adına katkıda bulunan kadınlar, İtalya, Romanya, Litvanya ve Norveç'teki kadın kuruluşlarla birlikte WOMIN (Women are In: Skills and Competences for Work and Entrepreneurship) kadınlar işbaşında. Bu projenin ilk toplantısı 14 Eylül 2020 tarihinde yapıldı. Proje 2 yıl boyunca Kadın Girişimciliği üzerine çalışmalar yürüteceğiz. Türk kadınına ve camiamıza hayırlı olmasını temenni ediyoruz.

2020 yılının bir diğer güzel haberi ise İngiltere Ulusal Ajansı tarafından paylaşıldı. İngiltere Ulusal Ajansı tarafından fonlanan Restorative Justice for All (RJ4All) International Institute koordinatörlüğünde yürütülecek Restorative Dialogue Against Violent Radicalisation (Şiddetli Radikalleşmeye Karşı Onarıcı Diyalog) isimli projede artan göçmen nüfusunun da etkisiyle artan radikal eğilimlerin azaltılmasına yönelik diyalogun ön plana çıktığı bir eğitim programının yapılandırılması sağlanacaktır. Koordinatör İngiltere'nin yanında Romanya, Türkiye, İspanya ve İrlanda'dan da alanın seçkin kuruluşları projeye katılım sağlayacaktır. Bu yeni projemizin de alanda çok önemli bir boşluğu dolduracağına inanıyoruz.

Diğer bir haber yine İngiltere Ulusal Ajansı'ndan ulaştı. MUSEV Vakfının iştiraki olan EDI (Early Digital Diagnosis and Intervention, Erken Dijital Tanı ve Müdahale) isimli proje İngiltere Ulusal Ajansı tarafından fonlandı. Aston Üniversitesi koordinatörlüğünde yürütülecek projeye Türkiye, Fransa, Hollanda ve Yunanistan'dan alanında seçkin kuruluşlar eşlik edecektir. Projenin Eğitim camiamıza ve Mucurumuza hayırlı uğurlu olmasını temenni ederiz.

Fondazione Casa Sollievo della Sofferenza Istituto di Ricovero e Cura a Carattere Scientifico (CSS)

Francesco Giuliani

Head of Innovation & Research

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

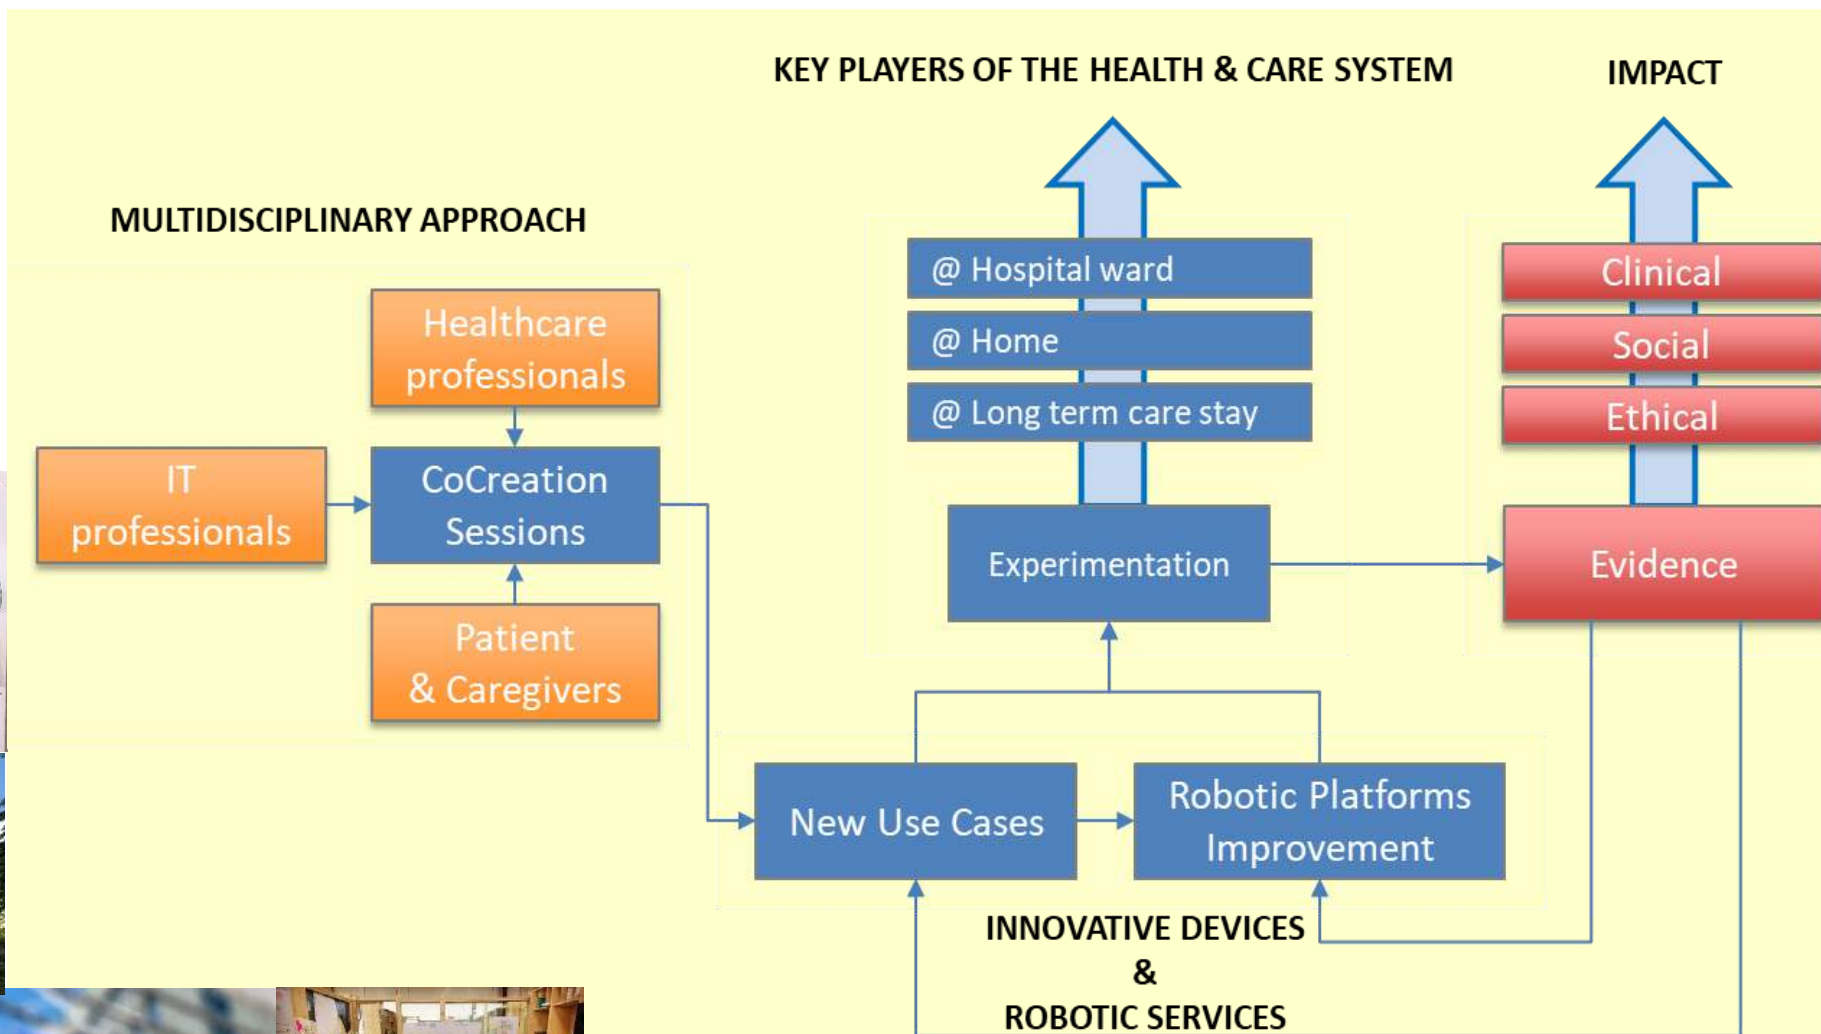

Description of the organisation

A Research Hospital based in Southern Italy

Casa Sollievo della Sofferenza

- Italian non-profit **healthcare institution**
- Recognized by the Italian Ministry of Health as a Research Hospital (IRCCS) specialized in the field of **Genetic Diseases, Innovative Therapies and Regenerative Medicine**
- All medical specialties are covered
- Average of >50,000 yearly inpatients.
- 150 scientific articles each year on the most acknowledged scientific journals
- Has been clinical partner for FP7, ERC and H2020 EU funded projects

- **Healthcare domain** expertise with a team of clinicians and technologists involved in subjects like Assistive Robotics, Artificial Intelligence, eHealth, IoT, Big Data, Ambient Assisted Living, Cybersecurity
- The **design of clinical protocols** and the conduction of pilot studies in the mentioned fields, with the direct involvement of **patient cohorts** meeting the specific inclusion criteria and the provision of research data
- Support in the definition of **ethical aspects, data protection, exploitation** strategies and **communication** plans

WEARABLE MONITORING SYSTEM

Residential Care Facility and
Nursing Home

We care with Comfortable Technology

CONFIDENTIAL MATERIAL

ANYONE | ANYWHERE | ANYTIME

ComfTech comes from Comfortable Technology.

Our company started as a project to improve the quality of life of babies born prematurely in the neonatal intensive care unit. Today our textile sensors have a **wide range of applications** and are designed **for all ages**.

CONFIDENTIAL MATERIAL

Methodology

ComfTech has brought together and developed expertise in bioengineering, electronics and textiles. But above all, it has set up a method that allows it to always put listening to users and their specific needs at the heart of each new development.

Building on a decade of experience in wearables and smart textiles, ComfTech has developed specific expertise in textile sensor signal optimisation and data analysis.

Team

ComfTech is based on a multidisciplinary team, where engineering, design, textile research, communication, business & value development come together to create a functional and effective methodology. Our projects aim to improve the quality of life of our users.

RESEARCH

ENGINEERING

DESIGN

Components of the system

ELECTRONIC UNIT

The electronic unit measures, processes and transmits data to the App

TEXTILE UNIT

Integrated clothing with textile sensors and circuits

APP

The App allows product-user interaction by displaying detected parameters

Textile sensors

Patented
Intellectual
Property

ComfTech's textile sensors are patented, safe and efficient:

- HIGH SIGNAL QUALITY
- SOFT AND FLEXIBLE
- HYPOALLERGENIC
- COMFORTABLE

Advantages of textile solutions

- They do not hinder movement or interfere with daily activities
- Sensors do not need to be placed on the body, as they are integrated into the garment
- They reduce the perception of illness by being normal clothing
- They allow continuous and non-invasive monitoring
- They feature tested sensors and textile circuits
- They are machine washable
- They provide endless possibilities for customisation

Weight: 31 g

Communication: Bluetooth® v4.2 Low Energy

Battery duration: 30 hours with continuous transmission

Degree of protection IP 22

Risk class: IIb

CONFIDENTIAL MATERIAL

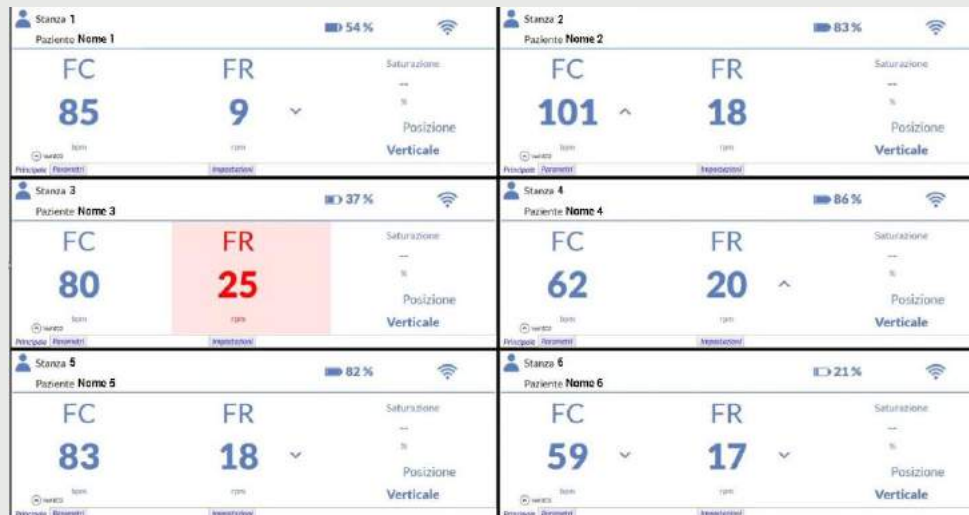

- ## REHABILITATION APP

- ## REPORT

Central monitor

REAL-TIME DATA

The central monitor is ComfTech's software that allows to view data from several HOWDY devices on one screen at the same time, with no distance limits. It makes possible to easily follow the parameters of several patients.

CONFIDENTIAL MATERIAL

Benefits | Residential Care Facility and Nursing Home

User

Increased sense of safety.

Family

Greater peace of mind provided by the security of the family member's health.

Healthcare Personnel

Patient monitoring and easy control of several different patients.
Safer monitoring of unstable patients.
Identification of risk targets.

Doctor

Clinical risk reduction and correct timing for hospital readmission.
Fall risk stratification.

Physiotherapist

Objective data, possibility of deficit assessment tests.
Verification of rehabilitation effectiveness.
Possibility of understanding the patient's fatigue and establishing the daily programme.
Stratification of fall risk.

Facility

Reducing staff workloads during the night shift.
Possibility to "sell" the service to family members.
Possibility of keeping patients longer, reducing the need for hospitalisation.
Legal protection.

CONFIDENTIAL MATERIAL

Benefits | Sheltered housing

User

Increased safety and therefore independence, which allows the maintenance of physical activities and social relationships.
Stimulation to maintain an active lifestyle.

Family

Greater peace of mind thanks to the security of the family member's health .

Facility

Additional service "saleable" to customers.
Medical-legal protection.

CONFIDENTIAL MATERIAL

Services

BASIC:

- Room
- Mobility
- Rehabilitation

ADDITIONAL:

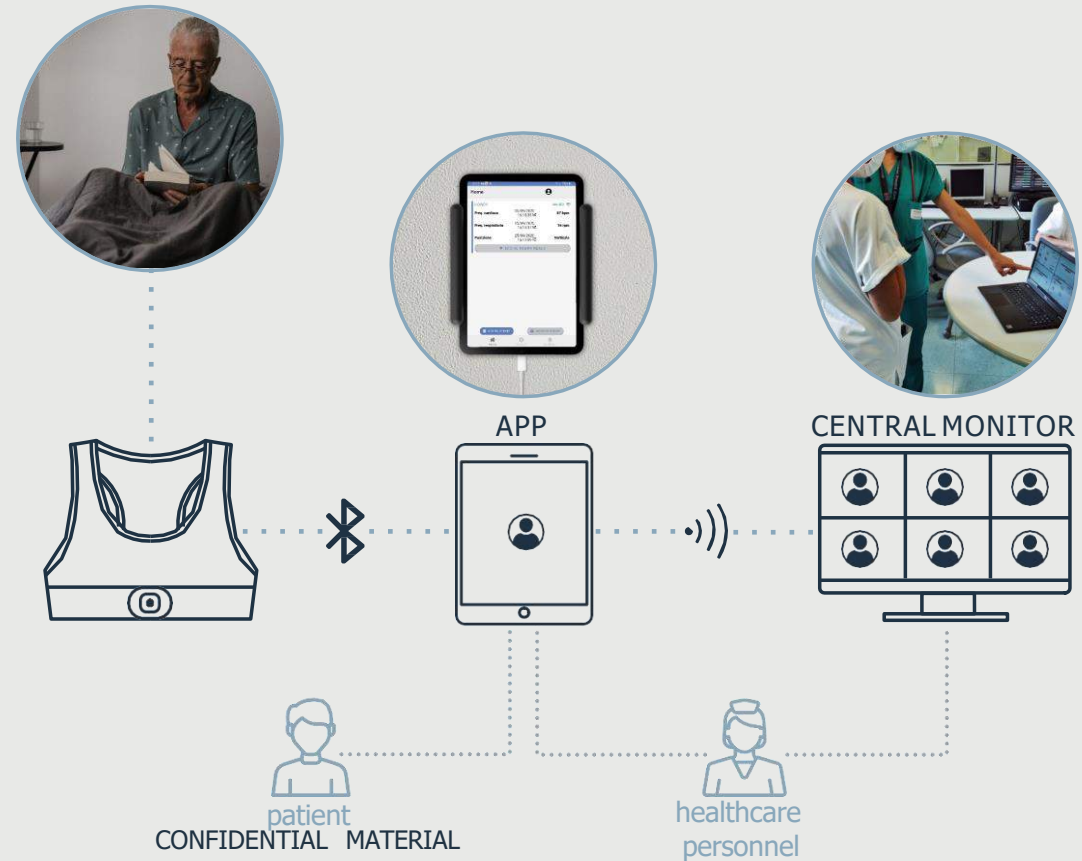

- Additional Rehabilitation Service

SERVICES

Room

Suitable for in-room monitoring of patients and night monitoring.

