# A curated framework of Open Source Platform components to accelerate the development of Smart Solutions

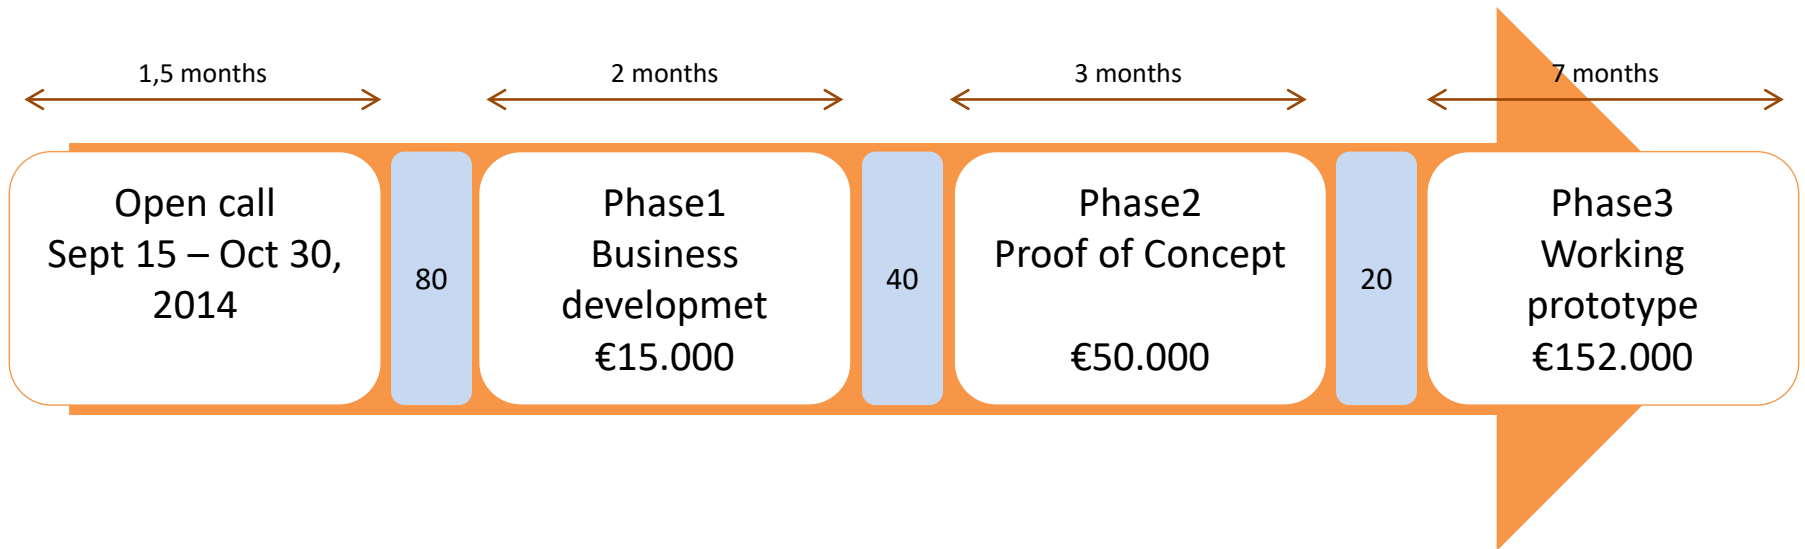

The FIWARE Accelerator Programme promotes the up-take of FIWARE technologies among solution integrators and application developers, with a special focus on SMEs and startups.

Supporting this Programme, the EU had launched an ambitious campaign in September 2014 **mobilizing up to 100M€ in equity-free funding, to support 1000 entrepreneurs (in Europe and beyond)**, to develop innovative applications based on FIWARE technology. In the past years, FIWARE has offered strategic and specialist technical consultancy and continuous opportunities for contacts with investors and corporate clients.

FIWARE  
technology

Testing with real  
users (living lab)