- Monitoring of vital parameters both day and night, in absolute comfort and freedom of movement.
- Sleep quality monitoring through assessment of basal pulse and HRV, fatigue index.
- Monitor any movements in the room during the night and position in the bed.

SERVICES

Room

Suitable for in-room monitoring of patients and night monitoring.

-
- Safety for guests and families
 - Reduced workload for caregivers: support in procedures and identification of risk situations (altered vital parameters, movement where not allowed, unbalancing, prolonged and single position bedding - decubitus).
 - Objective data and reporting to support doctors' decisions.
 - Correct timing of patient transfer to hospital.

Includes:

- **Fixed tablet** for setting up and displaying front-of-patient data
- **Electronic unit** with **medical App**
- **Battery charger**
- **Centralising software**
- **Laptop** for remote data display
- **4 sensorised garments** per year per bed

Optional:

- **Pulse oxymeter**
- **Thermometer**
- **Additional garments**

Possibility of adding the Rehabilitation Service

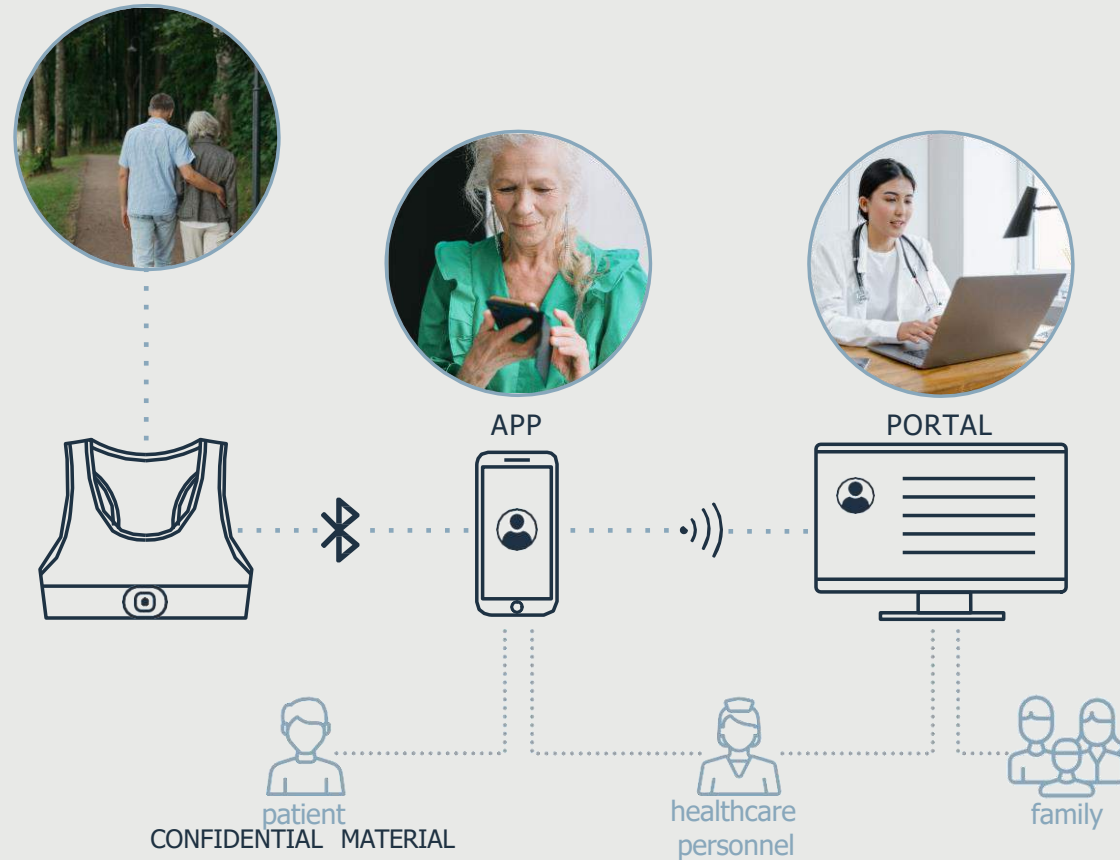

CONFIDENTIAL MATERIAL

SERVICES

Mobility

Suitable for monitoring independent patients in long term care facilities and possibly outside. Makes it possible for healthcare staff and relatives to view the data.

- Monitoring of vital parameters during daily activities and at night, in comfort and non-invasively.
- Monitoring of sleep quality and fatigue to define alerts.

SERVICES

Mobility

Suitable for monitoring independent patients in long term care facilities and possibly outside. Makes it possible for healthcare staff and relatives to view the data.

- Monitoring of vital parameters during daily activities and at night, in comfort and non-invasively.
- Monitoring of sleep quality and fatigue to define alerts.

Includes:

- **Smartphone** for managing, sending and displaying patient data **supplied to the patient**
- **SIM card**
- **Electronic unit** with **medical App**
- **Battery charger**
- **Telemonitoring Portal connection**
- **2 sensorised garments** per year per bed

Optional:

- **Pulse oxymeter**
- **Thermometer**

Possibility of adding the Rehabilitation Service

CONFIDENTIAL MATERIAL

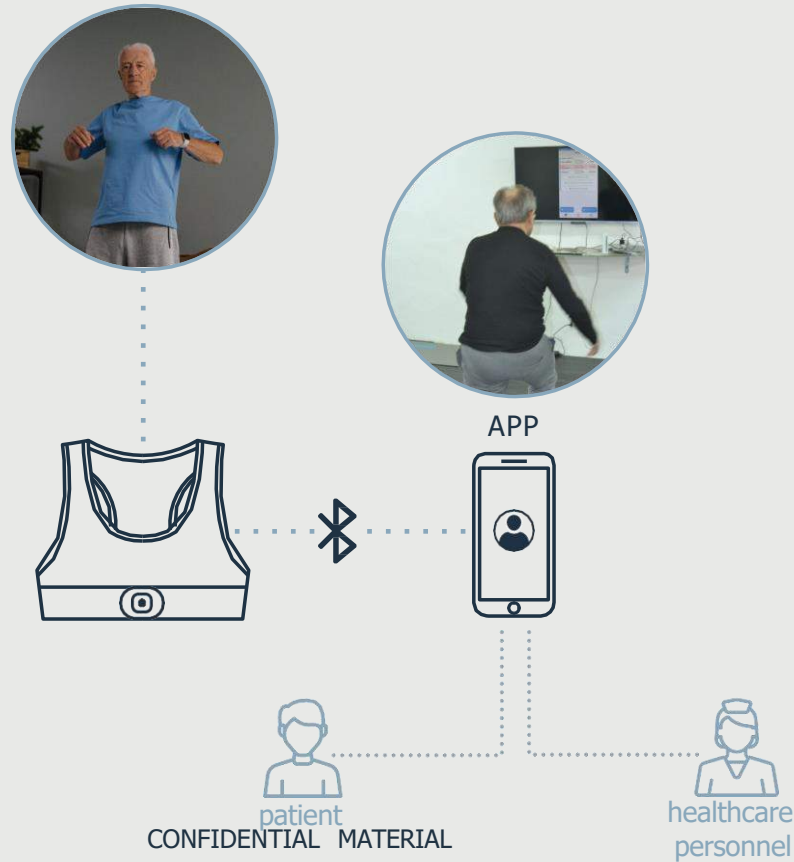

SERVICES

Rehabilitation

on-site gym

Service for patient gait assessment, fall risk stratification with gait analysis and monitoring of vital parameters during rehabilitation or exercise.

- Useful in the facility and for remote rehabilitation.
- Possibility to easily and effectively assess gait quality through validated tests (e.g. 6 Minute Walking Test).

SERVICES

Rehabilitation

on-site gym

Service for patient gait assessment, fall risk stratification with gait analysis and monitoring of vital parameters during rehabilitation or exercise.

- Useful in the facility and for remote rehabilitation.
- Possibility to easily and effectively assess gait quality through validated tests (e.g. 6 Minute Walking Test).

Includes:

- **Smartphone for managing, sending and displaying data provided to healthcare staff**
- **2 Electronic units**
- **2 Battery chargers**
- **Rehabilitation App**
- **1 sensorised garment** per patient

Optional:

- Garments for additional patients

CONFIDENTIAL MATERIAL

Mediwhale INC.

James Lim, PhD

Business Director

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Retinal-based AI-enabled Personalised Cardiovascular Disease Risk Assessment

First retinal-based personalised cardiovascular disease risk assessment to have received *CE mark*

- *100% Software-as-a-Medical-Device*
- *Compatible with commercially available retinal cameras*
- *Real-time analytic of retina images for personalised CVD risk assessment*
- *Predictive performance comparable with CT-measured coronary artery calcium score*
- *Received CE mark, approvals with MHRA, TGA, HSA, MDA*
- *Suitable for general population risk screening for awareness and discovery of hidden CV diseases*
- *Suitable for family doctors for risk refinements*

Community-level CVD Risk Screening

Improves accessibility, affordability, and operability

Mediwhale Inc. is looking for partners interested in:

- *Distributing*
- *Piloting*

Potential deployment sites

- *Optometrist offices,*
- *Optical chains,*
- *Pharmacy chains,*
- *Elderly centers,*
- *Family clinics, and*
- *Tertiary hospitals*

Personalised

Provides snapshot of current 10-year risk level

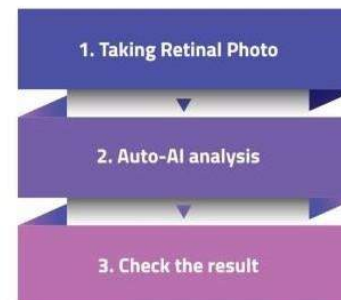

Clinically comparable to coronary artery calcium risk score

C-index: 0.71
NRI: 0.261

Accessible

5-min risk screening platform

Sustainable

Promotes screening continuum

1. Requires ONLY retina image
2. Real-time result
3. Camera brand agnostic
4. Easily integrated with GP EMR
5. Promotes self-awareness
6. Improvement in behavioural modifications

Consumer insight → Risk modification → Disease interception

Distributor/Interested Parties for Piloting

Seeking local partner(s) who is interested to distributor in ophthalmic and/or ophthalmology sector, pharmacy, family doctor clinics, and tertiary hospitals

Seeking parties who are interested in local piloting

Other to any markets

Non-invasive real-time personalised CVD risk score

Clinically comparable to CAC risk score

Cloud-based SaMD solution with no installation needed

Additional benefits of Reti-Intelligence® Platform

1 set of retinal image, 4 diagnostic capabilities

1 set of retinal image,

Single process,

4 diagnostic capabilities

Reti-CVD®

Provides personalised CVD risk score

Reti-EYE®

Provides referable eye disease detection
diabetic retinopathy, maculopathy, glaucoma, cataract

Reti-CKD®

Provides personalised CKD risk score
e.g. Rapid kidney function decline in patients
(CE marking expected in 2023)

Reti-AGE®

Provides biological age and mortality
(CE marking expected in 2024)

End Vision: A retinal-based platform for lifelong risk screening

Chemistry Team Experience & Service Design

Bas Berkhout

Commercial Director

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Description of the organisation

The user always at the centre of our work

It's in the name

Chemistry was founded in 2000 with the belief that great ideas come from the synergy of minds. Today we are an Experience Design consultancy, based in **Amsterdam & Singapore**, driven by an international team of multidisciplinary creatives.

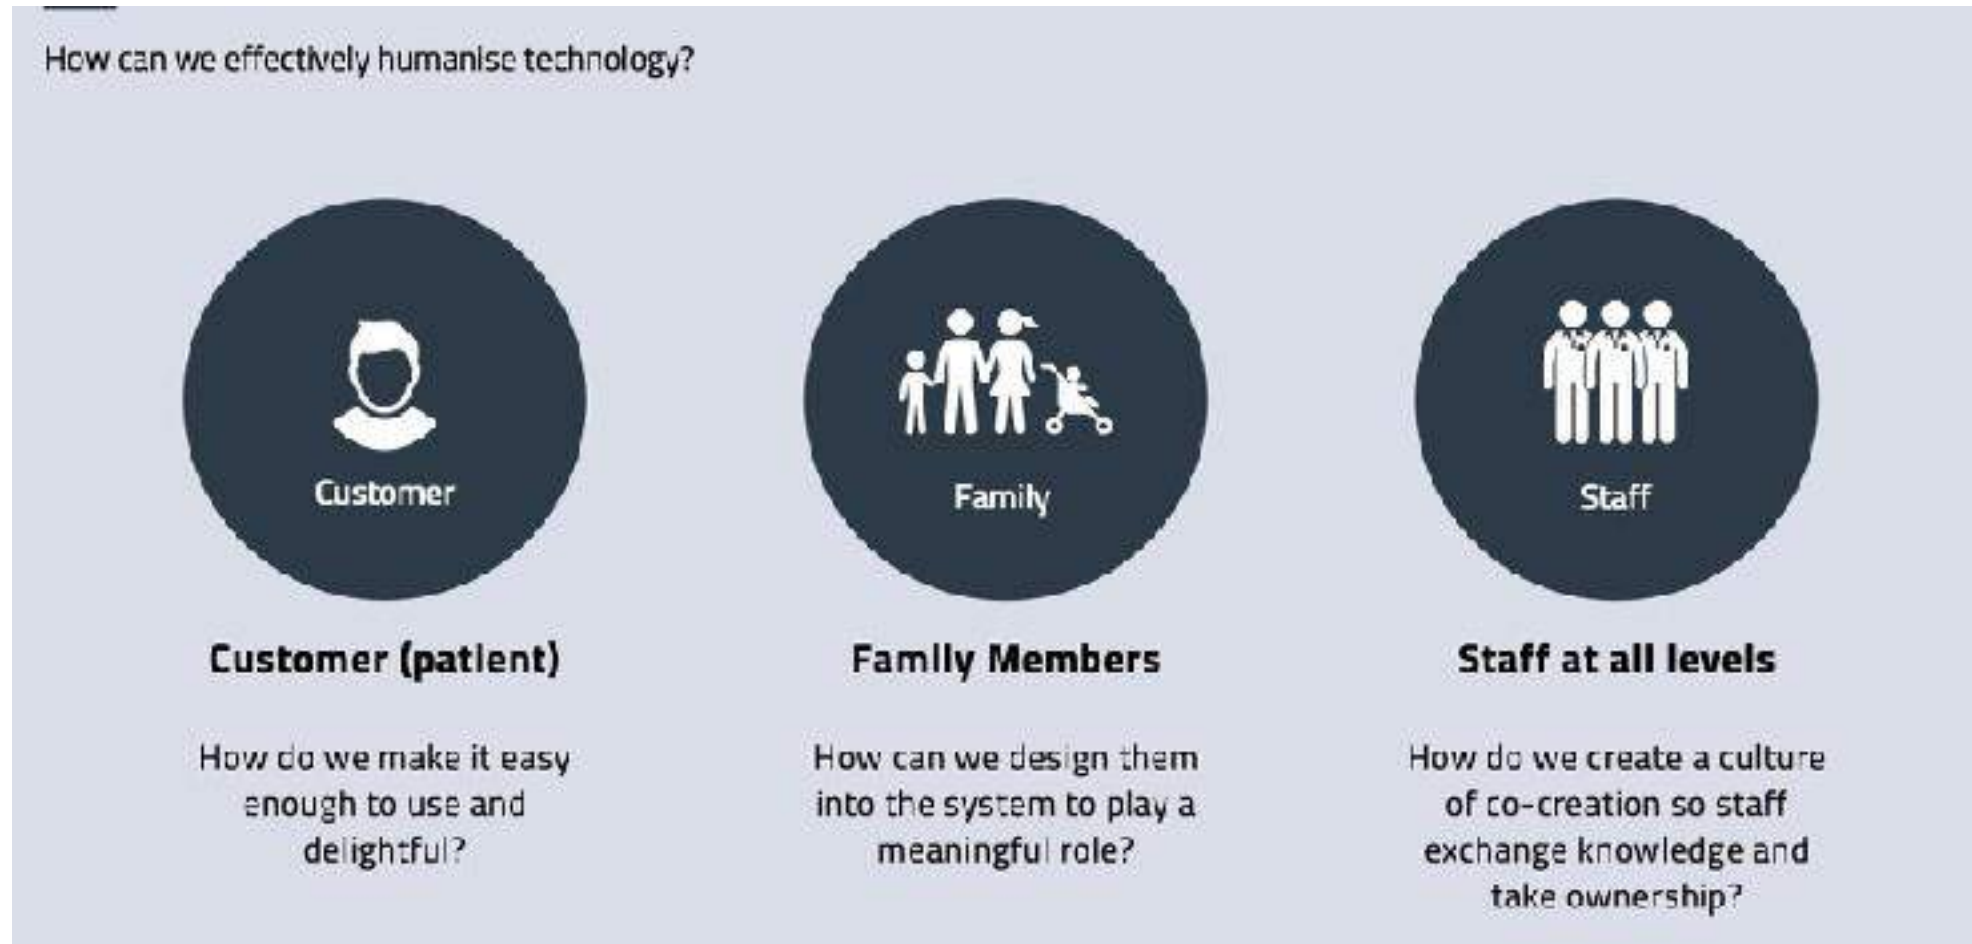

The user at the centre of our work

At Chemistry we are putting people at the centre of our thinking. We act as the catalyst to enable different domains in creating relevant and meaningful products and services.

Cooperation idea (if applicable)

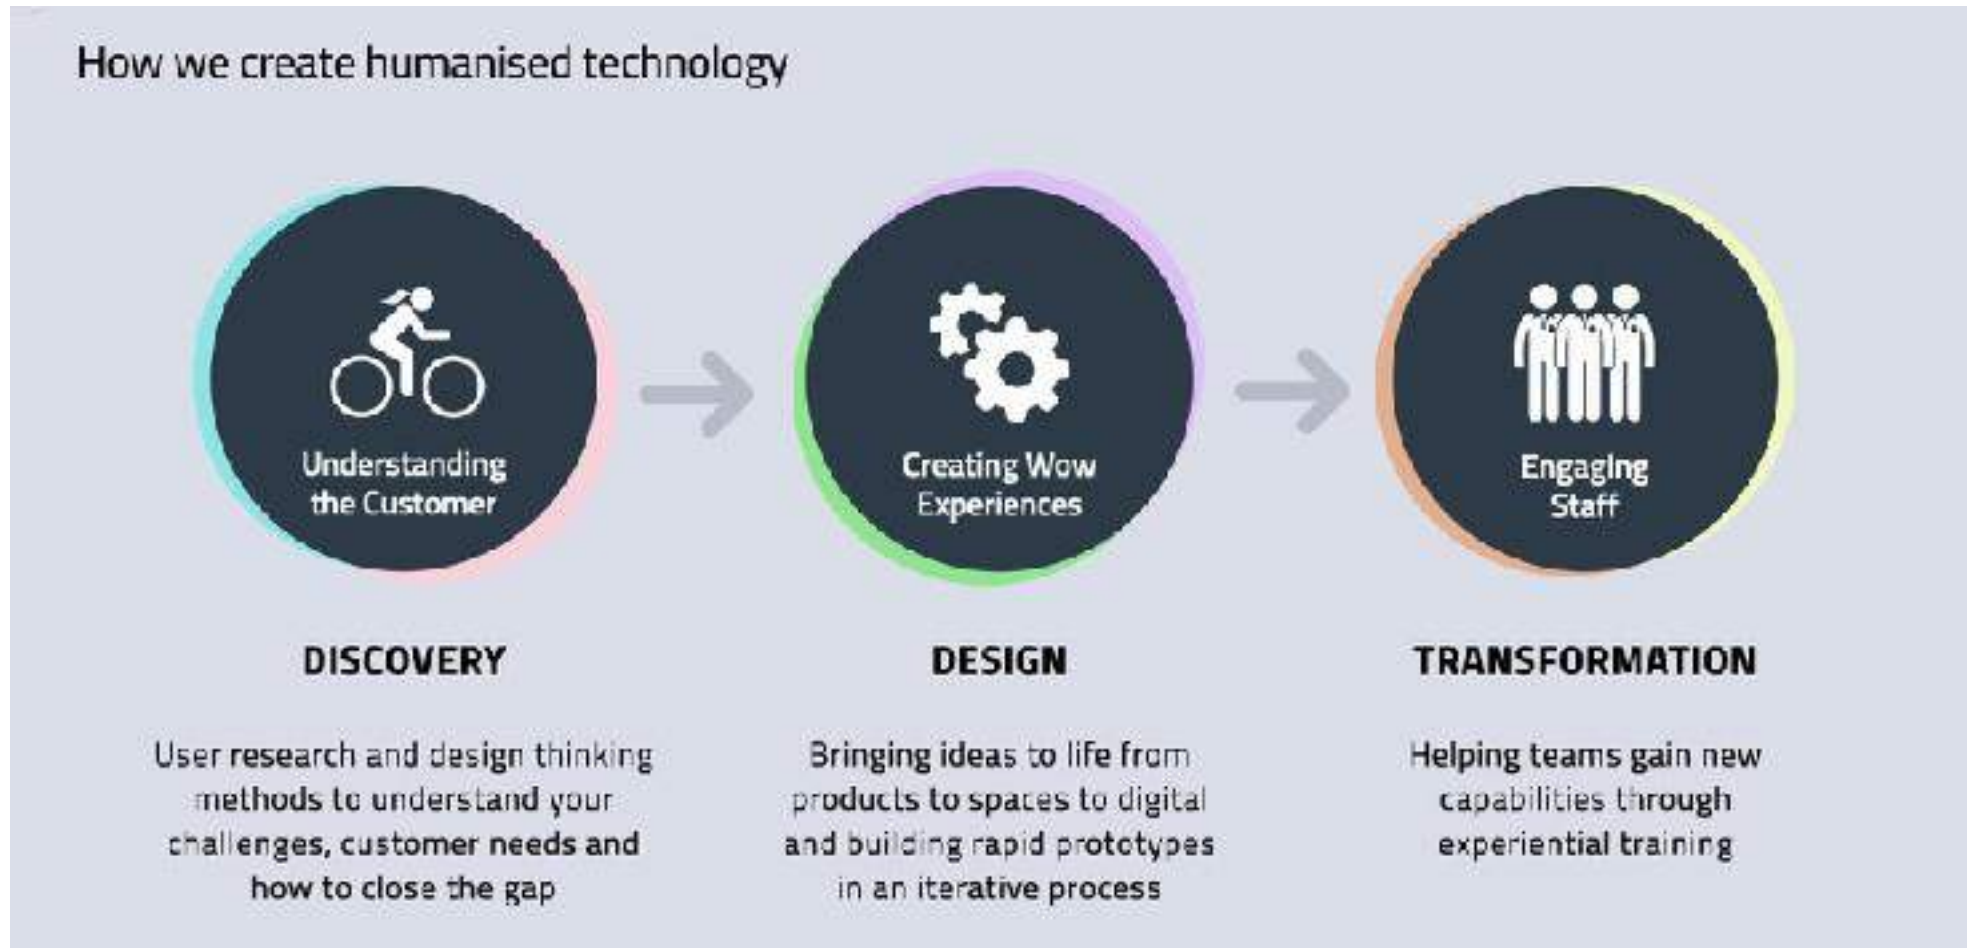

The challenges of technology adoption

For healthy living, later living, assisted living, hospitals, care homes etc.

Expertise offer

Our approach to (digital) transformation

Contacts

Just a click, call or ping away

Thank You!

We look forward to exploring future opportunities together.

Project Ipsilon

Gamified dementia screening and monitoring app with music playing

Yayoi Sakaki

Founder/ CEO, Project Ipsilon

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Gamified cognitive screening and monitoring with music playinng to generate data for analysis

Project Ipsilon is a SME based in Rotterdam, The Netherlands and develops gamified cognitive screening and monitoring app for dementia, using music playing design to generate responses for analysis. It is sensitive to detect precursor dementia stages which helps to deliver preventive care pathway among high risk patients with comorbidities to routinely screen and monitor cognitive functions to facilitate early intervention to prevent and/or delay the dementia onset.

Co-development of dementia prevention pathway: early risk detection and monitoring enables early intervention

We help screen and monitor dementia high risk patients with comorbidities, such as cardiovascular issues and diabetes but otherwise healthy, to enable preventive care pathway to detect cognitive decline at earliest stage to facilitate intervention by either healthy lifestyle and/or pharmacological therapy. By working with hospitals and clinics to promote integrated care for body and mind proactively, not only we can reduce dementia risk but help optimize holistic, healthy, happy aging together.

Expertise request (if applicable)

We are in search of pilot partner to implement our solution with incentive of supplying our solution as our early customers upon successful pilot completion. We are also in search of investments for regulatory certification filing process and scale-up.

Our expertise is cognitive screening and monitoring software to enable routine remote self-care of elderly which is easy to use, accurate and functions as diagnostic aid for dementia. We use music playing game to generate responses and analyze the data with proprietary algorithms. Unlike other cognitive tests, our solution is repetition-proof. We are in preparation for phase 2 study to validate our capability as digital diagnostic biomarker for prodromal stages of dementia.

Probando is the key.

WHY

8 times more active

For us, participants (healthy and diseased) are not simply numbers in a database. **The community idea is written with a capital C** in our company and is also reflected in the activity of our users.

Fast

With Probando, patients find perfect studies for their needs quickly due to the comprehensibility and easier access. This allows us to **reach the recruitment target 15-20% faster.**

Full service

We are a solid partner for you when it comes to special requirements. **We accompany and support your recruiting** over the whole course of your study.

Visibility

Through targeted performance marketing and high reach channels, **we help you to quickly find the participants who exactly meet your requirements.** All marketing documents are (if necessary) prepared for and approved by the ethics committee.

SciFY (Science For You)

Paul Isaris

Software Engineer / Project Manager

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

SciFY is a not-for-profit organization

- Develops cutting-edge information technology systems
- Freely offers them to all, including the design, the implementation details, and the support needed, in order to solve real-life problems.
- Expertise in Artificial Intelligence and Assistive Technologies
- Experience in EU Projects (H2020, Erasmus+)
- Games for the blind, News app powered by AI, e-democracy apps, and more.

Dianoia

- Mobile app (Android) that freely offers a variety of printable cognitive exercises for people with early-stage Dementia
- It is widely used in Greece by prominent organizations

The application is addressed to:

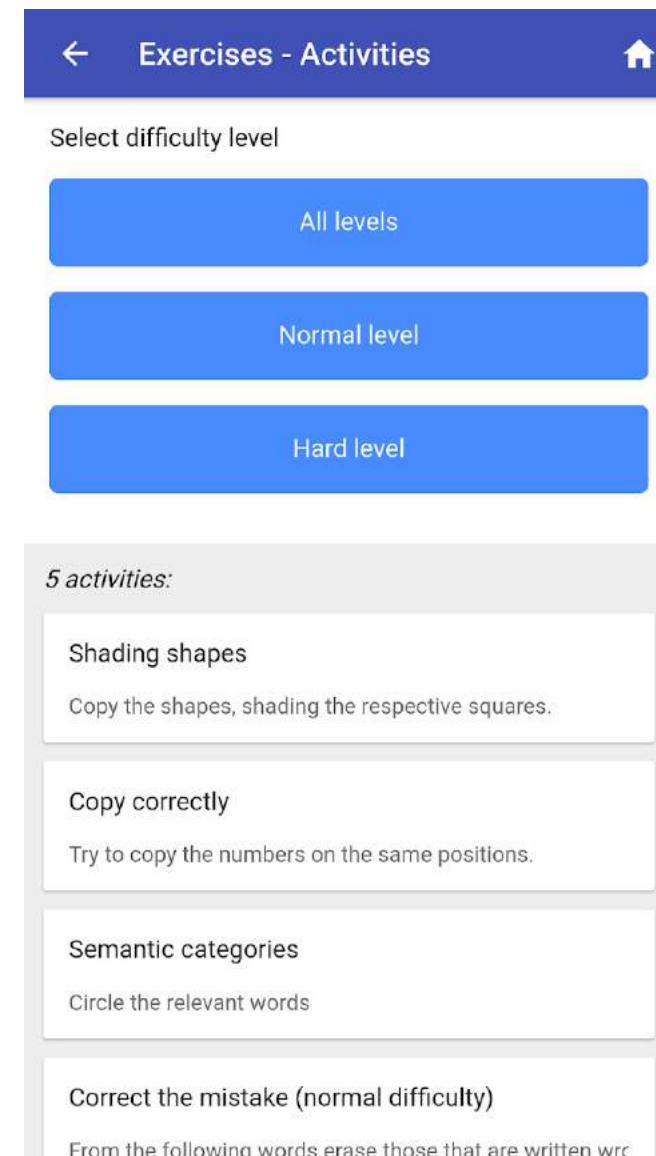

- **Carers** of people dealing with dementia (family and professionals)
- **Health professionals** working in the field of dementia

We are seeking Dementia experts who will create printable cognitive exercises for the “[Dianoia Marketplace](#)”, which is a content-creation web app for Dianoia.

Languages: Greek, English, Spanish, Italian

Created content will be attributed to the creators, offering visibility.

Category: *Independent and connected living.*

The screenshot shows the 'Exercises - Activities' screen of the Dianoia app. At the top, there is a blue header with a back arrow, the title 'Exercises - Activities', and a home icon. Below the header, the text 'Select difficulty level' is displayed. There are three blue buttons stacked vertically: 'All levels', 'Normal level', and 'Hard level'. Below these buttons, the text '5 activities:' is shown. A list of five activities follows, each in a white box with a light gray border: 'Shading shapes' (with the instruction 'Copy the shapes, shading the respective squares.'), 'Copy correctly' (with the instruction 'Try to copy the numbers on the same positions.'), 'Semantic categories' (with the instruction 'Circle the relevant words'), 'Correct the mistake (normal difficulty)' (with the instruction 'From the following words erase those that are written wrc'), and a partially visible fifth activity.

Cooperation idea #2: Enrich “Talk&Play” app with content

Talk & Play

- Desktop app (Windows / Linux) that allows users with motion problems to **communicate** and **train cognitive skills**.
- Uses communication cards and simple games

The application is addressed to:

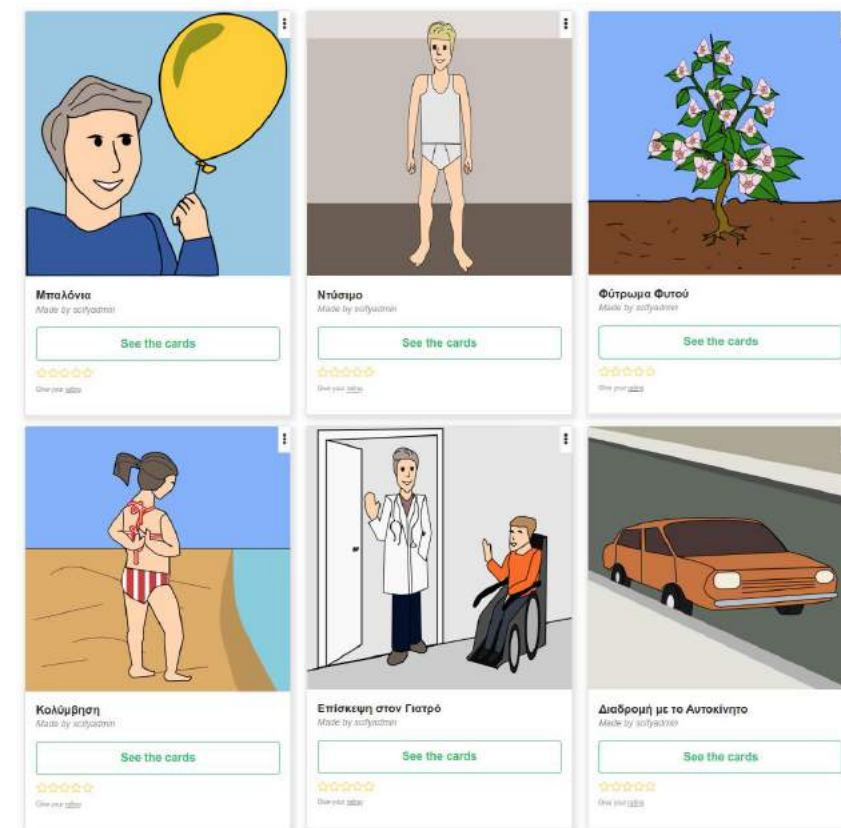

- People with **aphasia** (e.g. due to brain damage from stroke).
- People who have **communication issues** due to movement impairments and difficulties in speech (e.g. tracheostomy combined with mobility limitations)

We are seeking health experts in order to provide content (communication cards and/or simple cognitive exercises) for the “[Talk & Play Marketplace](#)”, which is a content-creation web app for Talk & Play.