Pan-European coverage and  
events

14 solutions in  
the market

6 prototypes

19 Proof of  
Concepts

39 Business  
models

300+ SMEs or  
startups applied to  
FICHe from 30+  
countries

150 new jobs

New paying  
customers

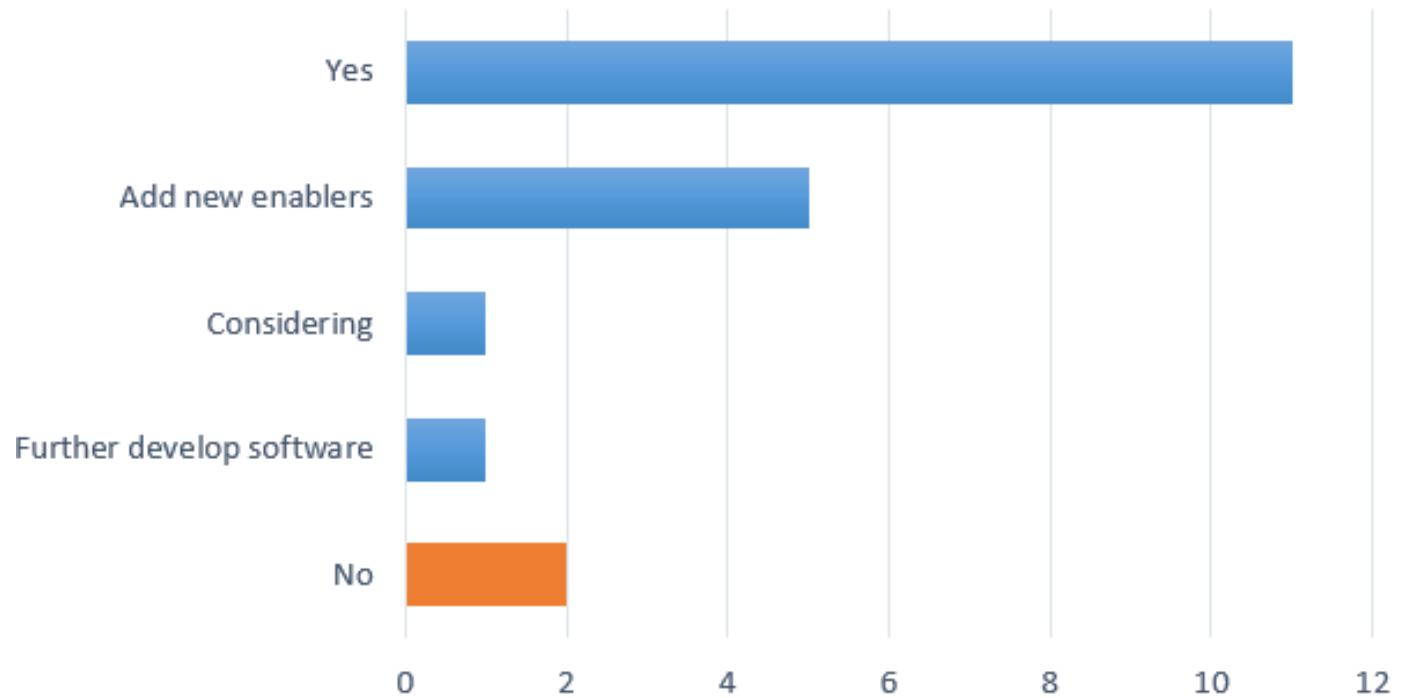

New markets

Better clinical outcomes

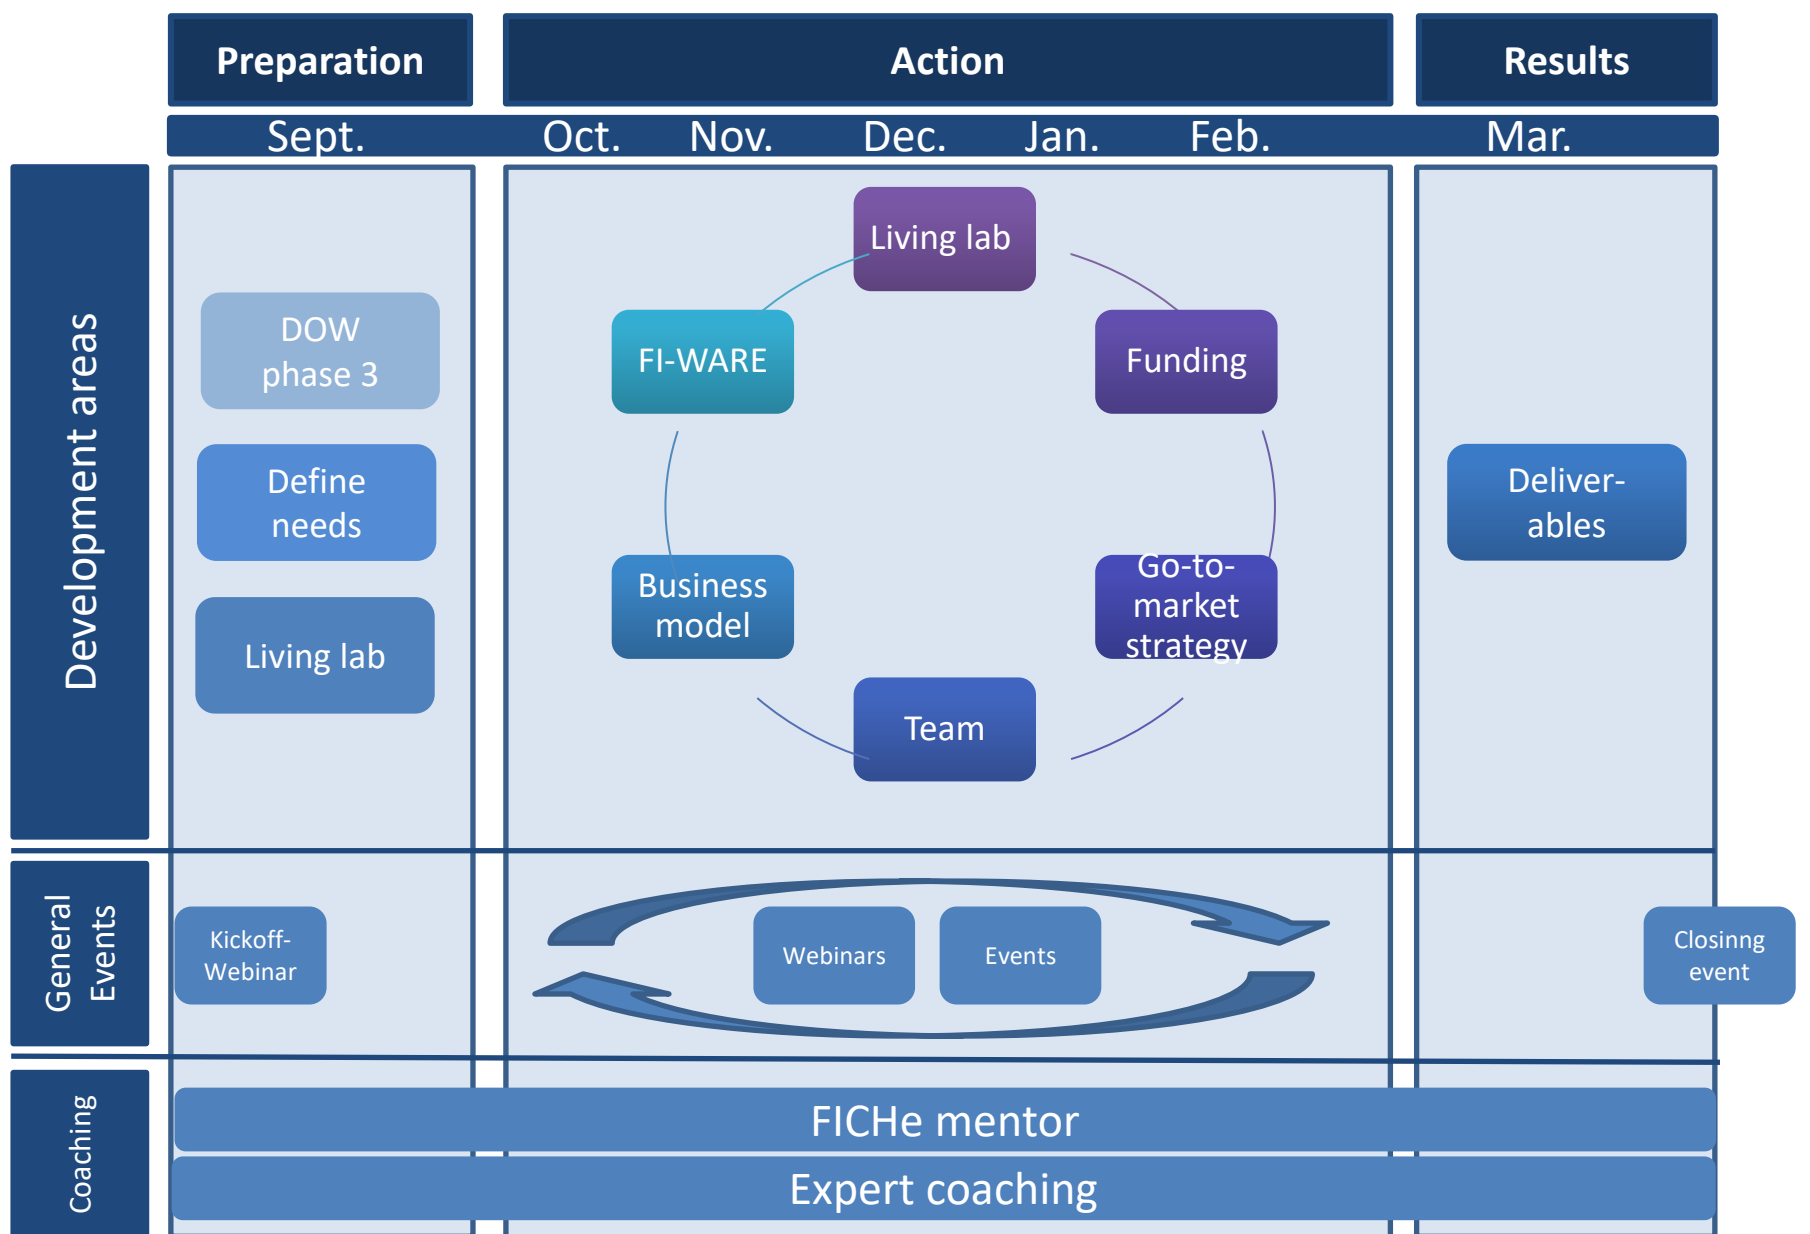

Fundraising  
over 3 MEUR

- **FIWARE technology**
  - providing a large set of components (enablers) ready for use
  - faster development of prototype versions and final product
  - FICHe companies have even contributed to the development of FIWARE technology by implementing new features to the FIWARE components
- **FIWARE community**
  - an active community which supports and maintains FIWARE technology
  - a lot of opportunities for knowledge transfer among startups struggling with similar problems and networking opportunities with other stakeholders
  - possibility to be in direct contact with the developers of the enablers

### Plans of use FIWARE in the future