Languages: Greek, English, German

Created content will be attributed to the creators, offering visibility.

Category: *Independent and connected living.*

Dementia-related organizations for the Dianoia dementia app

- The ideal partner would be an organization that has expertise and experience in dealing with early stage dementia.
- The partner is expected to create **printable cognitive exercises** and upload it on the dianoia Marketplace
- The partner gains visibility by users and professionals both in the app and in the marketplace

Organizations dealing with cerebral palsy and related problems for the Talk and Play app for people with cerebral palsy

- The ideal partner would be an organization that has expertise and experience in dealing with cerebral palsy and related problems. Since the content (e.g. the communication cards) also include a graphic dimension (the image of the card), the partner would need to also create and provide the image.
- The partner is expected to create communication cards and/or simple cognitive exercises.
- The partner gains visibility by users and professionals both in the app and in the marketplace

Expertise offer (if applicable)

SciFY offers technical and consultation services

Fields of expertise: **Artificial Intelligence, Technical Consulting, Architecture / Implementation of Software**

What we offer:

- **AI-focused** executive trainings
- Software **engineering** and **consulting** for A.I. integration into existing health-related workflows
- Assistive technologies **design** and **implementation**
- **Software development** for accessibility support
- Health-related, gamification-powered co-creation platforms

Duervation

Mona Dür

CEO/Duervation GmbH

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Description of the organisation

Facilitator between HealthTech developers and users

SME, Start up & Healthtech consultant

*Duervation helps companies to **develop** and **implement** health technologies in such a way that they are readily adopted by end users.*

*Duervation knows the **needs of patients, family caregivers, health professionals and health care providers** and the **requirements** related to **health care settings**.*

*Duervation acts as **facilitator** between health technology **developers** and **users** and helps companies to **understand** the **real needs** and **user requirements** of health technologies.*

Cooperation idea

Co-creative development and implementation of health technologies

*We want to collaborate with **manufacturers of health technologies** and **operators of health and social care facilities** in the development and implementation of health technologies.*

*Our special interest goes to health technologies that are used for **health care, health promotion and health optimization** such as **health information systems, ambient assisted living tools, telehealth devices, wearables**, and their implementation in different settings like **hospitals, nursing homes, and living environment**.*

Expertise request

Manufacturer, developers and health service providers

*We are looking for cooperation in **software, app, digital solutions, Healthtech and MedTech** development and implementation in different target groups, including **healthy persons, patients, family caregivers and health professionals**.*

We want to cooperate with Healthtech **manufacturers and developers** and with **health and social care providers** who implement health technologies.

Expertise offer

Co-creative development and implementation of health technologies

Our team has ...

- *high competences in **user- and human-centered design, co-creative, innovation-fostering, and scientific methods** for the development and implementation of health technologies,*
- *rich experience in **health care,***
- *broad **understanding** of the **real needs of patients, family caregivers, and providers** of health and social care,*
- *in-depth knowledge about **complex health care environment and processes,***
- *and great expertise in **health science, social science, and science communication.***

OPEN DEI PROJECT

Giorgio Micheletti, IDC

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

OPEN DEI is a H2020 Coordination and Support Action

DT-ICT-13-2019

Start Date: June 2019

Duration: 40 Months

Consortium: 10 Beneficiaries

Coordinator: IDC

INTERNATIONAL DATA
SPACES ASSOCIATION

OPEN DEI's Ambition: Goal and Objectives

Coordinate & Support EC's efforts in DT for Manufacturing, Energy, Agri-Food and Health & Care Sectors.
Support the Adoption of Digital Platforms and the development of LSP

Coordinate & Support **TECHNOLOGY-DRIVEN DT**:

- Common RAs
- OS Reference Implementations
- Methods and tools for Data Spaces
- Domain-specific Open Standards

Coordinate & Support **BUSINESS-DRIVEN DT**:

- Digital Maturity assessments
- Digital Skills
- Emerging Digital Technologies Uptake
- Business KPIs and Benchmarking

OPEN DEI's Instruments: Task Forces and Working Groups

Cross-Domain and Domain-Specific Instruments

CROSS-DOMAIN TASK FORCES:

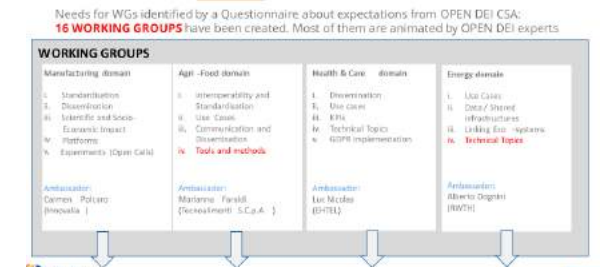

Generate technical and business knowledge in a collaborative, participative fashion:

1. TF1: Data Sharing Spaces
2. TF2: Business Ecosystem
3. TF3: Digital Platforms, Pilots and Standards
4. TF4: DT Business Impact

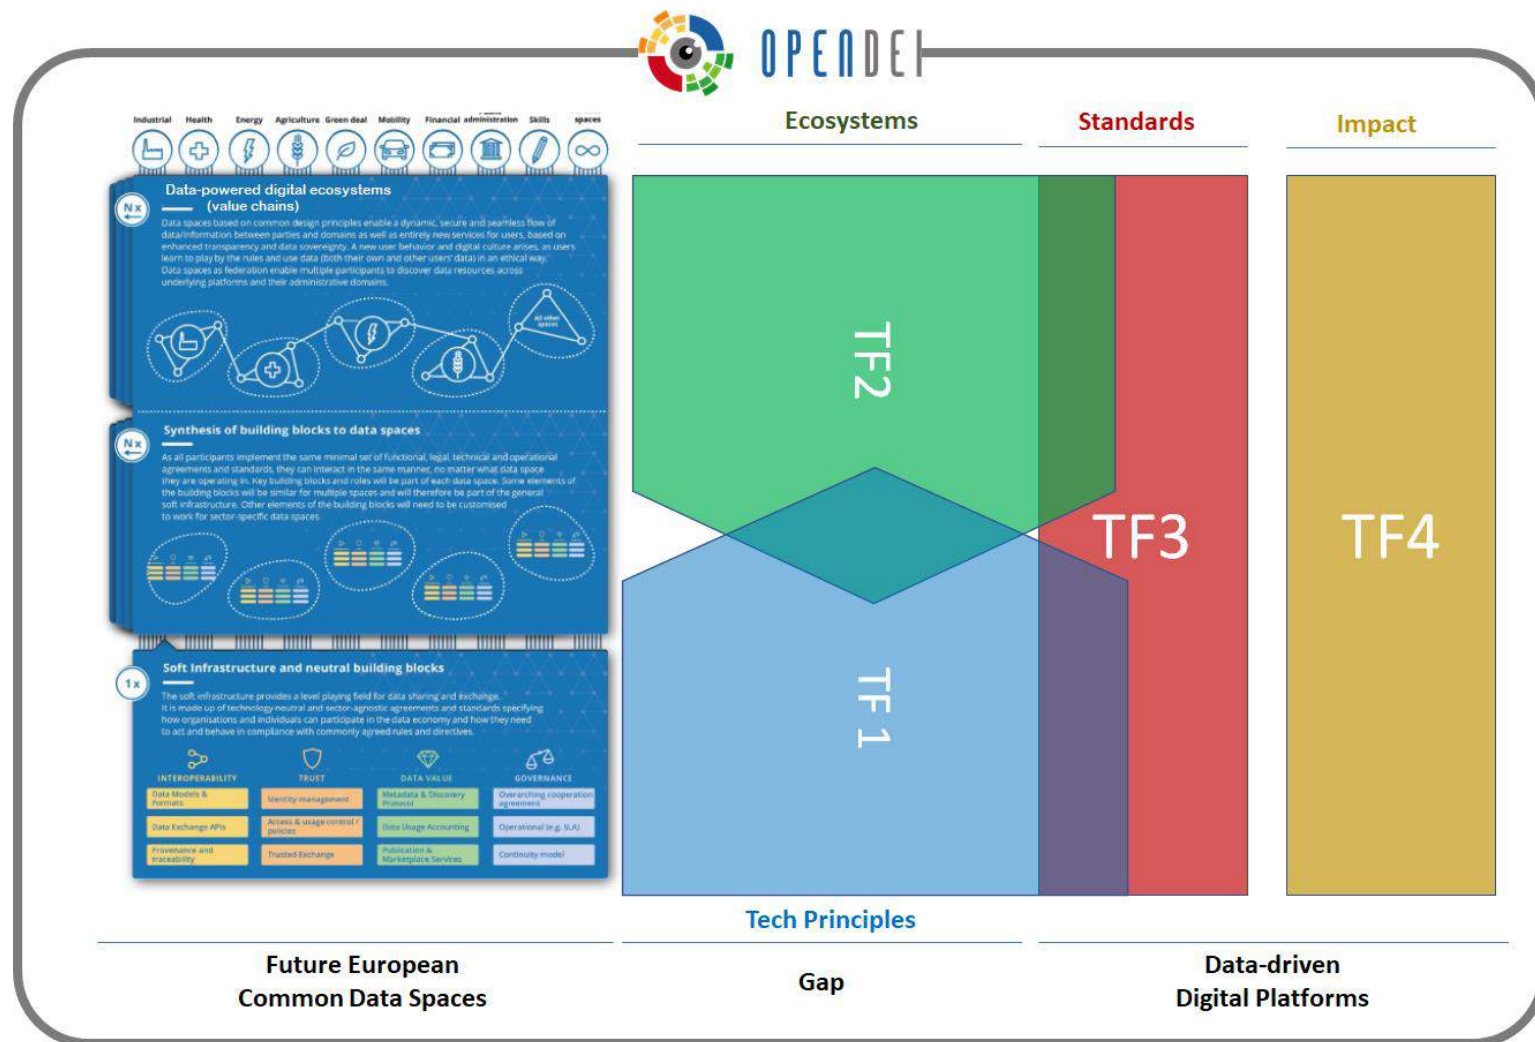

DOMAIN-SPECIFIC WORKING GROUPS

Coordinate and support LSPs ecosystem addressing common domain-specific challenges:

- Webinars
- Calls
- Discussion fora
- Prizes, awards, hack & other –thons, conferences, etc..

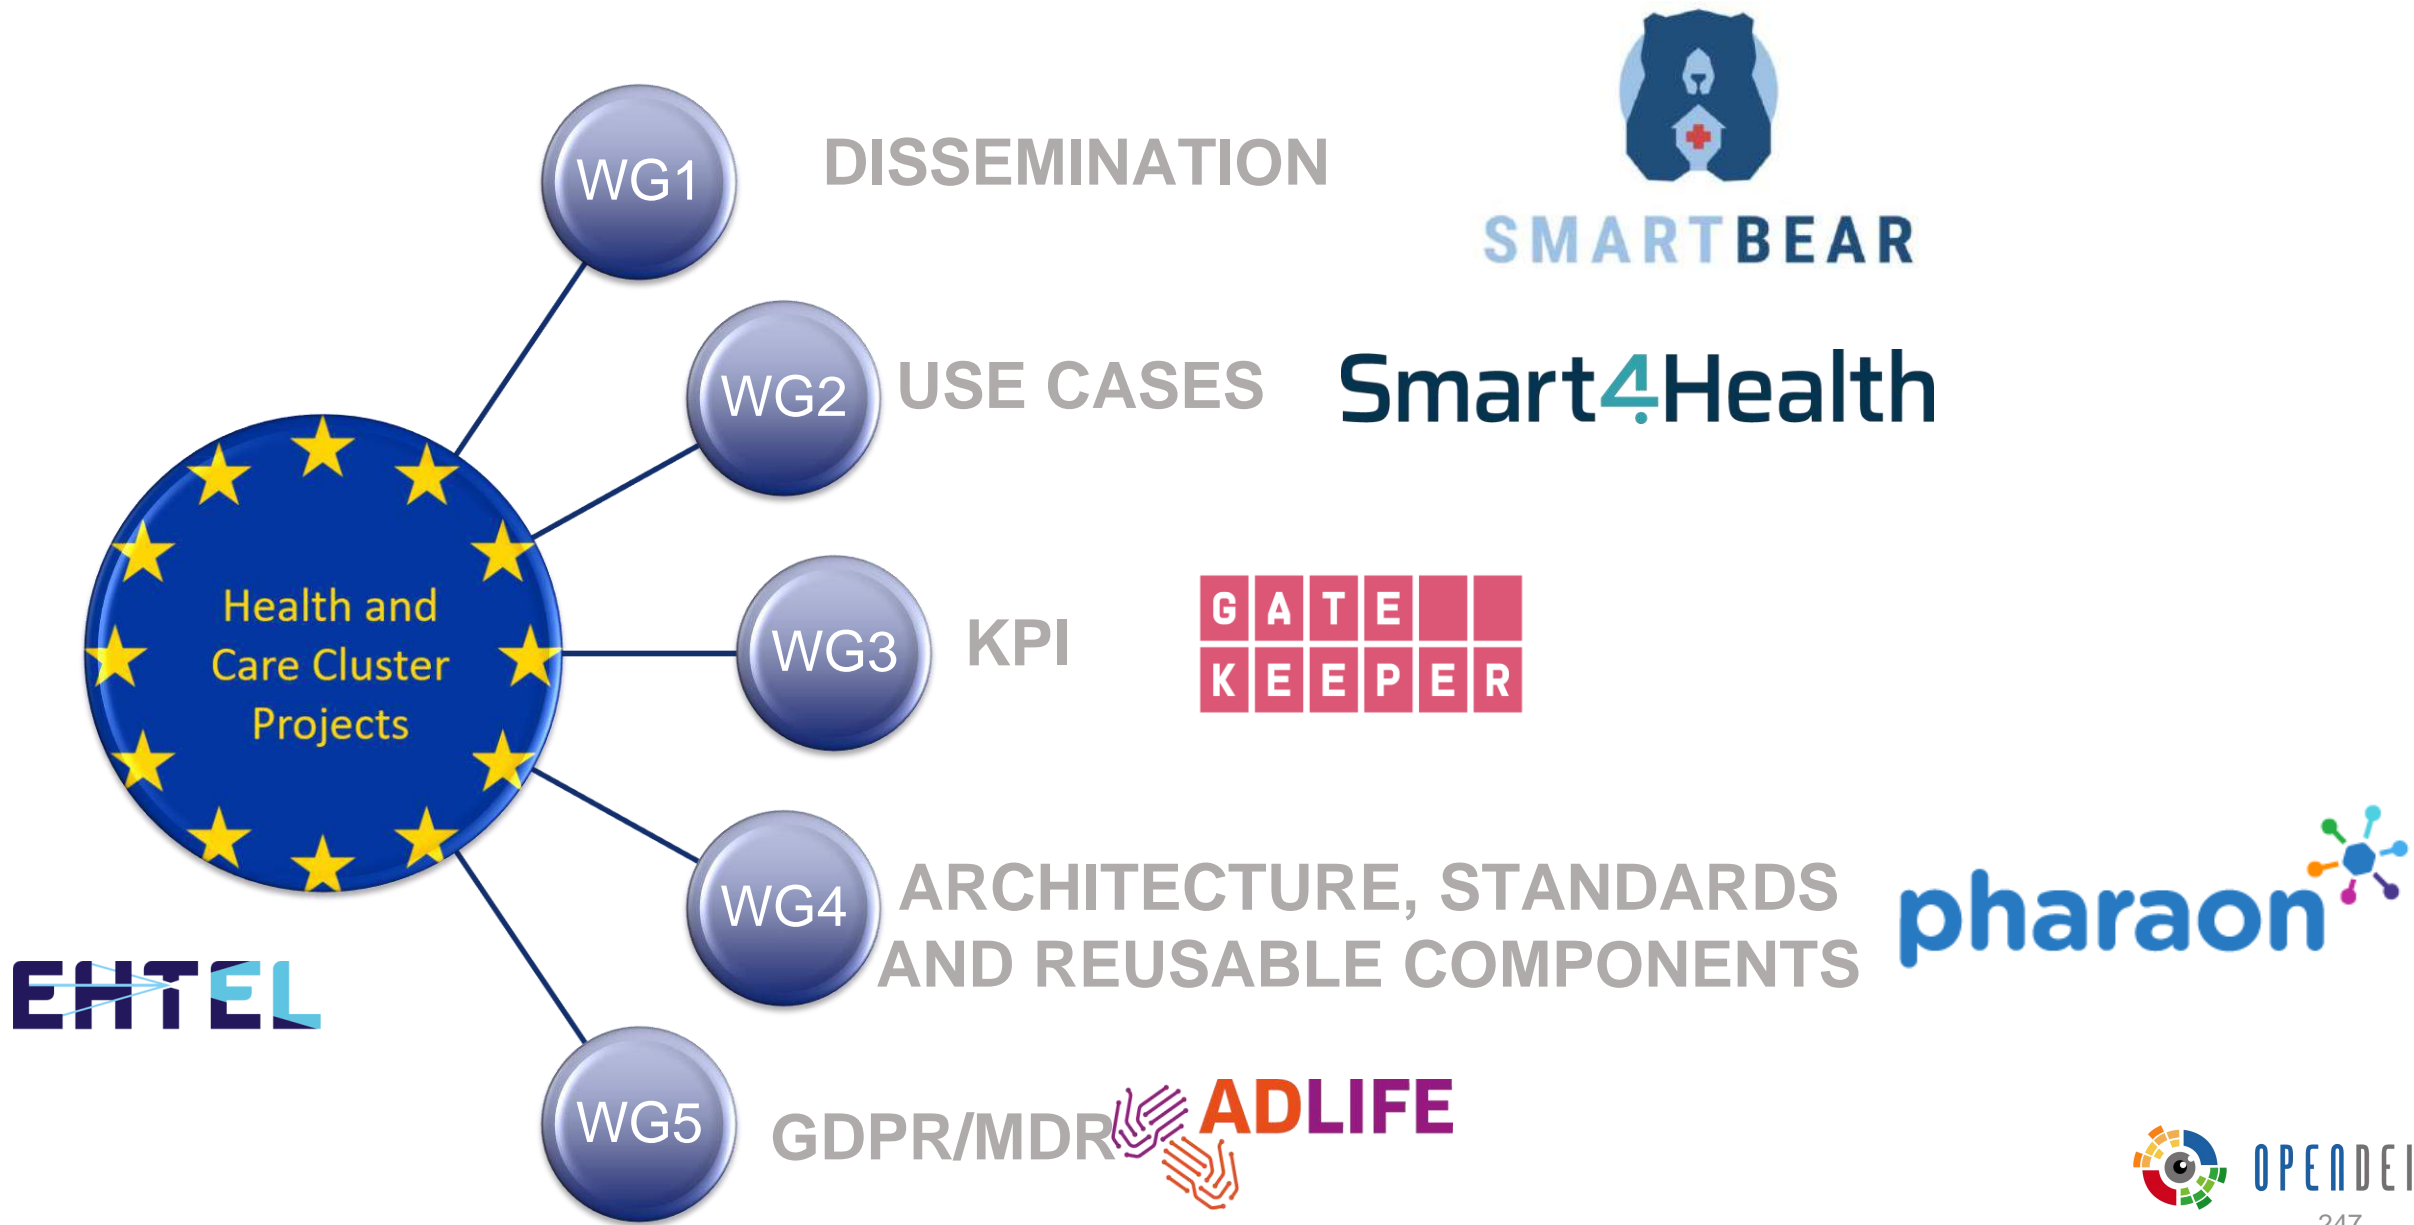

OPEN DEI Task Forces offerings

TF1: soft infrastructure and building blocks (data space design technical dimension)

TF2: guideline to build and participate data-powered digital business ecosystems based on conduct excellence

Both TFs merge together in the “Synthesis of building block to data spaces”, to guarantee the functional, legal, technical and operational agreements and standards, the key point to approach a future European common data space.

Conclusions : RA supporting digital platforms in the HC cluster

- Architectural choices, and resulting architectures, are most often made considering functional and non-functional requirements, while **technical and business constraints are in most cases only implicit.**
- Quality attributes such as **performance, interoperability, reliability, maintainability, usability, and security are often vaguely described**
- **Trade-offs**, e.g., between maximum cybersecurity and usability, are also **necessary** to balance the system but **are not sufficiently documented.**
- **Clinician-facing functions and systems should be included** as an extension to current AAL taxonomies
- A specific need to apply **privacy-enhancing techniques** in smart and healthy living solutions.
- **Performance reports**, especially ones that observe more extended running platforms and services, **are missing**, since projects end before collecting them.
- Need to **compare attributes** linked to **Performance** (in terms of latency and throughput), **Usability** (in terms of learnability and user interaction design), and **security** (in terms of confidentiality, integrity, availability)

CRANE

Comprehensive Treatment of Chronic Patients in Rural Areas

Dr. Jonathan Gómez-Raja
Chief Scientific Officer
FUNDESALUD, Government of Extremadura

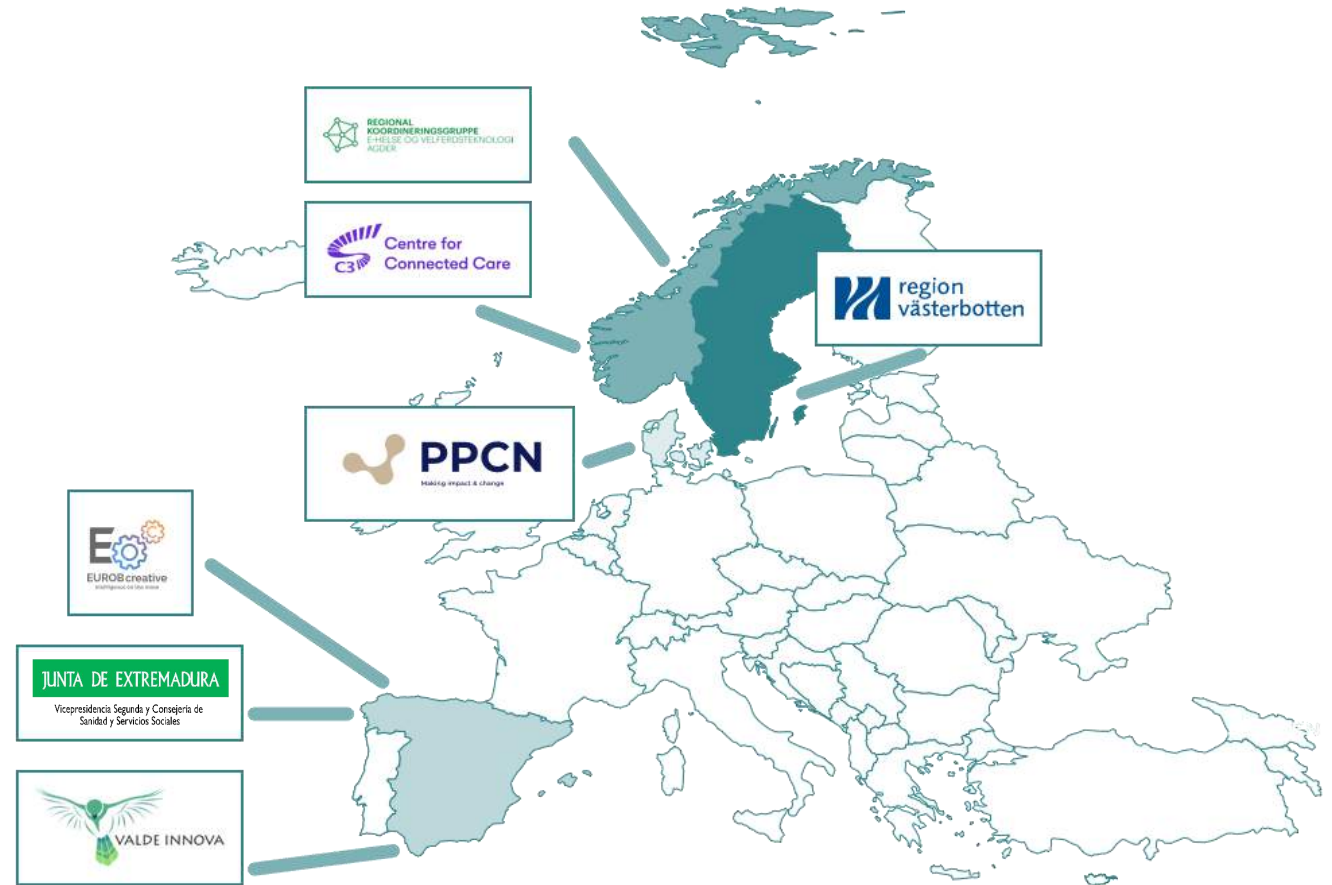

Funded by
the European Union

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 965277

Consortium

CRANE unites the efforts of **seven partners** from **four European countries** and **three rural regions** with high levels of people over 65 and a common and urgent need for health and care innovation.

Problem

The European population is ageing fast

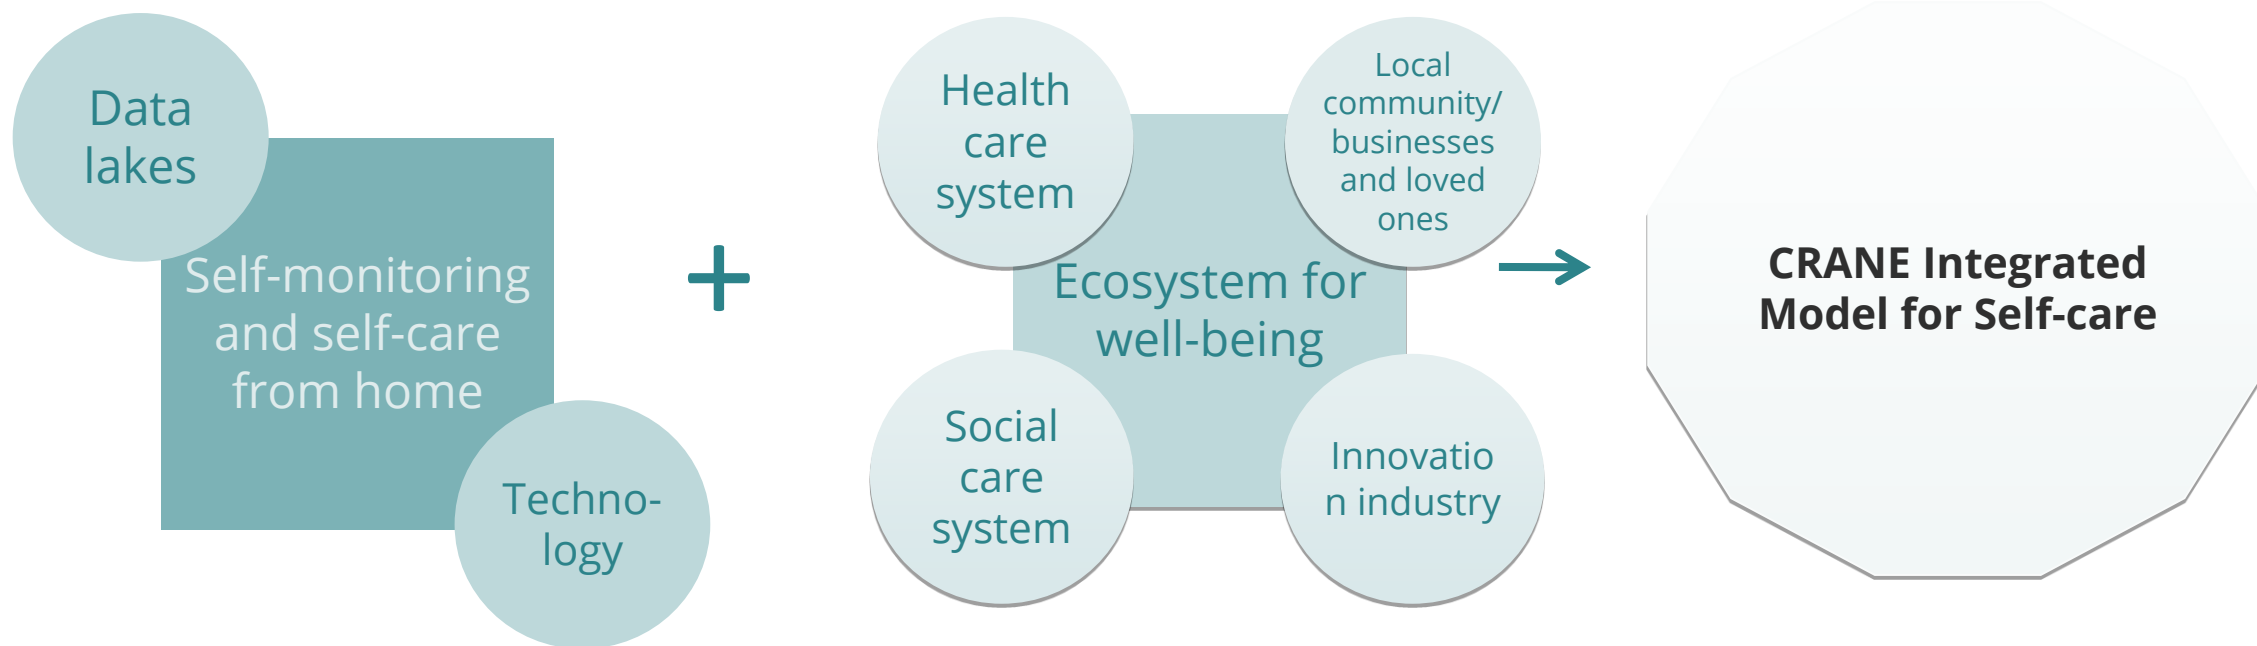

By 2050, **30%** of the population will be aged 65 years or older compared to **20%** in 2020

Population structure indicators, EU-27, 2001-2050

Solution

CRANE model for **SELF-CARE** is based in two pillars

CRANE objectives

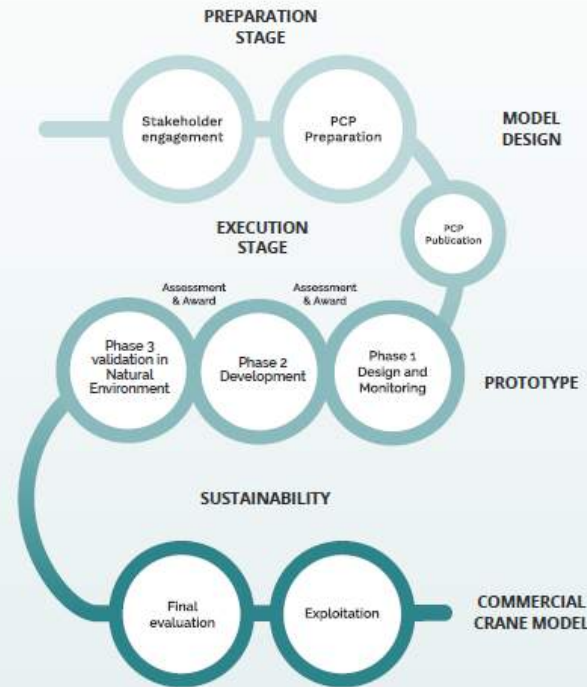

Methodology

Payback

Benefit from data lakes and open platforms to build a flexible, dynamic and personalized selfcare model to treat chronic patients at home

Enhance new business ecosystems based on ethical and transparent use of data and include local supply chain to design an all-in one value-based service

Validate the selfcare model in rural areas of distant cultures to provide a system transferable and scalable to larger cities. This will anticipate the healthcare challenges arising from an increasingly ageing population

Improved life quality of people with complex chronic diseases

An optimize use of health and care public resources

Lower need of hospitalization and emergency assistance

Reinforced social network and improved mental health of senior people

Delayed appearance of chronic diseases

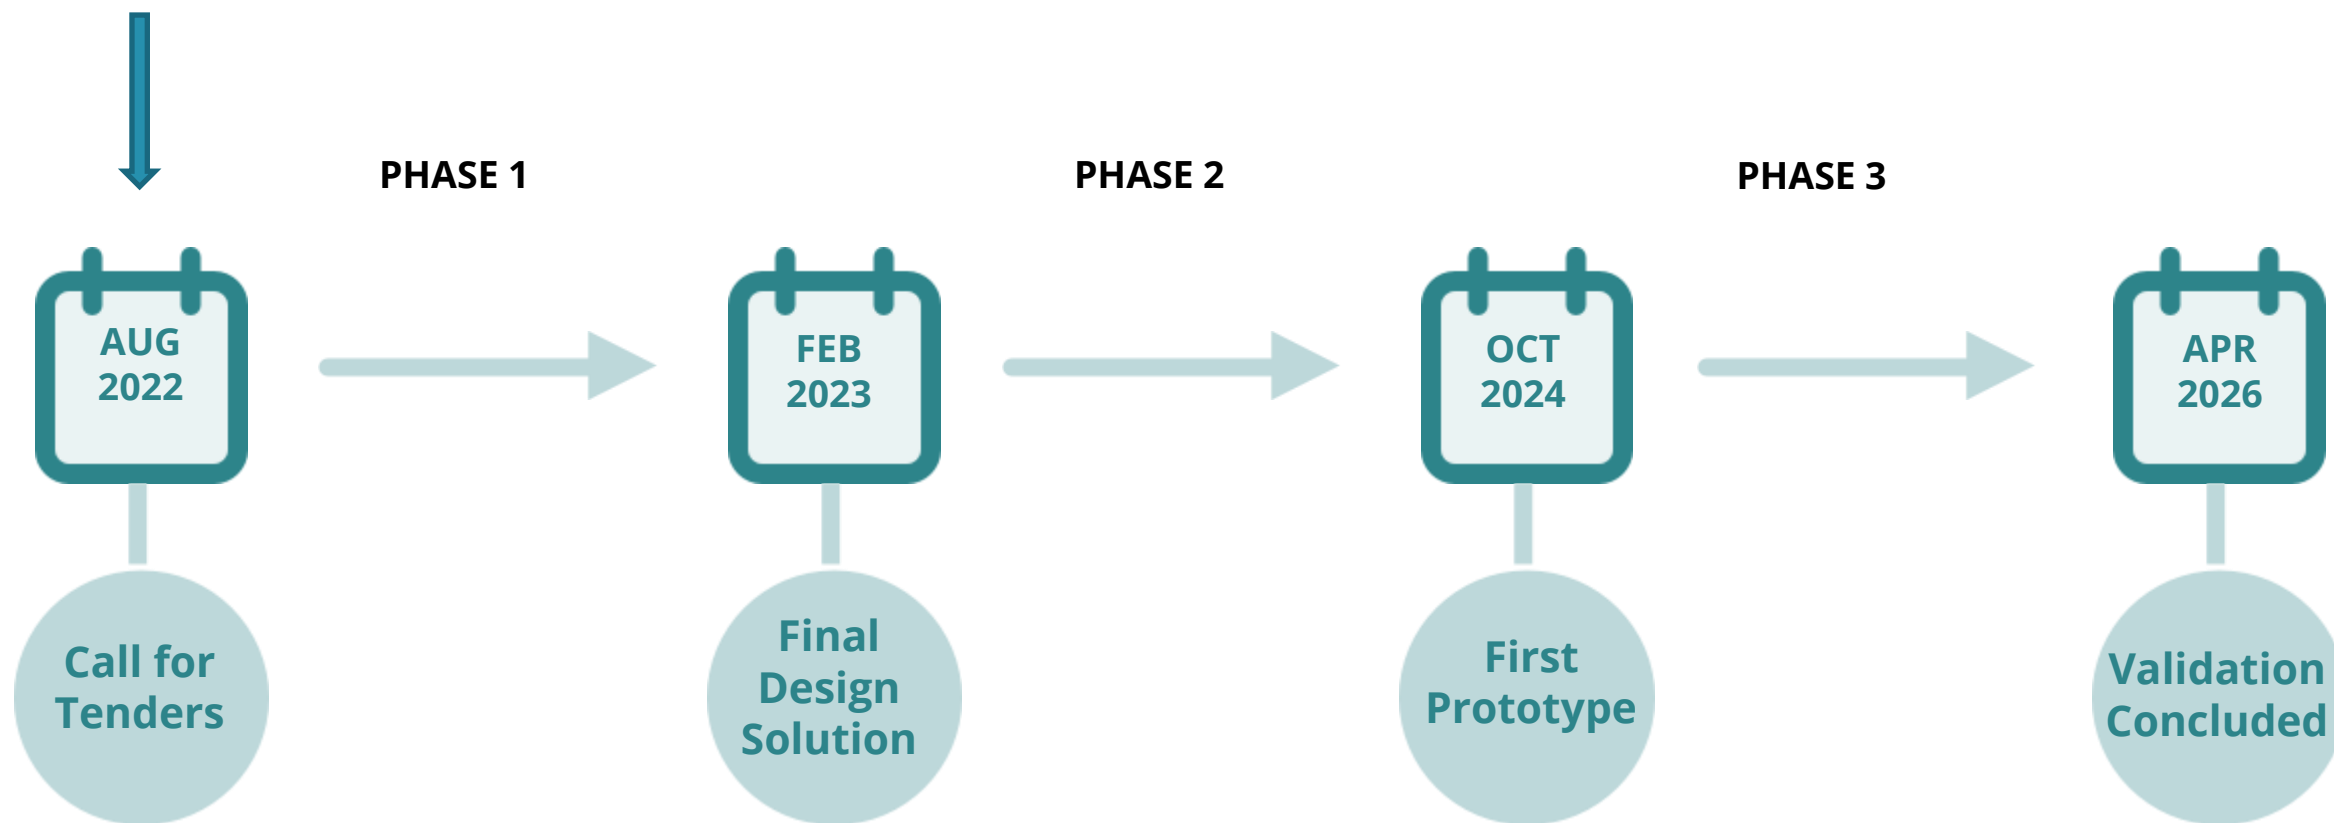

Enhanced local supply chains and European innovative business

ValueMerge

Erengul Coskun

Founder & Director/ValueMerge

International enterprising is more than a good translation and matchmaking

The value of ValueMerge is the merge of values

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

ValueMerge is a Business Initiator between EU-Countries & Turkey

in Medical Technologies & Healthcare

Innovation Basket

- ✓ **Multi Visional** Merging the values of Clinical & Technical & Commercial perspectives for need-based and value-based healthcare services in Turkey and EU Countries
- ✓ **Multicultural:** Efficient business communication
- ✓ **Multifunctional:** Cost effective and result oriented compact services for Small Medium Enterprises

- Established in **The Netherlands in 2011**
- Organizes customized trade missions to Turkey
- Builds up need-based and value-based database for the target markets
- Provides business coordination services in healthcare and medical technologies for **Turkish and West European markets**
- Coordinates MedTech outsourcing services form Turkey to **West Europe**
- Provides customized value-based and need-based training and workshops with business culture simulations regarding the specific cases as threats and opportunities in the targeted market

Complementary Innovations

Why Complementary Innovations with Turkey?

in Medical Technologies & Healthcare

- Countries including India and Turkey saw strong GDP growth in the third quarter of 2021.
- While other countries, including China, Australia and Japan, saw their GDP slow or fall.
- The OECD says GDP growth in half the G20 major economies is still below pre-pandemic levels.

Of the 38 OECD countries, GDP growth was highest in India, Saudi Arabia and France between Q2 and Q3 2021.

India, Saudi Arabia, France and Turkey are leading the bounceback from COVID-19 across the G20 forum of the world's major economies, according to new data.

**Despite of the pandemic and crisis;
strong GDP growth (rank 4th) in 2021**

Centralized & Personalized Healthcare Services

Note: Youth Dependency Ratio changed to the "Child Dependency Ratio".

➤ Eager to explore the opportunities by participating customized trade show to Turkey regarding MedTech, Healthcare and side sector innovations?

➤ Want to measure the values and the needs of elderly (home)care in Turkey?

➤ Willing to cooperate to adapt your healthcare innovation to answer the needs of elderly lives in Turkey?

There were at least one elderly person in about one in 4 households

In Turkey, 5 million 903 thousand 324 of 24 million 804 thousand 86 households consisted of at least one elderly person in 2020. In other words, at least one elderly person lived in 24% of households.

Let's communicate for sure!

There were 1 million 478 thousand 346 elderly people living alone in Turkey

1 million 478 thousand 346 of 5 million 903 thousand 324 households with at least one elderly person living alone. 75.3% of one-person households was elderly females and 24.7% was elderly males.

Proportion of elderly population by type of household in 2020

Source: TurkStat, Address Based Population Registration System, 2020

At least to inspire each other!

➤ Interested in linking the ecosystems for AHA/AAL innovations to Turkey as a hub country?

We Offer Distinguished Business Network & Services to Turkey

in Medical Technologies & Healthcare

- Customized trade missions to 
- Outsourcing services form Turkey to West Europe in MedTech Innovations
- Regional entrepreneurial support to the project-based MedTech innovations in Turkey
- Customized value-based and need-based training and workshops with business culture simulations regarding the specific cases as threats and opportunities in the targeted market

INCENTIVES

CRITICAL MEDICAL TECHNOLOGY INVESTMENT PROJECTS CAN BENEFIT FROM TAILOR-MADE PROJECT BASED INCENTIVES

PROJECT-BASED INCENTIVES

- **Cash grant** up to 25% of machinery and equipment.
- **Corporate tax exemption** up to 100 percent and investment support up to 200 percent; or a corporate tax exemption exclusively for the profits derived from the investment for the first 10 years following the commencement of operations.
- **Income tax withholding** support up to 10 years.
- **VAT exemption** for imported or domestically purchased machinery and equipment for projects with an investment incentive certificate.
- **Customs tax exemption** for imported machinery and equipment for projects with an investment incentive certificate.
- If the investment is built upon a public immovable property, a right of assessment or use on that immovable property can be granted in favor of the investor without consideration for 49 years. On condition that the investment is completed and the envisaged employment is provided for 5 years, ownership of the immovable property can be transferred to the investor without consideration upon request.
- **Social security premium support** for employer's share for up to 10 years.
- Compensation of up to 50 percent for **energy consumption expenses** related to the investment for up to 10 years.
- **Interest or dividend support** for the loans extended in order to finance the fixed investment amount for up to 10 years.
- **Salary support for qualified employees** for up to five years; eligible support is capped at twenty times the gross monthly minimum wage. Qualified personnel is the key personnel with great knowledge and experience in the industry. These personnel would be critical in order for the investment to provide the promised outcome. We would expect 50 to 100 employees to be eligible for this support for a 1,000 employment, please note that this number can go up with negotiation.
- The Presidency may allow the **State to become a shareholder** owning up to 49% of the investment amount provided that the acquired shares will be sold back to the investors or be sold via public offer within 10 years.
- The Presidency may decide that all kinds of **infrastructure investment** can be carried out if the project required.
- **Guarantee of purchase** for the project-based investment product can be granted, the duration and amount of which will be determined by the Presidency.
- **VAT refund** for construction expenses.
- The Presidency may grant **exemption for permission, assignment, license, registrations** and other restrictive provisions imposed by other laws for project-based investments.

MEDEA's SUPPORTS INNOVATION IMPLEMENTATION

AIOTIBusiness Forum 05-04-2022

**Pietro Dionisio, Project manager
- AIOTI WG HEALTH Delegate
Chair**

MEDEA IN A NUTSHELL

MEDEA is a SME founded in 1997 as spin-off of the Scuola Superiore Sant'Anna – Pisa(Italy).

- **Impact Assessment** to generate evidence of the added value of innovative services and solutions.
- **Innovation Management** for value-based innovation adoption and scaling up.
- **Exploitation and impact assurance** strategy definition.
- **Project Management** of challenging large scale international project and initiatives.

The Core Team

Cristiano Paggetti
CEO - MEDEA

c.paggetti@medeaproject.eu

Elena Tamburini
Impact Assessment Manager

e.tamburini@medeaproject.eu

Simona Geli
Project manager

s.geli@medeaproject.eu

Pietro Dionisio
Project manager

p.dionisio@medeaproject.eu

Barbara Borgogni
Project Assistant

b.borgogni@medeaproject.eu

International Collaborations

Alliance for
Internet of Things
Innovation

international institutions and initiatives such as:

AIOTI - Alliance for Internet of Things Innovation

Chair of the health working group

COVID-19 Italy Vulnerabilities (CIV-N) Network

Member of the World Health Organization CIV- Network

Mapping of the COVID-19 pandemic impact on vulnerable population in Italy

ACTIVAGE-ORG

Vice -Chair of Activage.org Association

The Association goal is to promote and drive the scale up of Active and Healthy Ageing services and technologies worldwide

Founder member of the MedICT Joint Lab

The Joint lab (ICT for medical and health science) is composed by: University of Florence, Tuscany healthcare authorities, SMEs. Medea's role is to promote innovation adoption through stakeholder training and impact assessment monitoring.

Support to Local Ecosystems Empowerment

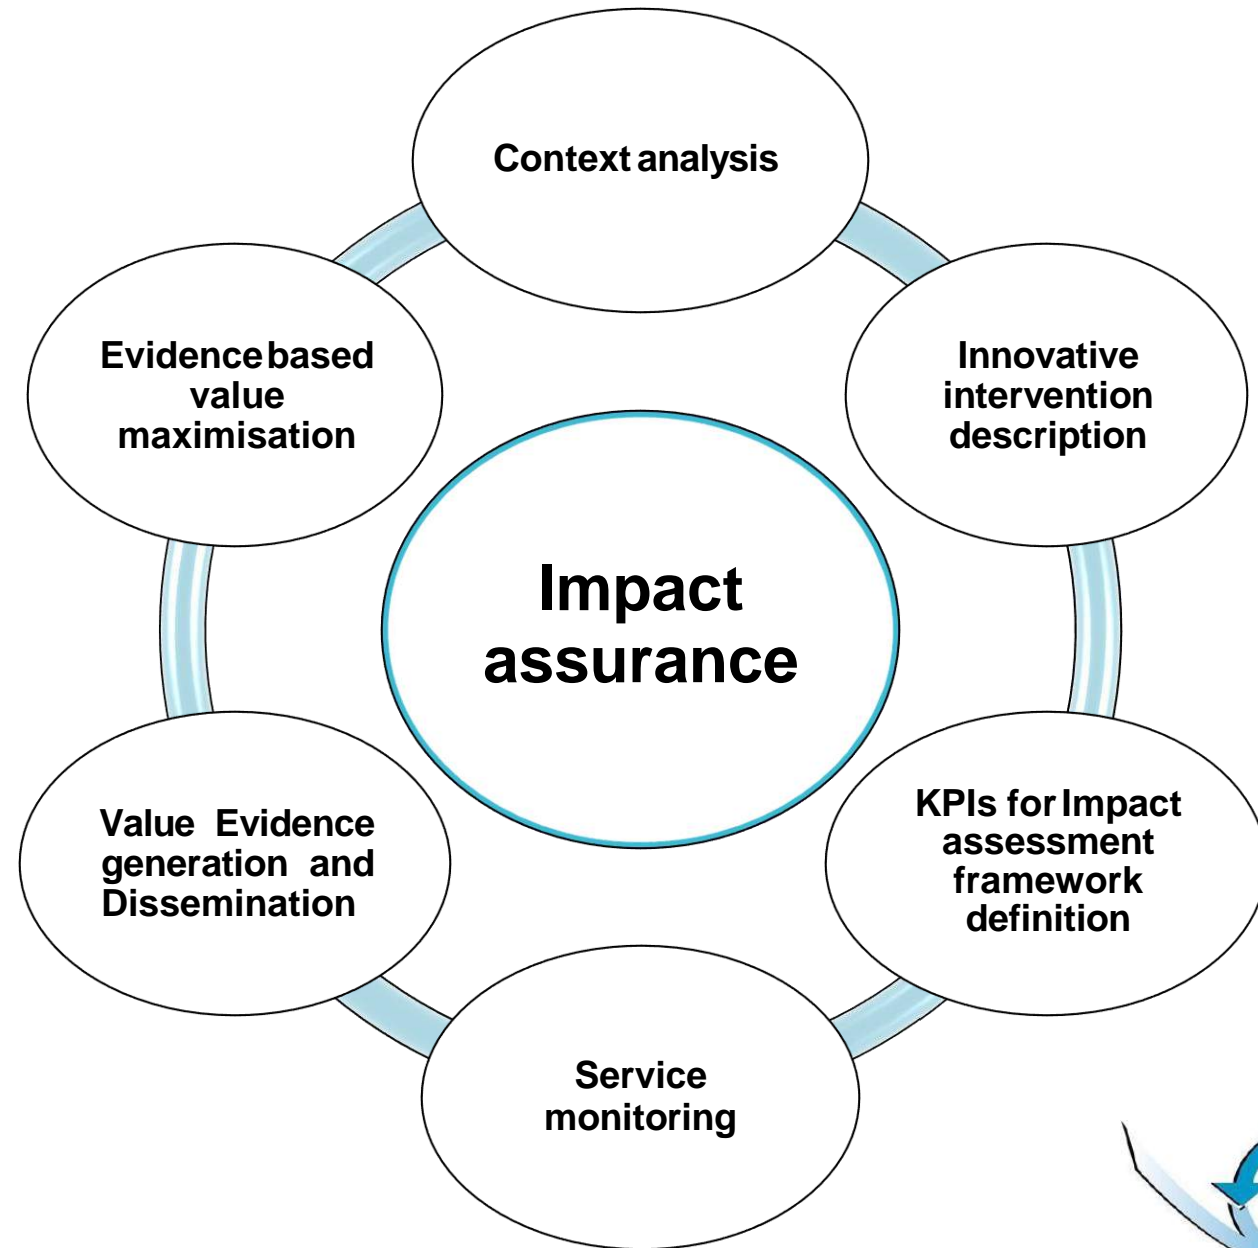

MEDEA has been promoting and supporting the empowerment, the strategic vision and activities planning of several local and international ecosystems:

- **Sistema Incubazione di Imprese** Area Metropolitana Fiorentina
- **CHIC** Connected Health Innovation Centre which is led by business and focused on the area of connected health in Northern Ireland.
- **EU-CAN:** European – Canada telemedicine and e-Health best practice framework
- **European Health Card:** European Working document for the STOA Panel on The European health card: political issues and technological barriers
- **ACTIVAGE.ORG Association:** composed by international research centers, service providers and companies to promote and drive the scale up the Active and Healthy Ageing services and technologies deployment in Europe and Worldwide,

The MEDEA core activities for impact assurance

MEDEA FRAMEWORK FOR: INNOVATION MANAGEMENT and IMPACT ASSURANCE

Main features of MEDEA's approach

Innovation Management

- Impact indicators co-design with reference stakeholders and domain experts: multidimensional KPIs framework definition for added value evidence generation (impact assessment) and results maximization (impact assurance)
- **Tailoring** of the MEDEA innovation management framework to local ecosystem features.
- **Definition of a Value-based** replication and scaling up strategy and guidelines

Innovation management of IoT based healthcare services

Two European reference experiences: ACTIVAGE and PHARAON

ACTIVAGE: 24 M€ with 7.500 users involved
<https://www.activageproject.eu/>

PHARAON: 20 M€ with 5.000 users involved
<https://www.pharaon.eu/>

The SMILE PLATFORM

SMILEPlatform

Welcome

LOGGED AS : MEDEA MEDEA

THE OVERALL OBJECTIVE OF THE PHARa-ON PROJECT IS TO PROVIDE SUPPORT FOR EUROPE'S AGEING POPULATION BY INTEGRATING DIGITAL SERVICES, DEVICES, AND TOOLS INTO OPEN PLATFORMS THAT CAN BE READILY DEPLOYED WHILE MAINTAINING THE DIGNITY OF OLDER ADULTS AND ENHANCING THEIR INDEPENDENCE, SAFETY, AND CAPABILITIES. THE PROJECT WILL UTILISE A RANGE OF DIGITAL TOOLS INCLUDING CONNECTED DEVICES (E.G., THE INTERNET OF THINGS, IoT), ARTIFICIAL INTELLIGENCE, ROBOTICS, CLOUD AND EDGE COMPUTING, SMART WEARABLES, BIG DATA, AND INTELLIGENT ANALYTICS THAT WILL BE INTEGRATED TO PROVIDE PERSONALISED AND OPTIMISED HEALTH CARE DELIVERY.

Project Management Portfolio

AGAPE

2 Mil. € project; 9 partners involved (Large-Medium enterprises, Research Centres and SMEs)

Project management, financial reporting, impact and innovation management and technical advice

BD-KNEE

3 Mil. € project; 4 partners involved (Large-Medium enterprises and SMEs)

Project management, financial reporting and technical advice

OPEN MAKER

3 Mil. € project; 10 partners involved (Large-Medium enterprises and SMEs)

Project management, financial reporting and technical advice

Exploitation activities in collaboration with Orthokey (Medea's sister company)

VOSTARS

Business plan for the market uptake of an AR Head Mounted Display for surgery.

MEFISTO

Exploitation strategy and impact assessment of 2 innovative devices in the field of knee replacement.

ARTS 4-0

Exploitation strategy and project management of an Augmented Reality innovative device for surgical domain.

Networking and co-design

The Summer School on Connected Health “Where IoT meets AI” in collaboration with Ulster University

<http://www.connectedhealth-summer-school.org/>

Training and co-creation:

- Analyzing user's and service provider's perspectives;
- Technological challenges and opportunities;
- Innovation and business perspectives.

Medea promotes such annual networking event since 2016

Connected Health Summer School

20-24 June 2022

Digital Transformation
with Social Impact**

Ángel Sola, Head of international programs

Fundación Cibervoluntarios is a Spanish NGO of international reference in promoting an inclusive digital transition, with special attention to people and entities in a situation of digital vulnerability. Worldwide pioneer in the creation and management of a technological volunteering network. It facilitates the appropriation of digital skills to an average of 60,000 people/year.

LINES OF ACTION

- 1 Fight against the digital divide on three fronts: territorial, gender and social through digital skills*
- 2 Accelerate the digitization of workers and companies (SMEs, local entrepreneurs, Startups, little NGOs)*
- 3 Promote responsible, sustainable and ethical use of technology by society*
- 4 Boost Citizenship participation*
- 5 Promote technological vocations and boost digital skills and talent*

20 YEARS DIGITAL TRANSFORMATION WITH SOCIAL IMPACT

CIBER
VOLUNTARIOS.org

ACTION LINES TO ACHIEVE THE GOALS

We develop our own projects or in collaboration with other Organizations. The bond common to all is to generate transformation and social impact, in addition to building and contributing to create a participatory and inclusive digital citizenship with more opportunities.

ExactCu re

Fabien Astic

Co-founder, Business Development

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

Exactcure develops a Digital Health solution to **properly use drugs**.

Our **Digital Twin** simulates the **concentration of drugs** in the blood of a patient based on his/her personal characteristics in order to avoid under-doses, overdoses and drug-drug interactions.

Personalized Drug Simulations as a Service

Our disruptive technology is based on fundamental research. We want to become the worldwide reference in **personalized medication simulations**.

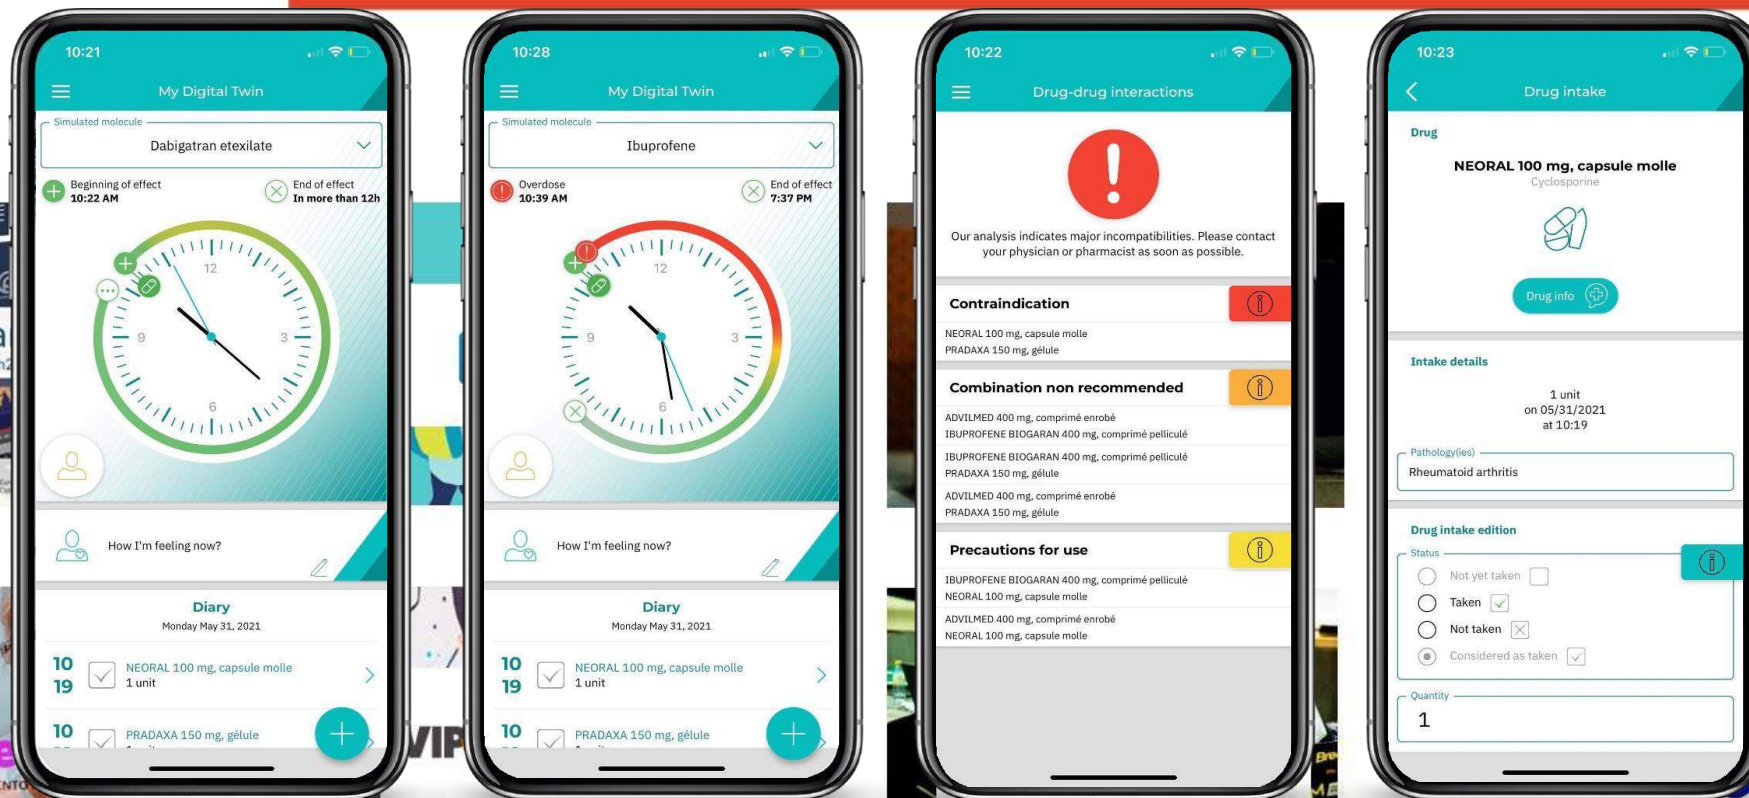

EXACTCURE
Your Digital Twin for a Personalized Medication

PlatformUptake.eu

For the patient at home

CIBER
Personalized Drug Simulations as a Service
VOLUNTARIOS.org

EUROPEAN IMPACT - WORKING WITH 83 PARTNERS

Avoid under-doses, overdoses and drug interactions

EXACTCURE
Your Digital Twin for a Personalized Medication

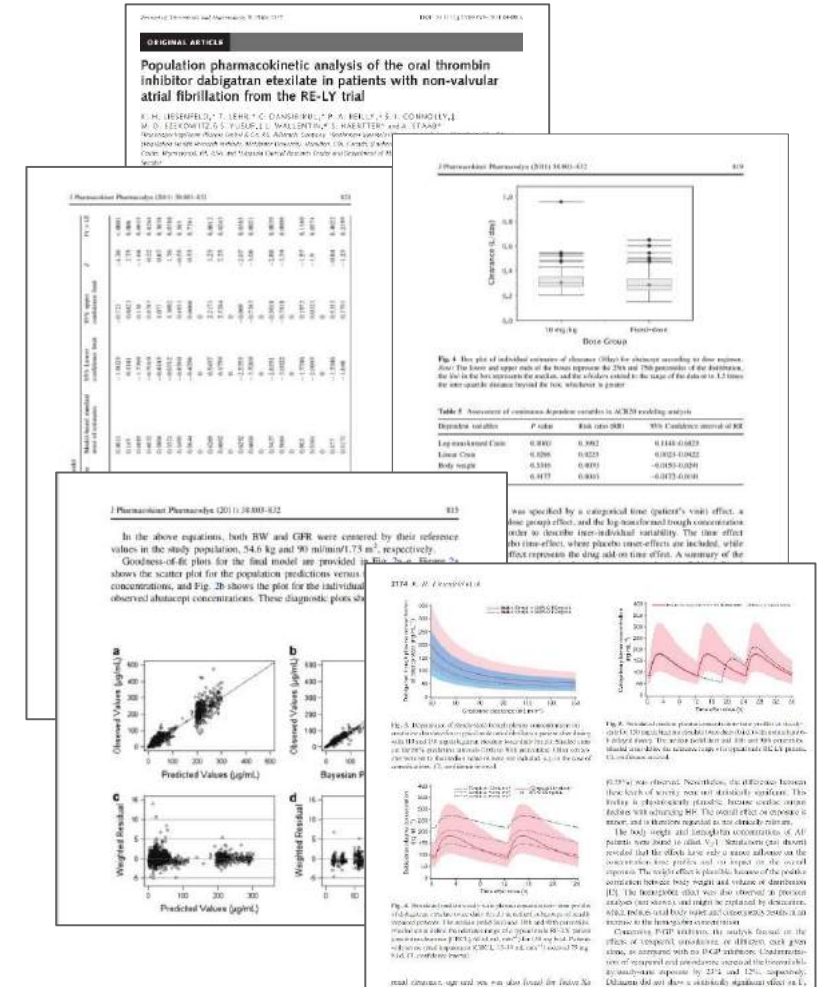

Example: dabigatran

Personalized Drug Simulations a

- 55 years old
- 45 kg
- Strong renal impairment
- Normal genotype

110 mg 2/day

75 mg 1/day

EXACTCURE
Your Digital Twin for a Personalized Medication

Adapt posology to this individual patient

We provide **Personalized Drug Simulations as a Service**.

Personalized Drug Simulations as a Service

Your Digital Health solution can call our simulations thanks to our API, and integrate them into your system in order to help **your end-users**:

- **Healthcare professionals** to adapt prescriptions to each individual patient,
- **Patients** to avoid overdoses, under-doses and drug-drug interactions

Targeted partners: „medicine information providers“ i.e. providers of medical information (incl. information about medicines) to :

- Hospitals, doctors, pharmacists
- Patients

EXACTCURE
Your Digital Twin for a Personalized Medication

Run an experimentation involving our personalized drug simulations with HCP and patients

1. ***Equip a cohort of chronic patients and a group of specialist doctors with our Digital Twin, using***
 - *either your own end-user interfaces integrating our personalized drug simulations*
 - *OR ExactCure's native user interfaces (web-based simulator for HCP + mobile app for patients)*
2. ***Measure the medico-economic benefit***

BRAINE

BRAINE Project

Big Data PROcessing and Artificial Intelligence at the Network Edge

PlatformUptake.eu

Sean Ahearne

Dell Technologies Research Ireland

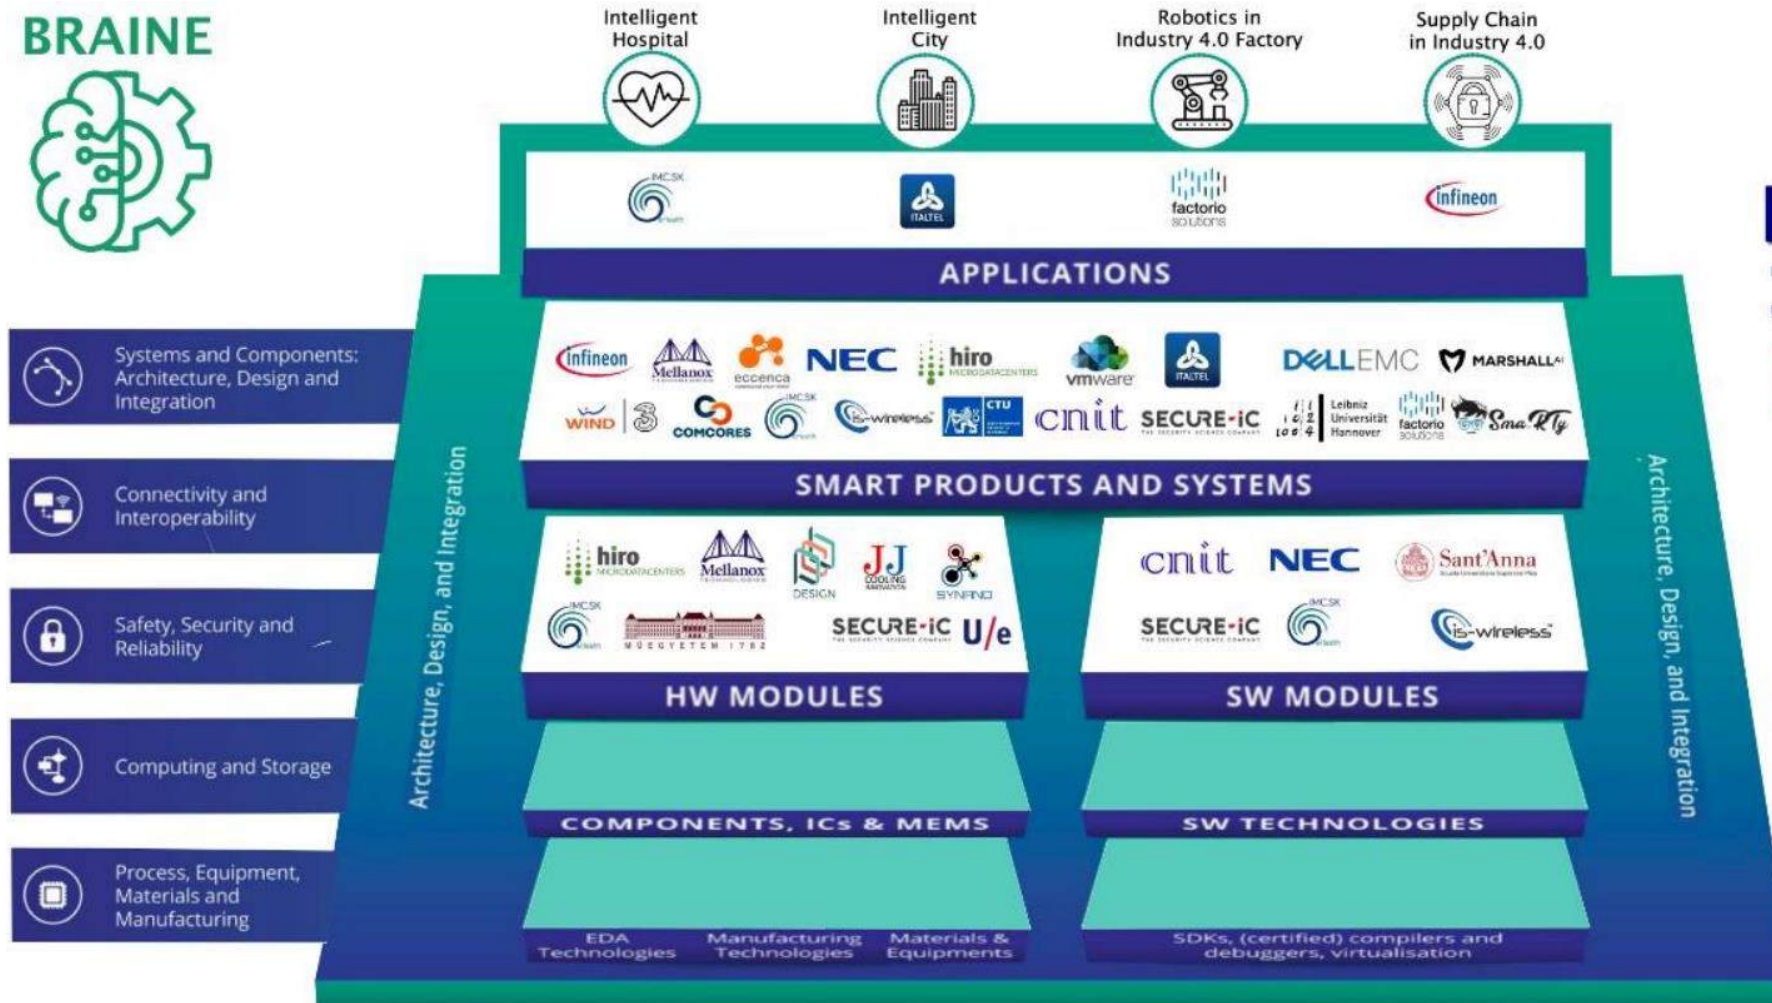

This project has received funding from the European Union's Horizon 2020 Research and Innovation Action under Grant Agreement No 875452.

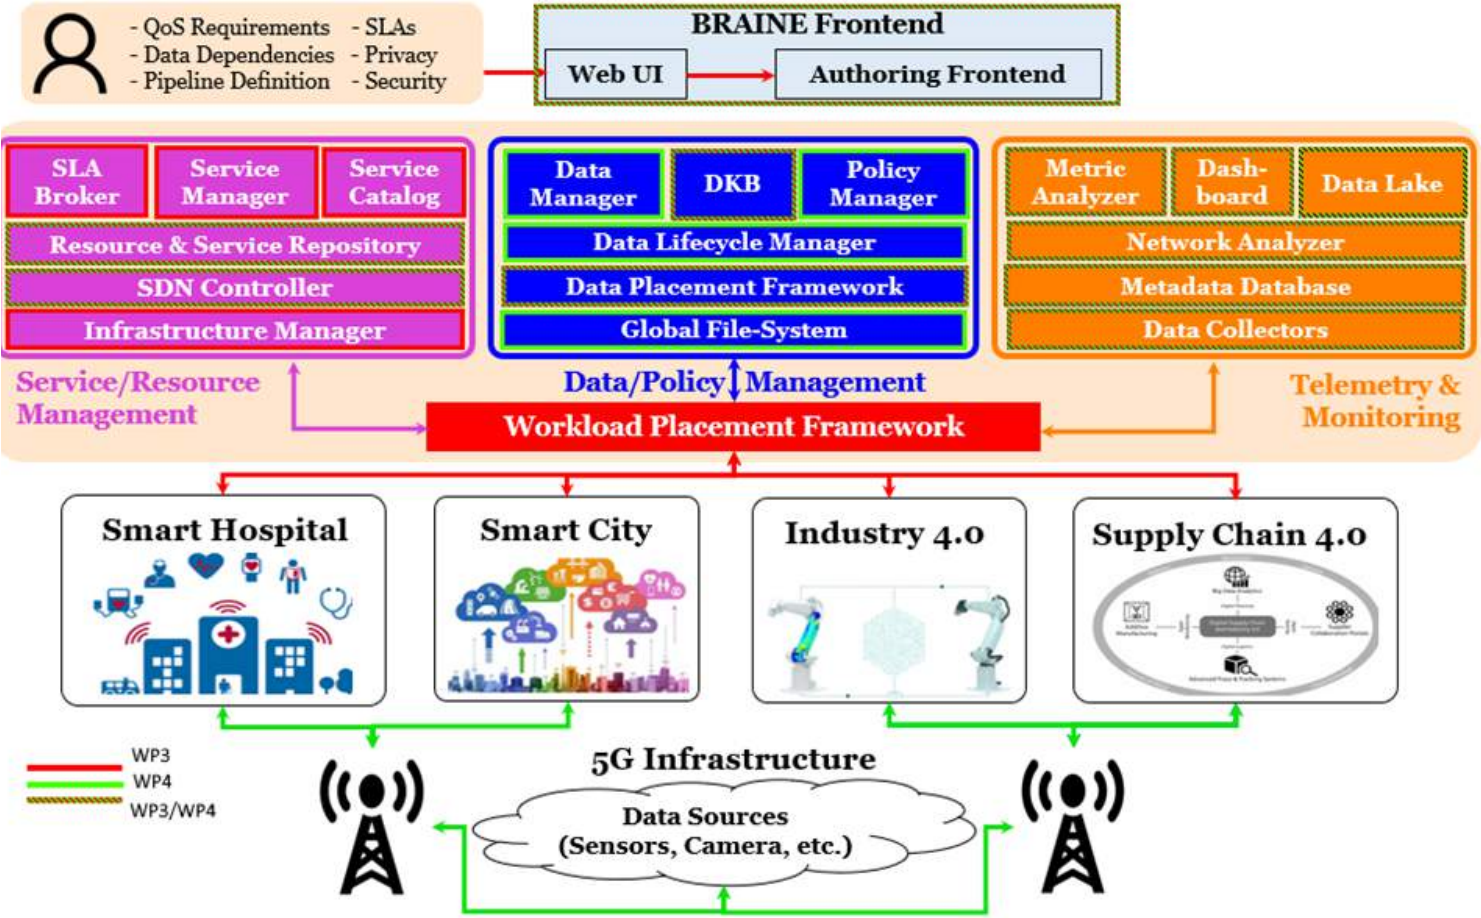

- Long horizon roadmap (5-10 years)
- “Keeping the pulse of technology advancements”
- Participate in European research
 - 14 completed, 6 in progress
- Perform studies and building proof of concepts
- Distill the knowledge and pass it on
- Look for disruptive technologies
 - and how they might change the way we work

BRAINE

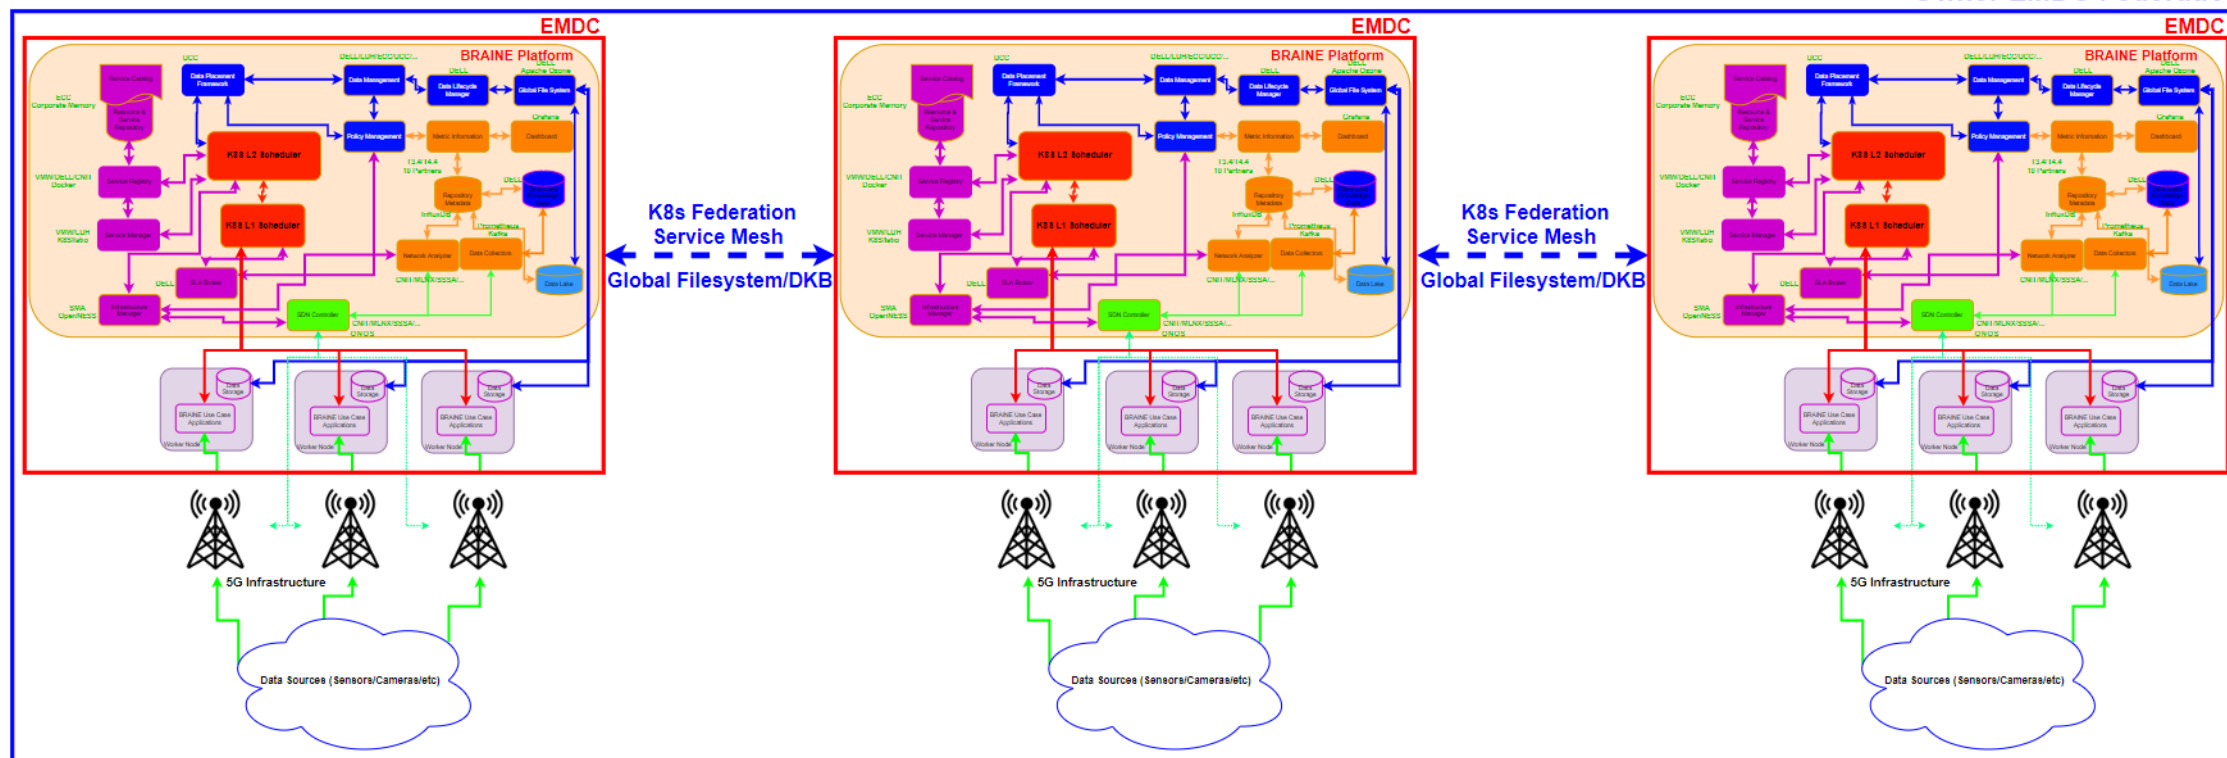

- 01 May 2020 – 01 May 2023
- <https://www.braine-project.eu/>

Use Case – Smart Hospital

- On-prem edge solution
- Use case owners want zero cloud service interaction
 - (Platform supports cloud interaction)
- High performance requirements – patient sensor data time series analysis, AI digital twin
 - Blockchain-based verification of patient sensor data
- High data protection, privacy and control requirements
- Ease of use from user (doctor) perspective
- Seamless transfer of patient processes and data between hospitals.

- Data policy management
 - GDPR policies
 - Local government policies
 - Patient consent policies
- Data lifecycle management
 - Blockchain based audit log to guarantee data mgmt. logs

- Seamless data/workload movement
 - Automatic Patient data movement
 - Based on geo-location/latency
- Easy modification to support an AL use case.
